MEMORANDUM TO THE DIRECTOR

Information: Natural Resources Commission

Subject: Designated Trout Streams for Michigan (FO-210)

Authority

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director to provide for better protection and preservation of fish, game and birds.

Discussion and Background

Fisheries Order 210 governs the designated trout streams for Michigan. Streams on the list are cold water streams where trout are the predominant game fish. Anglers who fish designated trout streams are required to possess a valid all-species fishing license while fishing these waters. We are proposing several changes to this Order including: two additions, three removals, a change to an upstream boundary for one stream, correction of a spelling error in an entry, and a minor revision to the authority section.

We are proposing the addition of Cedar Creek (known as Rustool Creek) and Dynamite Creek located in Cheboygan County. These streams have resident brook trout populations and an annual steelhead spawning run. The general statewide fishing regulations do not afford these populations enough protection from angling harvest during critical spawning times. Adding the streams to the Order will protect these fish from harvest when they are spawning.

Several streams are being recommended for removal primarily due to lack of trout survival: Flowerfield Creek (St. Joseph, Kalamazoo, and Van Buren Counties), Little Swan Creek and tributaries (Branch and St. Joseph Counties), and Paint Creek (Washtenaw County). Flowerfield Creek is too warm during the summer to support trout survival so the annual stocking has been cancelled. Brown trout are no longer stocked into Little Swan Creek and there is no evidence of natural reproduction in the system. The annual trout stocking for Paint Creek has been cancelled after a recent survey collected few trout. Therefore, management is being changed from trout to warmwater species on these waters. Removing these streams will result in an increase in angling opportunities since these waters will now be open to fishing all year.

We are proposing a change to the upstream boundary for Dowagiac Creek, Cass County, from Bunker Lake to Goodenough Road. The change is being recommended since that specific stream section is too warm for trout survival. Trout are no longer stocked at this location. Removing the section will allow anglers to fish there all year thus increasing angler opportunity to fish for warmwater species.

There is one spelling error which is being corrected for a Grand River tributary in Ionia County. Libhart Creek was spelled as Libhard Creek and the authority section has a minor revision.

Recommendation

It is our recommendation that the changes to fishing regulations proposed in Fisheries Order 210 and summarized above be approved to take effect on April 1, 2012. The recommended changes will either afford spawning protection to trout populations or open streams to angling all year. Anglers will benefit from the protection of trout populations and increased opportunities when restrictions are no longer warranted. This will result in the addition of two streams, removal of three streams, modification of one stream section, and correction of a spelling error.

This Order was submitted for information at the October 13, 2011 meeting of the Natural Resources Commission. This Order is being resubmitted for action at the November 10, 2011 meeting of the Natural Resources Commission. This item appeared on the Department's October 2011 calendar, and is eligible for approval on November 10, 2011.

Date

ORDER

DESIGNATED TROUT STREAMS FOR MICHIGAN

Under the authority of section 48701(q) of 1994 PA 451, as amended, being MCL 324.48701 the Director of the Department of Natural Resources on November 10, 2011, ordered that for a period not to exceed five years, the streams and portions of streams in the list which follows are hereby designated as trout streams:

Key to Designation List:

Unless otherwise described, the location description listed after the stream name indicates the downstream limit of the trout designation. All of the stream and its tributaries, unless excepted, from that point upstream are designated trout waters. Exceptions are italicized.
