TAKEBACK PROGRAM CONSUMER CONTACTS

8a. What Web site address do you provide to consumers for information on your takeback program?
www.apple.com/environment/recycling/program/contact.html

8b. If provided, what telephone number do you provide to consumers for information on your takeback program?

TAKEBACK PROGRAM INFORMATION

9. Please describe your takeback program.
Apple provides a free mail-back program. Logistics are fulfilled through FedEX. Interested parties may go to the www.apple.com/environment/recycling/program/index.html and complete the information. Or, an email may be sent to iRecycle@apple.com. Either means of contact will result in an email sent to the customer with specific instructions and/or bar codes. The bar codes / shipping codes are taken to FedEx along with their packed equipment. FedEx transports the package to one of Apple's contracted recyclers for destruction. The recycler has passed Apple's extensive audit and vetting process. A detaile ddescritopn of the destruction / recycling process is contained in number 13, below.

10. What information do you provide to consumers on how and where to return covered electronic devices that are labeled with your name or brand label?
Each product manual has information regarding recycling and directs purchasers to Apple.com for more information. Apple.com/environment/recycling has a complete, step by step process for free recycling. iRecycle at Apple.com is an email address which is monitored during business hours. This provides a forum for customers to ask questions regarding recycling. The questions can be specific, such as "my bar codes didn't print," or general knowledge such as "how does the program work?"

11. How do you provide information to consumers on how and where to return covered electronic devices?
See above.

TAKEBACK PROGRAM REPORT (include this information beginning with the first registration submitted after the implementation of the takeback program)

12. The total weight of the covered electronic devices received by the takeback program from consumers during the prior year:

Tons

13. The processes and methods used to recycle or reuse the covered electronic devices received from consumers:
Materials are manually and mechanically disassembled and shredded into commodity-sized fractions materials of metals, plastics and glass. All hard drives are shredded into confetti-sized pieces. The pieces are sorted into commodities grade materials. No resale. No re-use. No parts harvesting.

After processing, the pieces are sorted into fractions materials comprised of metals, plastics and glass and used as stock for the production of new products.

None of the materials received by Apple, processed by our contracted vendors or their downstream vendors while performing the duties associated this program will leave North America.

Landfill materials are minimal and include certain packaging, which cannot be broken down to non-contaminated, standalone products.

amended application 2/25/10

I, the undersigned registrant, swear and affirm, UNDER PENALTY OF LAW, that the statements contained herein are true and correct. I certify under penalty of law that the information contained on this form, to the best of my knowledge and belief, is true, accurate, and complete. I am aware that there are significant penalties for submitting false information.
