DATE: July 29, 2011

SUBJECT: Green Project Reserve (GPR) Determination
Traver Creek Best Management Practices (BMPs)
SRF No. 5472-01

The Traver Creek BMPs project is a categorical Green Project. It is a green stormwater infrastructure project that stabilizes the streambank with bioengineering practices, establishes a permanent riparian buffer and floodplain on a portion of Traver Creek. These practices are designed to mimic the natural hydrologic considerations of the site. In addition, the project includes the implementation of a comprehensive street tree program located in the Traver Creek Watershed.

The green components of the project are $266,789, based on the as-bid amount. The total loan amount is $435,000. The GPR forgiveness amount is $217,500.
