PART ONE – ENVIRONMENTAL CLEANUP EXECUTIVE SUMMARY

Program Overview

EGLE utilizes a variety of state funding sources to support environmental cleanups, which are overseen by the Remediation and Redevelopment Division (RRD). The RRD works with private parties to conduct cleanups and manage environmental risks, utilizes state funds to undertake actions needed to protect public health and the environment at locations of environmental contamination, and facilitates brownfield redevelopment. The RRD provides the funding and directs private contractor work to address the environmental concerns at high priority or orphan sites. State-funded actions include providing alternative drinking water supplies, conducting groundwater/soil investigations, and the cleanup of soil and groundwater and managing risks posed to the public and the environment by hazardous substances.

Michigan has taken action at over 3,000 sites since 1990 to protect public health, safety, and welfare and allow further redevelopment. Additional accomplishments of the Environmental Cleanup and Redevelopment Program include:

- Water supplies have been replaced at approximately 10,000 homes and businesses.
- More than 500 sites have been prepared for redevelopment since 1990.
- Refined Petroleum Fund triage activities have assessed over 1,400 sites since 2012.
- The RRD is currently managing over 430 state-funded sites where liable parties are unable or unwilling to do so.
- Over $200 million in grant and loan dollars have supported 377 brownfield projects since 1992. Brownfield projects have shown a return on investment of $29 for every $1 invested.

Three bond issues, specifically, the 1988 Environmental Protection Bond, 1998 Clean Michigan Initiative Bond, and 2002 Great Lakes Water Quality Bond, have served as one-time funding sources to support Environmental Cleanup and Redevelopment Program efforts as well as Brownfield Redevelopment Grants and Loans across the state. Of note, the 1988 bonds have been fully expended and the 1998 bonds will be fully expended in the near future. Once these fund sources are fully spent, the annual expenditures will no longer be maintained.

Funding Sources

Environmental Protection Bond of 1988 – Bond

In November 1988 Michigan voters approved Proposal C, an Environmental Bond Issue, commonly known as the Environmental Protection Bond (EPB). This proposal authorized EGLE to use $660 million of general obligation bonds for environmental protection throughout Michigan. Part 195 of Act 451 provides for the specific use of these funds. The EPB has been fully appropriated, allocated to sites, and spent.

Environmental Protection Bonds (1988)	Authorization	Spent as of 09/30/19	Closing Adjustments	Remaining
Environmental Cleanup *	$ 425,000,000	$ 423,802,400	$ 1,197,600	$ 0

Clean Michigan Initiative Bond of 1998 - Bond

In November 1998 Michigan citizens approved a $675 million Clean Michigan Initiative (CMI) Bond to be used for brownfield redevelopment and environmental cleanup: protecting and enhancing Michigan's lakes, rivers, and streams; reclaiming and revitalizing local waterfronts; making critical state park improvements; enhancing local parks and recreational opportunities; pollution prevention; and protecting the public from lead hazards. Part 196 of Act 451 provides for the specific use of these funds. The program expenditures addressed in this report include six EGLE categories of the CMI: response activities at facilities; waterfront improvement; remediation of contaminated lake and river sediments; nonpoint source pollution control grants; clean water fund programs; and pollution prevention programs.

Clean Michigan Initiative (1998)	Authorization	Spent as of 09/30/19	Remaining
Response Activities at Facilities *	$ 335,000,000	$ 326,893,976	$ 8,106,024

Great Lakes Protection Bond of 2002 - Bond

The Strategic Water Quality Initiatives Fund (SWQIF) was created in December 2010 by amendments to Section 5204 of Part 52, Strategic Water Quality Initiatives, and Section 19703a of Part 197, Great Lakes Water Quality Bond Implementation, of Act 451. The funds are to be used to address nonpoint source water pollution.

The Environmental Cleanup and Redevelopment Program has historically received $15 million annually to support state-funded cleanup actions at Michigan sites of environmental contamination when there are no financially viable liable person(s). The fiscal year 2019 appropriation was the remaining balance for environmental cleanups and redevelopments. The program has been appropriated over $150 million from FY 2011 through FY 2019. As of 9/30/2019, $112.8 million has been expended on 83 sites. The unreserved balance is set aside to be used for future program activities.

Great Lakes Protection Bond (2002)	Authorization	Spent as of 09/30/19	Remaining
State Water Pollution Control Revolving Fund	$ 290,000,000	$ 0	$ 290,000,000

Cleanup and Redevelopment Fund – Restricted Revenue

The Cleanup and Redevelopment Fund (CRF) was created by the July 1996 amendments to Part 201 of Act 451 to provide a permanent, ongoing funding mechanism for Michigan's Environmental Cleanup and Redevelopment Program. The funds included in the CRF consist of 80 percent of the state's share of annual unclaimed bottle deposit revenues and the transfer of Environmental Protection Bond Fund (EPBF) revenues appropriated in prior fiscal years to the EGLE for solid waste alternative projects, pursuant to Section 19507 of Part 195 of Act 451. Annual revenues to the fund are approximately $20 million, with the fund providing $1 million in FY 2019 to support emergency cleanup actions and contingencies of short-term nature.

Refined Petroleum Fund – Restricted Revenue

The Refined Petroleum Fund (RPF) was created in October 2004 by amendments to Part 215, Refined Petroleum Fund, of Act 451. Uses of the RPF include, but are not limited to, corrective actions necessary to address releases of refined petroleum products. The fund receives approximately $50 million of revenue annually from the environmental protection regulatory fee of 1 cent per gallon that is imposed on all refined petroleum products sold for resale or consumption in Michigan. The Environmental Cleanup and Redevelopment Program receives over $30 million annually for petroleum-related cleanup activities.

A brief summary of the appropriations received by EGLE for state-funded environmental programs through FY 2019 is provided on the next page. For explanations of abbreviations used in this report, please see "Acronyms and Definitions" on page 54.

PART TWO – ENVIRONMENTAL PROTECTION BOND

Environmental Protection Bond Fund

Part 195 of Act 451, the EPBF, was established by 1988 PA 328 (Act 328) to account for the proceeds of $660 million of general obligation bonds approved by Michigan voters in November 1988. This approval was obtained under the general authority of Article 9, Section 15, of the 1963 State Constitution. The bonds are authorized for financing environmental protection programs to clean up sites of toxic and other environmental contamination; contribute to a regional Great Lakes Protection Fund; address solid waste problems; treat sewage and other water quality problems; reuse industrial sites; and preserve open space. Act 328 also specifies that not more than $425 million of the proceeds of these bonds be available to clean up sites of toxic and other environmental contamination; not more than $150 million be available for solid waste projects; not more than $60 million be available to capitalize the State Water Pollution Control Loan Fund (recorded as equity transfers to the Michigan Municipal Bond Authority); and not more than $25 million be available to fund Michigan's participation in a regional Great Lakes Protection Fund.

The $100 million Great Lakes Protection Regional Fund received the $25 million Michigan share in 1989.

The Site Assessment and Site Reclamation Fund was appropriated $45 million to provide grants to local units of government for assessing the nature and extent of contamination at a property and for grants to local units of government to undertake response activities at contaminated properties that were identified for their redevelopment potential.

Approximately $1 billion has been appropriated for the Environmental Cleanup and Redevelopment Program (CRP). Approximately $929 million relating to 1,766 project sites has been expended on the CRP from FY 1989 through FY 2019. Approximately $68 million has been expended for emergency cleanup actions and contingencies at 826 project sites. Further detailed information can be found in Part Three of this report under the Environmental Cleanup and Redevelopment and the CRP Emergency and Contingency Programs.

From the 994 Solid Waste Alternatives project applications received, 295 projects were funded totaling approximately $99 million. Approximately $18 million of this was for closures of dumps and landfills. Over $52 million was for market development projects. Approximately $9 million was for Clean Michigan Community projects.

The following pages provide additional details regarding the EPBF projects.

