1801 Keating Ave.

"ADAC takes great pride in having four manufacturing facilities designated as Clean Corporate Citizens by the State of Michigan since 2003. We believe that protecting the environment is just as important as being a successful automotive supplier" – Jim Teets, President & Chief Executive Officer

ADAC is a full service automotive supplier dedicated to the production of door handles and components, exterior trim, mirrors, cowl vent grilles, and marker lighting for worldwide automakers. It designs and manufactures components for Ford Motor Company (and associated holdings), General Motors Corporation, Fiat-Chrysler Automobiles, Honda Motors, Nissan Automotive, Volkswagen, Tesla Automotive and American Seating Corporation.

ADAC's locations are certified to the ISO14001:2004 EMS Standard and TS16949 Automotive Industry Quality Management Standard. Founded in Grand Rapids, Michigan in 1975, ADAC has locations in the United States, and through a global partnership with Strattec and Witte, facilities in Brazil, Mexico, and China. In the U.S., ADAC has over 500,000 square feet of manufacturing space and employs more than 1200 employees.

Highlights in Pollution Prevention:

- Recycling of cardboard, office paper, scrap plastic and metal, and various Universal Wastes such as fluorescent light bulbs, used batteries, and electronics.
- Effective use of air pollution control equipment on plastic part surface coating operations to minimize emissions of regulated air pollutants;
- Waste segregations to supplement cost effective recycling and disposition of hazardous and non-hazardous wastes.
- Entering 10th year of Solvent Reclamation program which consistently produces an average annual 60-70% reuse rate.