SUMMARY OF ENVIRONMENTAL PROTECTION BOND FUND SALES

AS OF SEPTEMBER 30, 2019

Most of the funding for Environmental Protection Bond projects is provided by the net proceeds from General Obligation Bonds sold by the Michigan Department of Treasury.

The bond has been fully depleted and closed.

PART THREE – CLEANUP PROGRAM SUMMARIES

SECTION ONE: STATE SITES CLEANUP PROGRAM

Purpose:

In July 1996, PA 380 amended Part 201, Environmental Remediation, of Act 451, by adding Section 20108c and creating the State Sites Cleanup Fund (SSCUF) and the State Sites Cleanup Program (SSCUP). Its intent was to fund environmental cleanups at contaminated sites where the state was a liable party as an owner or operator of the site, as described in Section 20126 of Part 201.

Program Funding:

Section 20108c of Part 201 provided a process for the expenditure of $20 million that was originally appropriated by 1994 PA 265 to the Michigan Department of Natural Resources, and subsequently transferred to EGLE. The fund was augmented by an additional appropriation of $10 million in FY 1997 and again in FY 2002, when the Michigan Department of Technology, Management and Budget (DTMB) repaid $965,100 that had been spent for remediation of the Clinton Valley Center in Oakland County prior to its sale. In 2005, the Legislature appropriated $5 million in interest earned from the SSCUF from 1996 through 2004 for use in the program. In 2012, the Legislature appropriated $4.4 million which consisted of interest earned from the SSCUF and previously lapsed funds. In 2019, $46,938 lapsed, and overall, $5,623,394 has lapsed.

Site Selection and Prioritization:

According to Section 20126 of Part 201, each state executive department and agency is required annually to provide EGLE a list of all facilities where they are liable as an owner or operator. The Brownfield Redevelopment Board (Board), created under 1996 PA 383, and composed of Directors of DTMB and EGLE, and the President of the Michigan Economic Development Corporation (MEDC), is responsible for prioritizing funding for the cleanups. The sites are prioritized for response activity by the Board, based on the degree of health or environmental risk and by resale or redevelopment potential, as stipulated under Section 20108c of Part 201.

State Sites Cleanup Program

	Net Appropriations	Reserved for Specific Sites	Cumulative Expenditures 9/30/19	Unreserved Balance
State Sites Cleanup Fund	$34,741,706	$301,606	$34,440,099	$0

Explanation of "Overall Status" Information for the Table in Appendix A:

To date, SSCUP funding has been sought through EGLE for the contaminated sites. As of September 2019, there are 136 sites on the SSCUP list. The status of these sites is described below:

Closed: All planned activities have been completed and the project has been closed. There are currently 74 sites that have been completed.

Closure Activities: The majority of site cleanup activities have been completed. Some additional activities may be necessary before some sites can be closed. There are currently 16 sites at which the state is conducting closure activities.

Design: The design of a treatment remedy or system is underway. There are seven sites in the design stage.

Investigation: Determining the cleanup activities that are needed at the site. There are currently four sites in the investigation phase.

No Funding: There has been no funding allocated to these sites due to lack of funding. There are ten sites that are not receiving allocations due to lack of funds.

Not Eligible: Sites are not eligible for funding for reasons other than non-liability. There is one site in this category, due to the type of contamination not being eligible or because there was no contamination discovered after the site was reported.

Operation and Maintenance (OM): Operating and maintaining a treatment system. There are 19 sites where treatment systems are currently in operation or periodical monitoring is taking place.

State Not Liable: The site is not eligible for SSCUP funding because it has been determined not to be a state liability. There are five sites where it has been found that the state is not liable, the majority of which belong to the Michigan Department of Transportation who acquired the sites pursuant to the State Transportation Act of 1976, but never conducted any operations or other activities at the sites.

SECTION TWO: RESPONSE ACTIVITIES AT FACILITIES

ENVIRONMENTAL CLEANUP AND REDEVELOPMENT PROGRAM

This section provides information on the following EGLE, Remediation and Redevelopment Division (RRD), components of the Environmental Cleanup and Redevelopment Program:

1. Program Summary Table
2. Environmental Cleanup and Redevelopment Program (CRP)
3. Strategic Water Quality Initiative Program (SWQI)
4. Environmental Cleanup and Redevelopment Emergency and Contingency Program (E&C)

1. PROGRAM SUMMARY TABLE

The state funding sources for these programs are in the table below and include the fund amount and the program it was allocated to:

SOURCE	AMOUNT	ALLOCATED FOR
Clean Environment Initiative	$14,900,000	CRP
Clean Michigan Initiative Bond Fund	$241,038,090	CRP
Cleanup and Redevelopment Fund	$77,381,039	CRP
	$48,694,250	E&C
Environmental Protection Bond Fund	$354,417,894	CRP
	$10,312,732	E&C
Environmental Protection Fund	$30,596,599	CRP
General Fund/General Purpose	$69,897,484	CRP
	$1,557,458	E&C
Refined Petroleum Fund	$290,751,055	CRP
	$8,348,645	E&C
Strategic Water Quality Initiative Fund	$150,313,967	SWQIF

Using these funds, Michigan has taken action at over 3,000 sites to protect public health, safety, and welfare and allow further redevelopment including:

- Water supplies have been replaced at approximately 10,000 homes and businesses.
- Immediate physical contact and fire/explosion risks have been addressed at hundreds of sites.
- Containment and cleanup has been conducted at nearly 50 landfills.
- More than 150 abandoned, dangerous buildings have been demolished.
- More than 500 sites have been prepared for redevelopment.

Despite the progress above, there are still thousands of sites to be addressed that need additional funding.

2. ENVIRONMENTAL CLEANUP AND REDEVELOPMENT PROGRAM

Purpose:

The CRP is administered by the RRD and is governed by Parts 195, 196, 201, 213, and 215 of Act 451. Under this program, the RRD initiates and oversees state-funded cleanup actions at Michigan sites of environmental contamination when there are no financially viable liable person(s), or where the liable person(s) refuses to act in a timely manner and immediate action is needed.

Site Selection:

Cleanup projects are proposed annually by EGLE and are approved by the Legislature via an appropriations bill. Historically, the sites selected and approved were those that presented the most significant risks to public health or the environment. However, starting in FY 1997 and with passage of the CMI Bond Fund, sites were also selected and approved based on their redevelopment potential.

The CRP sites included in this report are those sites approved by the Legislature to receive cleanup funds from FY 1989 through FY 2019. This includes sites approved to receive state funds in order to match federal funds for cleanup actions at federally listed sites of contamination (i.e., Superfund match sites).

Program Funding:

Funding sources for the CRP include: the EPBF from FY 1989 through FY 1997, FY 2003, FY 2007, and FY 2012; General Fund/General Purpose (GF) monies from FY 1997 through FY 2002; the CRF from FY 1997 through FY 2004; CMI Bond Fund from FY 1999 through FY 2005, FY 2007, FY 2008 FY2013, and FY 2017; Environmental Protection Fund (EPF) from FY 2002 through FY 2004; and RPF in FY 2006, and FY 2008 through FY 2019. In FY 2012, an appropriation of $6 million in GF was received for response actions at a site in Muskegon County. In FY 2018 an appropriation of $14.9 million in Clean Environment Initiative monies were received. From FY 1989 through FY 2019, approximately $1 billion has been appropriated for site-specific cleanup projects at 1,820 sites. The chart below identifies appropriations and expenditures by funding source for the CRP.

Environmental Cleanup and Redevelopment Program

	Net Appropriations	Cumulative Expenditures 9/30/19	Reserved for Specific Sites	Unreserved Balance
Clean Environment Initiative	$14,900,000	$9,511,285	$5,388,715	$0
Clean Michigan Initiative Bond Fund	$241,038,090	$231,378,767	$9,659,323	$0
Cleanup and Redevelopment Fund	$77,381,039	$77,381,039	$0	$0
Environmental Protection Bond Fund	$354,417,894	$354,417,894	$0	$0
Environmental Protection Fund	$30,596,599	$30,596,599	$0	$0
General Purpose/General Fund	$69,897,484	$69,897,484	$0	$0
Refined Petroleum Fund	$290,751,055	$191,650,457	$54,713,671	$44,386,927
Total	$1,078,982,161	$964,833,525	$69,761,709	$44,386,927

Explanation of "Overall Status" Information for the Table in Appendix B:

Many CRP sites are approved to receive state cleanup funds in more than one fiscal year and for more than one type of cleanup activity. The information provided under "Overall Status" takes into account all activities approved for state funding and activities the RRD plans to take in the future.

Cancelled: All planned state-funded cleanup activities have been cancelled. This is often due to work being completed by another party or planned work is no longer needed to abate the acute risk to public health or the environment. Planned work was cancelled at 42 sites.

Closed/Monitoring:	All state-funded cleanup activities that the RRD planned to undertake have been completed, however in some cases monitoring of groundwater or drinking water may still be occurring to ensure continued compliance with criteria. These sites may need further actions if concentrations in the groundwater increase above applicable criteria. There are 72 sites in this status.
Complete:	All state-funded cleanup activities that the RRD planned to undertake have been completed. Full Closure under the law may not have been sought because the additional State investment is not warranted based on the overall need to allocate a finite amount of resources among many facilities and sites. Generally, the RRD waits for final closeout documentation from contractors and abandonment of monitoring wells to complete contract closeout procedures. Cleanup actions are complete at 1,124 sites.
Funding Hold:	Insufficient funding is available to complete work at many sites. These sites do not pose an immediate threat to the health of Michigan residents. The state has suspended cleanup actions at 71 sites until additional funding is secured.
In Progress:	State-funded cleanup activities are in progress. There are 317 sites in this category.
OM:	Treatment, remediation, or new water supply systems have been constructed and the remaining cleanup activities consist largely of OM of groundwater treatment systems. There are 34 sites in the OM phase.
Potentially Liable Party (PLP):	Other parties are conducting cleanup activities. State funds are not being expended at these sites. A liable party or another entity is performing remediation actions at 160 sites that had previously been recommended for state funding.

3. STRATEGIC WATER QUALITY INITIATIVE PROGRAM

Purpose:

The SWQI is administered by the RRD and is governed by Parts 52, 195, 196, and 201 of Act 451. Under this program, the RRD initiates and oversees state-funded cleanup actions at Michigan sites of environmental contamination when there are no financially viable liable person(s).

Site Selection:

Cleanup projects are selected annually by EGLE and are required to meet the following criteria: improve the quality of the waters of the state; the identity of the person(s) who are liable under Part 201 for the release resulting in the water pollution is not known or the person(s) who are liable do not have sufficient resources to fund the required response activities; the facilities include property that is located within the identified planning area boundaries of a publicly owned sanitary sewer system; and response activities are necessary to address existing or imminent unacceptable risks arising from conditions that contribute to nonpoint source water pollution, including project management activities within EGLE. The sites selected are those that present the most significant risks to public health or the environment.

Many of the SWQI sites included in this report were funded by the CRP prior to FY 2011 and include sites approved to receive state funds in order to match federal funds for cleanup actions at federally listed sites of contamination (i.e., Superfund match sites).

Program Funding:

The program has received $195 million from the SWQIF from FY 2011 through FY 2019 to address contamination at 83 sites. A total of $44,686,332 has lapsed. The chart below identifies appropriations and expenditures for the SWQIF funds.

Strategic Water Quality Initiative Program

	Net Appropriations	Cumulative Expenditures 9/30/19	Reserved for Specific Sites	Unreserved Balance
Strategic Water Quality Initiative Fund	$150,313,667	$111,587,869	$38,725,798	$0

Explanation of "Overall Status" Information for the Table in Appendix C:

Many SWQI sites are approved to receive state cleanup funds in more than one fiscal year and for more than one type of cleanup activity. The information provided under "Overall Status" takes into account all activities approved for state funding and activities the RRD plans to take in the future.

In Progress: State-funded cleanup activities are in progress. There are 56 sites in this category.

Closed/Monitoring All state-funded cleanup activities that the RRD planned to undertake have been completed, however in some cases monitoring of groundwater or drinking water may still be occurring to ensure continued compliance with criteria. These sites may need further actions if concentrations in the groundwater increase above applicable criteria. There are six sites in this status.

Funding Hold: Insufficient funding is available to complete work at many sites. These sites do not pose an immediate threat to the health of Michigan residents. The state has suspended cleanup actions at 1 site until additional funding is secured.

OM: Treatment, remediation, or new water supply systems have been constructed and the remaining cleanup activities consist largely of OM of groundwater treatment systems. There are 15 sites in the OM phase.

Potentially Liable Party (PLP):	Other parties are conducting cleanup activities. State funds are not being expended at these sites. A liable party or another entity is performing remediation actions at two sites that had previously been recommended for state funding.
Complete:	All state-funded cleanup activities that the RRD planned to undertake have been completed. Full Closure under the law may not have been sought because the additional State investment is not warranted based on the overall need to allocate a finite amount of resources among many facilities and sites. Generally, the RRD waits for final closeout documentation from contractors and abandonment of monitoring wells to complete contract closeout procedures. Cleanup actions are complete at three sites.

4. ENVIRONMENTAL CLEANUP AND REDEVELOPMENT EMERGENCY AND CONTINGENCY PROGRAM

Purpose:

The RRD, E&C Program, is governed by Parts 201, 213, and 195 of Act 451. Under this program, the RRD initiates and oversees state-funded cleanup actions that are of an emergency or short-term nature, such as:

- Removal of abandoned drums.
- Restricting access to a location by fencing the area.
- Responding to hazardous substance spills.
- Abating imminent fire and explosion hazards.
- Abating imminent public health hazards.
- Mitigating the discharge of regulated substances into surface waters and/or other sensitive environmental receptors.
- Providing bottled water and/or temporary treatment devices to residences with contaminated drinking water until a permanent replacement is provided.
- Monitoring threatened drinking water wells.
- Providing emergency drinking water well replacement.

Site Selection:

The RRD identifies emergency cleanup actions and contingencies as the need arises. Actions can be taken in all areas of the state. Examples of the use of these funds include: disposing of barrels that are a threat to public health and the environment; assessing suspect sites to evaluate acute risk; cleanup of truck, tanker, and rail car spills; providing bottled water to residences at sites of environmental contamination where the groundwater is impacted; and abating an imminent threat to the public health caused by a release of a regulated substance to the environment.

Program Funding:

Funding sources for the RRD, E&C Program, include: the EPBF from FY 1989 through FY 1997 and FY 2003; GF monies in FY 1997; the CRF from FY 1998 through FY 2019; and the RPF from FY 2008 through FY 2019. As outlined in the chart below, from FY 1989 through FY 2019, the RRD received more than $67 million in appropriations and has expended over $61 million for E&C actions. The unreserved balance is set aside to be used for future E&C activities.

Emergency and Contingency Program

	Net Appropriations	Cumulative Expenditures 9/30/19	Reserved for Ongoing Projects	Unreserved Balance
Cleanup and Redevelopment Fund	$48,694,250	$43,475,074	$1,896,440	$3,322,736
Environmental Protection Bond Fund	$10,312,732	$10,312,732	$0	$0
General Fund/General Purpose	$1,557,458	$1,557,458	$0	$0
Refined Petroleum Fund	$8,348,645	$6,361,022	$6,200	$1,981,424
Total	**$68,913,085**	**$61,706,286**	**$1,902,640**	**$5,304,160**

Explanation of "Overall Status" Information for the Table in Appendix D:

SECTION THREE: BROWNFIELD REDEVELOPMENT FUNDING

BROWNFIELD ASSESSMENT AND REDEVELOPMENT PROGRAM

This section provides information on the following EGLE, Remediation and Redevelopment Division (RRD), components of the Brownfield Assessment and Redevelopment Program:

1. Brownfield Grants
2. Brownfield Loans

1. BROWNFIELD GRANTS

Purpose:

The Brownfield Redevelopment Grant Program (BRG) is administered by the RRD and is governed by Parts 196, 201, and 213 of Act 451. Under this program, grants are awarded to local units of government for response activities at brownfield sites with redevelopment potential.

Site Selection:

Grants are approved by the Director of EGLE based on eligibility criteria set forth in Part 196 of Act 451. Eligible sites are those which meet the definition of a facility as defined in Part 201 of Act 451 or sites suspected of being a facility based on the historical use of the property. Eligible response activities include evaluation, cleanup, removal, or containment of hazardous substances as necessary to protect public health and the environment or natural resources. Proposals for projects are accepted on an ongoing basis.

Program Funding:

The Clean Michigan Initiative (CMI) legislation initially identified up to $20 million in bond funds available for Brownfield Redevelopment Grants. The statute was amended in December of 2003 and December 2012 to increase the funds available for Brownfield Redevelopment Grants (BRG) to $50 million. In addition to CMI, additional funding for brownfield grants includes the following:

- A total of $10 million in Environmental Protection Bond Fund (EPBF) has been appropriated for Site Assessment Fund Grants (SAF).
- A total of $35 million in EPBF has been appropriated for Site Reclamation Grants (SRG).
- A total of $6.5 million has been authorized from the Refined Petroleum Fund (RPF) to facilitate redevelopment at sites of petroleum contamination.
- A total of $5 million in Clean Environment Initiative (CEI) has been appropriated for redevelopment grants.
- A total of $10 million in Renew Michigan Fund (RMF) has been appropriated for redevelopment grants.

Funds allocated to projects that are subsequently cancelled, or returned from projects completed under budget, go back to the fund and are available for future redevelopment projects.

Funding to date:

Grant Program	Total Number of Grants	Total Award Amount	Grants Awarded In FY 2019	Grant Amount Awarded in FY 2019	Lapsed Amount
Clean Michigan Initiative Bond Fund BRG	114	$61,498,160	1	$636,529	$181,416

Explanation of "Activity Status" Information for the Table in Appendix E (Brownfield Redevelopment Grant Program), Appendix F (Site Assessment Grant Program), and Appendix G (Site Reclamation Grant Program):

Cancelled: The project was cancelled at the recipient's request.

Completed: All grant-funded activities are complete, and the grant project is closed out.

In Progress: Grant-funded activities are in progress.

Explanation of "Nature of Problem" Information for the Table in Appendix H (Refined Petroleum Brownfield Grant Program), Appendix I (Clean Environment Initiative Grant Program), and Appendix J (Renew Michigan Initiative Grant Program):

Suspected Contamination:	Contamination was not yet confirmed but likely present due to historical uses of the property.
Hazardous Substances	The contaminants present are not petroleum related.
Petroleum	The contaminants present are petroleum in nature.
Soil	The contaminants were present in the soil media.
Groundwater:	The contaminants were present in groundwater media.
VI:	Contaminants pose a risk via the Volitization to Indoor Air Pathway

Contact Person: Ms. Carrie Geyer, Manager, Brownfield Assessment and Redevelopment Section, RRD, EGLE; 517-230-9981; e-mail: GeyerC1@Michigan.gov

2. BROWNFIELD LOANS

Purpose:

The Brownfield Redevelopment Loan Program is administered by the RRD and is governed by Parts 196 and 201 of Act 451. Under this program, loans are awarded to local units of government and Brownfield Redevelopment Authorities created pursuant to state law for response activities at brownfield sites with redevelopment potential.

Site Selection:

Loans are approved by the Director of EGLE based on eligibility criteria set forth in Part 196. Eligible sites are those which meet the definition of a facility as defined in Part 201 or sites suspected of being facilities based on the historical use of the property. Eligible response activities include evaluation, cleanup, removal, or containment of hazardous substances as necessary to protect public health and the environment or natural resources.

Program Funding:

The CMI statute was amended in December 2003 and December 2012 to provide funds up to $25 million for the CMI Brownfield Redevelopment Loan (BRL) Program.

The Revitalization Revolving Loan (RRL) Program was originally capitalized through an appropriation transfer of $4 million of general funds. The RRL Program also received funds pursuant to 1996 PA 480 for the proceeds associated with the MDTMB land sales.

The original funding, loan repayments, and accumulated interest, as well as returned funds from projects cancelled for various reasons and funds returned for projects that have been completed under budget, can be used to make loans to local units of government.

The loan period is 15 years, with interest accruing at the beginning of the sixth year.

Funding to date:

Loan Program	Total Number of Loans	Total Award Amount	Loans Awarded in FY 2019	Loan Amount awarded in FY 2019
Clean Michigan Initiative Bond Fund Brownfield Redevelopment Loans	89	$48,721,500	4	$2,592,000
Revitalization Revolving Loans	32	$14,995,819	0	$0

Brownfield Assessment and Redevelopment Loan Programs

	Net Appropriations	Cumulative Loan Repayments 9/30/2019	Cumulative Interest Repayments 9/30/2019	Loan Funds Returned	Amount Awarded	Available Balance
Clean Michigan Initiative Bond Fund Brownfield Redevelopment Loans	$25,000,000	$10,594,651	$997,192	$16,003,907	$48,721,500	$3,874,250
Revitalization Revolving Loan Fund	$5,841,665	$6,274,338	$537,694	$3,120,006	$14,995,819	$777,883

Explanation of "Activity Status" Information for the Table in Appendix K (Brownfield Redevelopment Loan Program) and Appendix L (Revitalization Revolving Loan Program):

Cancelled: The project was cancelled at the recipient's request.

Closed: All loan-funded activities are complete and loan funds are repaid in full.

Completed: All project-funded activities are complete, and the project is closed out.

In Progress: Project-funded activities are in progress.

Renegotiations: Pursuant to Part 196 of PA 451, the following loans have been renegotiated due to financial hardship as requested by the loan recipient:

Loan Recipient	Project Name	Change in Loan Terms
Clare County Brownfield Redevelopment Authority	HAEDCO Industrial Park Project	Interest rate reduction, duration of loan term extended
City of Muskegon Heights	Mona Terrace Development	Interest rate reduction, duration of loan term extended
Village of Brooklyn	NextGen Energy Headquarters Project	Interest rate reduction, duration of loan term extended
City of Parchment	RiverReach Development Project	Duration of loan term extended

SECTION FOUR: BROWNFIELD REDEVELOPMENT FINANCING ACT

Purpose:

The Brownfield Redevelopment Financing Act, 1996 PA 381, as amended (Act 381), authorizes municipalities to establish Brownfield Redevelopment Authorities (Authorities) to facilitate the implementation of brownfield plans and promote revitalization of brownfield properties through the use of tax increment financing for eligible activities.

Eligible Property:

An eligible property under EGLE's Act 381 implementation authority is a property that meets the definition of "facility" as defined in Part 201, or a "site" or "property" as defined in Part 213 of Act 451. The municipality must approve a brownfield plan that identifies eligible properties on which eligible activities will be conducted and from which the Authority will capture tax increment revenues to reimburse the cost of the activities. Generally, properties are identified by the Authority in conjunction with a developer interested in redeveloping a property.

Project Approval:

Approval by EGLE of a work plan is required where state and local taxes levied for school operating purposes will be used to reimburse costs for certain eligible activities on a contaminated property. Eligible activities requiring EGLE approval include activities to implement due care and other departmental response activities under Part 201. In addition, if school taxes will be captured to reimburse interest costs associated with the financing of the environmental activities, EGLE work plan approval is needed for all environmental activities including Baseline Environmental Assessment (BEA) and due care planning activities which are otherwise "pre-approved".

Calendar Year 2019 Summary:

During the period from January 1, 2019, through December 31, 2019, EGLE reviewed and approved 20 work plans for 14 different Brownfield Redevelopment Authorities for a total of $25,356,349 (local and state school tax capture) for eligible activities at eligible properties. All of the work plans were reviewed within the time frame required under Act 381. These projects may leverage an estimated $664 million in private investment and create or retain an estimated 1,613 jobs.

List of Sites:

A list of sites approved for school tax increment financing by EGLE can be found on EGLE's website www.Michigan.gov/EGLEBrownfields.com.

Legislative Report:

Act 381 requires EGLE and the Michigan Strategic Fund (MSF) to submit a report annually to each member of the Legislature as provided in Section 16(4). MSF is the lead agency for this report and submitted it to the legislature on December 21, 2019. The Annual report prepared in 2019 is for the 2018 tax year and can be found on the MEDC website at the following location:
www.MichiganBusiness.org/Reports-Data/Transparency/?pc=69&cc=71

Contact Person: Ms. Carrie Geyer, Manager, Brownfield Assessment and Redevelopment Section, RRD, EGLE; 517-230-9981; e-mail: GeyerC1@Michigan.gov

SECTION FIVE: CLEANUP CRITERIA EVALUATION

Purpose:

Under Section 20120a(17) of Part 201 of Act 451, EGLE is to periodically evaluate and revise, if appropriate, the cleanup criteria derived under this section. The evaluation is intended to incorporate knowledge gained through research and studies in the areas of fate, transport, and risk assessment. EGLE is required to prepare and submit to the Legislature a report detailing revisions made to cleanup criteria under this section. Inclusion of this section in the Consolidated Report satisfies this obligation.

Revisions:

The Cleanup Criteria Requirements for Response Activity Rules, Part 201 administrative rules 299.1 to 299.50, became effective December 30, 2013. Minor revisions to the generic cleanup criteria were published on January 10, 2018, and June 25, 2018. A link to the current Part 201 cleanup criteria rules is available on the RRD website.

SECTION SIX: UNDERGROUND STORAGE TANK PROGRAM

Background:

With an effective date of December 30, 2014, Senate Bill 791 of 2014 revised Part 215, Underground Storage Tank Corrective Action Funding, of the Natural Resources and Environmental Protection Act, 1994 PA 451 (Act 451). The amendments established the Underground Storage Tank Cleanup Fund (Fund) and the Underground Storage Tank Authority (Authority).

The Authority is governed by a Board of Directors (Board) consisting of the Director of EGLE and six residents of the state appointed by the Governor with the advice and consent of the Senate as follows:

1. An individual representing petroleum refiners.
2. An individual representing independent petroleum marketers
3. An individual from a statewide motor fuel retail association.
4. An individual from a statewide business association that includes owners or operators of refined petroleum underground storage tanks.
5. An individual from a statewide environmental organization.
6. A member of the general public.

The Board members were initially appointed on May 25, 2016; on July 21, 2015, the Board entered into a Memorandum of Understanding with EGLE to administer the Authority and the Fund. The Authority is in the Finance Division within EGLE.

Purpose:

The objectives of the Fund are to assist owners and operators of refined petroleum underground storage tank systems in meeting their financial responsibility requirements pursuant to Part 211, Underground Storage Tank Regulations of Act 451; to fund corrective actions to address releases from refined petroleum underground storage tank systems; and to achieve compliance with Part 213, Leaking Underground Storage Tanks of Act 451.

Funding:

The Fund receives the following revenues:

1. The first $20 million annually that is received by the Environmental Protection Regulatory Fee, a one cent per gallon fee charged against all refined petroleum products sold for resale or consumption in the state.
2. Interest received on the Fund balance.

Money in the Fund at the end of the fiscal year remains in the Fund and shall not lapse to the general fund.

Uses of the Fund:

Money from the Fund may only be expended for the following:

1. To pay principle and interest due on bonds and notes.
2. For reasonable administrative costs not to exceed 7% of the projected revenues of the Fund's projected revenues in any one year.
3. To pay approved claims.

Eligibility:

All owners and operators of refined petroleum underground storage tank cleanup systems are eligible to use the Fund to meet their financial responsibility requirements and to file claims for reimbursement of eligible corrective action costs.

Financial Summary:

Revenue	
Environmental Protection Regulatory Fee	$100,000,000
Civil Service Revenue Deduction	($33,505)
Deductible Buy-Down Fees	$150,500
Interest	$3,404,819
Total Revenue	$103,521,814
Expenditures	
Principle and Interest on Bonds and Notes	$0
Administrative Costs	$3,302,945
Payments of Approved Claims	$21,233,499
Total Expenditures	$24,526,444
Fund Balance at End of FY 2019	$78,995,371

Sites Funded and Status:

Contained in Appendix M.

SECTION SEVEN: LEGACY RELEASE PROGRAM

Background:

On October 26, 2017, Public Act 134 of 2017 amended Part 215, Underground Storage Tank Corrective Action Funding of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451) by creating the Legacy Release Program as provided in Section 21519a.

Purpose:

The objective of the Legacy Release Program is to assist refined petroleum underground storage tank owners and operators by reimbursing them for expenses related to cleaning up releases incurred on or after December 30, 2014, in response to releases that were discovered prior to December 30, 2014.

Funding:

Up to $36 million may be expended on Legacy Release Program which is funded through the Refined Petroleum Fund.

Uses of the Fund:

Money from the Fund may only be expended for eligible corrective actions taken on or after December 30, 2014. The maximum number of claims was received in August 2018 and no further claims will be accepted.

Eligibility:

An eligible person may be reimbursed for corrective action costs incurred if the eligible person demonstrates all of the following:

- The release from which the corrective action or indemnification arose was discovered and reported prior to December 30, 2014.
- The release upon which the request for reimbursement is based has not been closed pursuant to Part 213 prior to December 30, 2014.
- Any refined petroleum underground storage tank systems that are operating at the location from which the release occurred are currently in compliance with the registration requirements of Part 211.
- The request for reimbursement does not include reimbursement for money that was reimbursed from any other source, including insurance policies.
- The request for reimbursement is for corrective action performed on or after December 30, 2014.
- The amount approved for reimbursement shall be 50% of the aggregate indemnification and corrective action costs incurred, but not more than 50% of the reasonable and necessary eligible costs as determined by the administrator pursuant to section 21515(2) to (10).
- The total amount approved for reimbursement shall not exceed a total of $50,000.00 for all releases from refined petroleum underground storage tank systems at a single location.

Financial Summary:

Revenue	
Refined Petroleum Fund	$14,900,000
Total Revenue	$14,900,000
Expenditures	
Payments of Approved Claims	$11,095,092
Total Expenditures	$11,095,092
Fund Balance at End of FY 2019	$3,804,908

Sites Funded and Status:

Status of sites funded can be found in Appendix N.

SECTION EIGHT: PUBLIC HIGHWAY CLEANUPS

Background:

On October 26, 2017, Public Act 134 of 2017 amended Part 215, Underground Storage Tank Corrective Action Funding of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451) by adding Section 21506a(1)(f). The amendment became effective on January 24, 2018.

Purpose and Funding:

To provide reimbursement to local units of government and county road commissions for the costs of corrective actions taken to manage, relocate, or dispose of any media contaminated by release(s) from refined petroleum underground storage tank systems that has been left in place within a public highway pursuant to Section 21310a of Act 451.

Eligible work is reimbursed by Refined Petroleum Fund, established in Section 21506a of Act 451. The amount of reimbursement may not exceed $200,000 per claim.

Eligibility:

1. A claim must be filed by a local unit of government or county road commission.

PART FOUR – CLEAN MICHIGAN INITIATIVE BOND

SECTION ONE: CLEAN MICHIGAN INITIATIVE BOND FUND SUMMARY

Clean Michigan Initiative Bond of 1998 – Bond

In November 1998 Michigan citizens approved a $675 million Clean Michigan Initiative (CMI) Bond to be used for brownfield redevelopment and environmental cleanup: protecting and enhancing Michigan's lakes, rivers, and streams; reclaiming and revitalizing local waterfronts; making critical state park improvements; enhancing local parks and recreational opportunities; pollution prevention; and protecting the public from lead hazards. Part 196 of Act 451 provides for the specific use of these funds. The program expenditures addressed in this report include six MDEQ categories of the CMI: response activities at facilities; waterfront improvement; remediation of contaminated lake and river sediments; nonpoint source pollution control grants; clean water fund programs; and pollution prevention programs. The FY 2017 budget bill appropriated the remaining $14.9 million of CMI response activities authority to the Environmental Cleanup and Redevelopment Program. After this appropriation, the response activities category of the CMI Bond will be fully appropriated and allocated to sites.

SUMMARY OF CLEAN MICHIGAN INITIATIVE BOND FUND SALES
AS OF SEPTEMBER 30, 2019

Most of the funding for CMI Bond Fund projects is provided by the net proceeds from general obligation bonds sold by the Michigan Department of Treasury. There are approximately $37.6 million of authorized proceeds that remain available at this time. The department will work closely with Treasury to evaluate the annual level of spending to determine if a bond sale is needed to ensure that there are enough funds on hand to cover expenditures while still keeping administrative costs at a minimum. The following schedule details the sales that have occurred thus far:

NAME OF ISSUE	DATE	AMOUNT
CMI-1999 SERIES A	10/20/99	$66,814,126.26
CMI-1999 SERIES B	10/20/99	$15,133,105.32
CMI-2003 SERIES A	08/28/03	$141,233,172.18

SECTION TWO: WATERFRONT REDEVELOPMENT GRANTS PROGRAM

Purpose:

The Waterfront Redevelopment Grants Program (WRG) is administered by the RRD and governed by Part 196 and Part 795 of Act 451. Under this program, grants are awarded to local units of government to reclaim and revitalize waterfront property throughout the state, to maximize its economic and public value and provide waterfront access to the general public.

Site Selection:

Grants are approved by the Director of the Michigan Department of Environment, Great Lakes, and Energy based on eligibility criteria set forth in Part 196 and Part 795 of Act 451. Eligible projects must include provision to provide public access to the waterfront. Eligible activities include environmental response activities, demolition of buildings and facilities, property acquisition, and infrastructure and public facility improvements.

Program Funding:

The CMI legislation identified up to $50 million in bond funds available for the WRG. Funds allocated to projects subsequently cancelled, or returned from projects completed under budget, go back to the fund and are available for future WRG projects

To date, 72 grants have been awarded totaling $52.1 million and a total of $332 has lapsed. Awards exceed the $50 million appropriation, as excess funds were returned and awarded to new projects. In FY 2019, no new grants were awarded, as all funds for this program have been allocated.

SECTION THREE: MUNICIPAL LANDFILL COST-SHARE GRANT PROGRAM

Purpose:

The RRD administered the Municipal Landfill Cost-Share Grant Program (MLGP). The MLGP was designed to reimburse up to 50 percent of eligible response activity costs incurred by local units of government at municipal solid waste landfills listed on the Superfund National Priorities List (Superfund NPL) or nominated for listing by July 23, 1997.

Site Selection:

Grants were awarded through EGLE as approved by the Board pursuant to Section 9a of Part 201 of Act 451. The Board consisted of the Director of EGLE, the Director of DTMB, and the President of the MEDC.

Program Funding:

Appropriations totaling $18 million from the CRF, General Fund/General Purpose, and CMI Bond Fund were made available to fund the grant program from FY 1997 through FY 2002, with final expenditures incurred by FY 2005. The program had been funded annually pursuant to appropriations provided by the Legislature. Grant recipients were required to enter into a grant agreement prior to reimbursements. All $18 million that was appropriated for this program was awarded to and expended by local units of government.

Municipal Landfill Cost-Share Grant Program

	Net Appropriations	Grant Funds Awarded	Cumulative Expenditures 9/30/2019	Available Balance
Clean Michigan Initiative Bond Fund	$8,000,000	$8,000,000	$8,000,000	$0

SECTION FOUR: REMEDIATION OF CONTAMINATED LAKE AND RIVER SEDIMENTS

Purpose:

The Michigan Department of Environment, Great Lakes, and Energy (EGLE), Water Resources Division (WRD), is responsible for maintaining and improving the water quality of surface waters throughout the state. The WRD is responsible for the implementation of Part 31, Water Resources Protection, of Act 451. The WRD regulates discharges to lakes and streams by establishing water quality standards, assuring that water quality standards are met by issuing permits to control the discharge of wastewater to lakes and streams, investigating complaints, responding to accidental releases, and taking enforcement actions to assure that state and federal laws and rules are met.

The objective of the $25 million "remediation of contaminated lake and river sediments" element of the CMI Bond Fund is to remediate a substantial mass of bio accumulative toxins. A few examples of these toxins are polychlorinated biphenyls (PCBs), mercury, and dichlorodiphenyltrichloroethane (DDT), which are found in certain lakes and rivers. Once remediated, fish and wildlife consumption advisories may be eliminated or relaxed and adverse effects on aquatic life will be substantially reduced.

Site Selection:

Sites selected by the WRD are those that present the most significant risks to public health or the environment. On this basis, a total of eight sites were selected for further evaluation and remediation.

Program Funding:

In accordance with Section 19608(1)(c) of Part 196 of Act 451, in FY 1999, FY 2000, FY 2001, FY 2004, FY 2009, FY 2015, FY 2016, FY 2017, FY 2018, and FY2019 the WRD was appropriated $24.5 million in CMI Bond Funds for sediment assessment and removal activities at eight sites.

Remediation of Contaminated Lake and River Sediments Program

	Net Appropriations	Cumulative Expenditures 9/30/19	Reserved for Ongoing Projects
Clean Michigan Initiative Bond Fund	$24,460,930	$20,471,090	$3,989,840

Explanation of "Activity Status" Information in the Table in Appendix Q:

Complete: All remediation activities are complete.

Ongoing: State-funded cleanup activities are in progress.

Contact Person: Mr. Michael Alexander, Surface Water Assessment Section, WRD, EGLE; 517-449-7971; e-mail: AlexanderM2@Michigan.gov

SECTION FIVE: NONPOINT SOURCE POLLUTION CONTROL GRANTS

Purpose:

In accordance with Section 19607(d) of Part 196 of Act 451, the WRD provides grants to nonprofit entities or local units of government. Two categories of projects are eligible for grant awards: (1) implementation of physical structures as identified in approved watershed management plans; and (2) activities to reduce nonpoint source pollution from a specific pollutant source as identified by EGLE. These grants are implemented by the WRD under Part 88, Water Pollution Prevention and Monitoring, of Act 451, and the administrative rules.

Site Selection:

Projects are selected for funding based on criteria including: the anticipated water quality benefits of the project; resource commitments and support from affected stakeholders and partners; the expectation for long-term water quality protection and improvements; and the consistency of the project with Remedial Action Plans (RAPs) and other EGLE priorities. The total amount of grant dollars awarded each fiscal year, and the location of specific projects, will depend on the proposals received. A Request for Proposal (RFP) is made available contingent on the availability of grant funds.

Program Funding:

The CMI Bond Fund legislation identified up to $50 million in bond funds available for the Nonpoint Source Pollution Control grants. EGLE has been appropriated a total of $47,750,000 million for projects and, of this, $5,602,655 has lapsed. The first round of grants was awarded to 27 projects in the amount of $5.1 million. The second round of grants was awarded to 19 projects totaling $7.3 million. The third round of grants was awarded to 12 projects totaling $6.2 million. The fourth round of grants was awarded to 14 projects totaling $6 million.

In addition, returned/unobligated funds were made available to support the Cool Cities Initiative in March and June 2005 and four projects totaling $1.6 million were awarded. In September 2006 EGLE awarded $2.5 million to six projects. In August 2007 EGLE awarded four grants totaling $1,528,243. In April 2008 EGLE awarded two grants totaling $731,666. In July 2009 EGLE awarded four grants totaling $1,365,803. In August 2010 EGLE awarded three grants totaling $1,068,665. In July 2011 EGLE awarded one grant totaling $336,345. In June 2012 EGLE awarded two grants totaling $298,000. In June 2014 EGLE awarded four grants totaling $976,796. In May 2015 EGLE awarded three grants a total of $500,000. In May 2016 EGLE awarded five projects for a total of $2 million. In July 2017 EGLE awarded four projects for a total of $2 million. In July 2018 EGLE awarded four projects for a total of $2 million. In June 2019, EGLE awarded five projects for a total of $1,661,943.

Nonpoint Source Pollution Control Grants

	Net Appropriations	Cumulative Expenditures 9/30/19	Available Balance
Clean Michigan Initiative Bond Fund	$42,147,345	$37,132,761	$5,014,584

Explanation of "Activity Status" Information for the Table in Appendix R:

Cancelled: The grant award has been cancelled.

Complete: Grant activities are complete.

In Progress: Grant activities are in progress.

Undergoing Closeout: Conducting a final review prior to final payment.

Rejected: Award declined.

SECTION SIX: CLEAN WATER FUND PROGRAMS

INTRODUCTION

In accordance with Section 8807 of Part 88 of Act 451, the Clean Water Fund (CWF) was created to conduct activities as described in EGLE's document titled, "A Strategic Environmental Quality Monitoring Program for Michigan's Surface Waters," dated January 1997. The CWF is a $90 million component of the CMI Bond Fund. The CWF administrative rules identify nine categories of activities eligible to receive grant funds. Below is the summary of appropriations for the nine categories and the remainder of the list refers to the 11 different programs covered under the CWF:

- Program Summary Table
- RMD – Abandoned Well Management Grant Program (AWM) – Complete (See Program Elements Completed)
- WRD – Water Quality Monitoring (WQM)
- WRD – Voluntary Storm Water Permits Grants (VSPG)
- WRD – Failing On-Site Septic Systems (FOSS) – Complete (See Program Elements Completed)

WATER QUALITY MONITORING

Purpose:

Section 8807 of Part 88 of Act 451 states that the first priority of the CWF shall be to implement the "Strategic Environmental Quality Monitoring Program for Michigan's Surface Waters" (Monitoring Strategy). The WRD, in cooperation with the former Land and Water Management Division, produced this Monitoring Strategy. It provides the framework for a long-term, comprehensive water quality monitoring program to assess the current status of individual water bodies; measure spatial and temporal water quality trends; evaluate the effectiveness of water quality protection programs; and detect new and emerging water quality problems. The most recent updated for the strategy was written in 2017, as required by the U.S. Environmental Protection Agency. The WRD conducts monitoring activities in partnership with other state and federal agencies, as well as local entities, to leverage additional public and private resources.

Site Selection:

Sites are selected throughout Michigan to ensure that statewide monitoring data can be used to achieve the goals listed above. The WRD works with other federal, state, and local partners to select sites for the various components of the Monitoring Strategy.

Program Funding:

From 1998 through 2001, the Legislature appropriated $1 million from the GF for local water quality monitoring activities, for which $13,582 lapsed. From FY 2000 through FY 2019 over $43 million from the CMI Bond Fund was appropriated for water quality monitoring. The WRD has committed over $43 million for ongoing monitoring projects that will be awarded as money is appropriated.

VOLUNTARY STORM WATER PERMITS GRANTS

Purpose:

This program provides grants to municipalities to implement the EGLE-approved watershed management plans developed under a National Pollutant Discharge Elimination System and is a general wastewater discharge permit for storm water discharges from separate storm water drainage systems (i.e., the Individual Municipal Separate Storm Sewer System Storm Water Permit). This program is administered by the WRD and is authorized under Section 19607(e) of Part 196 of Act 451 and the administrative rules for the CWF. Eligible activities include water quality protection or improvement activities identified in the approved watershed management plan.

Site Selection:

Projects are selected for funding based on the following criteria: the anticipated water quality benefits of the project; resource commitments and support from affected stakeholders and partners; the expectation for long-term quality protection and improvements; and the consistency of the project with RAPs and other EGLE priorities. The total amount of grant dollars awarded each fiscal year, and the location of specific projects, will depend on the proposals received. A Grant Application Package (GAP) is made available contingent on the availability of grant funds.

Program Funding:

EGLE was appropriated approximately $3.4 million for this category from the CMI Bond Fund. EGLE issued GAPs in August 2000 and November 2001. In FY 2004 there were five projects awarded, in FY 2005 there were four projects, in FY 2006 there were three projects, and in FY 2007 there were seven projects. EGLE does not anticipate any additional appropriations for future rounds of funding in this category.

ILLICIT STORM SEWER CONNECTION GRANTS PROGRAM

Purpose:

Illicit connections are drains, sinks, and other pipes from buildings that have been inappropriately connected to storm sewer systems, rather than being connected to sanitary sewer pipes. Illicit connections result in the direct discharge of waste to lakes and streams without treatment. Under this program, local units of government and nonprofit entities will implement programs that identify and eliminate illicit connections. This program is administered by the WRD and is authorized under Section 19607(e) of Part 196 of Act 451 and the administrative rules.

Project Selection:

Projects are selected based on the following criteria: the anticipated water quality benefits of the project; resource commitments and support from affected stakeholders and partners; the expectation for long-term quality protection and improvements; and the consistency of the project with RAPs and other EGLE priorities. The total amount of grant dollars awarded each fiscal year, and the location of specific projects, will depend on the proposals received. A GAP is made available contingent on the availability of grant funds.

Program Funding:

EGLE was appropriated approximately $7.7 million for this category from the CMI Bond Fund. EGLE issued GAPs on August 2000 and November 2001. In FY 2001 there were 13 projects awarded, in FY 2004 there were 17 projects awarded, in FY 2005 there were ten projects awarded, in FY 2008 there was one grant awarded, and in FY 2009 there were an additional five grants awarded. EGLE does not anticipate any additional appropriations for future rounds of funding in this category.

WATER USE AND WITHDRAWAL PROGRAMS

Purpose:

In July 2008 amendments to Part 327, Great Lakes Preservation, of Act 451, took effect that required the development of a registration process for new large quantity water withdrawals and the continuation of reporting procedures with the Water Use and Withdrawal Programs (WUAWP). The amendments required the establishment of a statewide Web application for the regulated community to register proposed new large quantity withdrawals online. The Michigan Department of Environmental Quality (MDEQ) which became EGLE in 2019, entered into a joint funding agreement with the U.S. Geological Survey (USGS), with the approval of the MDTMB, to develop a bid document for the contracting of development and implementation of the online Web application. The project was completed by the July 2009 statutory implementation date and has continued in operation with the aid of ongoing maintenance and improvements to the Web application's user interface. A related project was also completed in FY 2012 to develop an online system to facilitate annual water use reporting required of new and pre-existing large quantity withdrawals. There is ongoing maintenance to the annual water use reporting database for EGLE's administrative purposes.

EGLE has a series of joint funding agreements with the USGS to provide stream-flow quantification (stream gages and miscellaneous stream-flow measurements) in support of the online Water Withdrawal Assessment Tool Another aspect of these joint funding agreements is monitoring groundwater temperatures and levels in a monitor well paired with the stream gage on the Prairie River at M-66 in Southwest Michigan. EGLE and USGS had a joint funding agreement in FY 2017-2018 to study stream flows, groundwater levels and temperatures, and streambed conductance in the Skunk Creek and Wolf Creek watersheds in Montcalm County and adjacent portions of Isabella and Missaukee Counties and to create a numerical model of the groundwater and surface water interactions in response to pumping high capacity wells in the shallow groundwater near these creeks.

Project Selection:

Part 327 specifies that the WUAWP would be a statewide project.

Program Funding:

The WUAWP was appropriated $250,000 from CMI Bond Funds in FY 2008, of which $42,100 lapsed. In FY 2009 through FY 2012 EGLE received an annual appropriation of $325,000 to develop an online registration and reporting program. In both FY 2017 and FY 2018 EGLE received an annual appropriation of $800,000. EGLE received work project authorization for the balance of the Fiscal Year 2017 funding and continues to spend down that balance.

RETIRED ENGINEER TECHNICAL ASSISTANCE PROGRAM FUND

Purpose:

The Retired Engineer Technical Assistance Program (RETAP) is authorized under Part 145, Waste Reduction Assistance, of Act 451. The legislation authorizes RETAP to provide Michigan businesses and industry with on-site pollution prevention (P2) technical assistance. In FY 2015, the RETAP program and fund was transferred to LARA's Michigan Agency for Energy in Executive Order No. 2015-10. In FY 2019, the RETAP program and fund was transferred to EGLE's Office of Climate and Energy in Executive Order No. 2019-06.

Under RETAP, small manufacturers with 500 or fewer employees (worldwide) receive a free confidential assessment of their P2 opportunities to improve process efficiency, eliminate waste generation, reduce energy usage, and lower waste management costs. Additional specific/focused P2 and energy efficiency technical assistance is provided on request to small manufacturers having previously undergone a RETAP assessment.

Program Funding:

The CMI Bond Fund included an allocation of $10 million to capitalize an endowment fund to operate the RETAP. The endowment was capitalized in the FY 1999 supplemental appropriation. For FY 2019, appropriations of $503,200 were authorized from the endowment fund (i.e., RETAP Fund).

Retired Engineer Technical Assistance Program Fund

	Appropriations	Cumulative Expenditures 9/30/18	Reserved for Ongoing Projects
Clean Michigan Initiative Bond Fund	$10,000,000	$10,000,000	$0

Explanation of Status Information:

Insufficient funds remain in the endowment fund to operate the RETAP in-line with technical assistance services annually provided by the program since 1999. The continued operation of the RETAP at a meaningful level requires additional funding resources beyond the existing endowment. In FY 2019, the RETAP explored options to pursue additional funding and to realign services and overall program structure in-line with the limited funds anticipated to operate the program in future years. RETAP services were temporarily suspended while pursuing these activities to assure the program can successfully return to continued operation and delivery of legally mandated services.

SMALL BUSINESS POLLUTION PREVENTION ASSISTANCE REVOLVING LOAN FUND

Purpose:

The Small Business Pollution Prevention (SBPP) is administered by EGLE, Sustainable Development Unit (SDU), and is authorized under Part 145 of Act 451. The legislation authorizes EGLE to offer pollution prevention (P2) loans of up to $200,000 at an interest rate of five percent or less to independently owned, small businesses that employ 500 or fewer individuals. Qualifying loans must be used to implement projects that meet the criteria for P2, which includes but is not limited to source reduction, reuse, or recycling. Companies may independently identify a P2 project proposal or submit a proposal based on P2 recommendations from their Retired Engineer Technical Assistance Program (RETAP) audit.

Program Funding:

The CMI Bond Fund provides for a one-time expenditure of $5 million to capitalize the SBPP. The FY 1999 supplemental appropriation capitalized the $5 million fund and allocated this appropriation to make loans available under the program. The fund has “carry forward” status, allowing loans to be made in successive fiscal years. The program, as designed, doubles the funding availability through a requirement that lending institutions participate 50/50 in the P2 loans. This raises the maximum loan amount under the program to $400,000 and doubles the loan pool to $10 million. As loans are repaid, the EGLE portion of the repayment returns to the loan fund to be used for future loans.

Small Business Pollution Prevention Assistance Revolving Loan Fund

	Appropriations	Cumulative Expenditures 9/30/17	Reserved for Ongoing Projects
Clean Michigan Initiative Bond Fund	$5,000,000	$5,000,000	$0

Explanation of Status Information:

By the end of FY 2019, 70 loans totaling $6,865,536.23 (including $3,432,768.12 from SBPP) have been funded since inception of the program. No loans were awarded in FY 2019. Public awareness strategies consisting of providing articles to trade periodicals and local economic development corporation newsletters, direct mailing, literature distribution through workshops and conferences, and maintaining a program specific website are continuing.

GREEN CHEMISTRY SUPPORT PROGRAM

Purpose:

The Green Chemistry Support Program (GCSP) is administered by the P2SU and is authorized under Executive Directive No. 2006-6: "Promotion of Green Chemistry for Sustainable Economic Development and Protection of Public Health." The directive established a GCSP with the State of Michigan. Its goal is to advance research, development, and implementation of green chemistry technologies and practices in Michigan. Funding has been used for technology demonstration projects, green chemistry research, technology transfer, education outreach, and public forums.

Program Funding:

The CMI Bond Fund set aside $10 million for pollution prevention, of which $1 million remained. EGLE requested and received a supplemental appropriation for the balance in FY 2007 to promote and encourage the adoption of green chemistry practices and technologies. Funds returned from projects completed under budget went back into the Fund and were made available for future green chemistry projects. The following appropriation lapses have occurred: $309 in FY 2011, $51,095 in FY 2012, and $13,632 in FY 2015.

Green Chemistry Support Program

	Net Appropriations	Cumulative Expenditures 9/30/17	Reserved for Ongoing Projects	Available Balance
Clean Michigan Initiative Bond Fund	$934,964	$934,964	$0	$0

Explanation of "Activity Status" Information for the Table in Appendix V:

In FY 2019 no new contracts were issued. All other grants issued with a focus on green chemistry were completed by FY 2015.

Completed: Several grant activities have been completed and closed.

In Progress: No grant projects are in progress.

PART FIVE – GLOSSARY

The Appendices provide information on projects funded by each program. The information provided is required in the reporting requirements identified in the introduction. The following describes the columns contained in the reports in Part Six – Appendices for Program Site Listings.

BASIC SITE INFORMATION

SITE NAME/PROJECT NAME: Common name for the site.

COUNTY: County in which the site is located.

SITE ID#/Tracking Code: Site identification number.

OVERALL STATUS: This is described in the program summaries.

ESTIMATED CLOSURE DATE/ESTIMATED DATE OF COMPLETION: The date the site is estimated to be closed. This may include one or more activities.

PROJECT PERIOD: The time frame in which activities are to be conducted.

STAGE OF CONTRACT: This describes the stage in which the contract is being implemented.

REDEVELOPMENT: Since Appropriation Year 1997, EGLE has been identifying sites that have redevelopment potential. An "X" in the column indicates that the site is anticipated to be redeveloped.

ACUTE: An "X" in the column indicates that there exists an imminent and substantial endangerment to public health, safety, welfare, or the environment because of a release or threatened release.

GRANT/CONTRACT RECIPIENT: The entity receiving the grant to conduct the work.

FUNDING INFORMATION

PROPOSED AMOUNT/AWARD AMOUNT/GRANT AWARD: The estimated cost of the activity when it was initially proposed for funding. For the $0 appropriation, funds were expected to be transferred from savings at other sites to conduct the response action, if a liable party was not identified.

MATCH AMOUNT: These are funds provided to the project from an agency outside of the state of Michigan. Some of the programs described in this report depend on receiving matching funds in order to implement the project.

CUMULATIVE LOANS DISBURSED/CUMULATIVE EXPENDITURES 9/30/2016: The amount of funds expended at the site through FY 2016.

RESPONSE ACTIONS

ACTIVITY TYPE: Type of response action approved for cleanup funds, as follows:

ADM: Administration – These are administration costs.

AW: Alternate Water – Alternate water actions include the replacement of individual or municipal contaminated water supplies.

BEA: Baseline Environmental Assessment – To determine contamination at the site.

DEMO: Demolition – Buildings being removed in order to promote redevelopment.

Due Care: Cleanup activities must meet requirements to protect public health and the environment.

IR: Interim Response – Initial cleanup actions, such as removal of drums and contaminated soil.

OM: Operation and Maintenance – Actions to operate or maintain remediation systems, including ongoing monitoring.

RA: Remedial Action – Final cleanup actions, such as construction of groundwater or soil treatment systems.

RD: Remedial Design – This is the design phase to determine the course of action to mitigate the contamination.

RI: Remedial Investigation – Delineation of the types and/or extent of contamination at a site to determine needed cleanup actions.

RI/FS: Remedial Investigation/Feasibility Study – Assessment and delineation extent of contamination at a site to determine needed cleanup actions.

RS: Response Actions – Cleanup activities needed to secure, remove, and/or treat contaminants to address an acute public health or environmental problem and/or to promote redevelopment of a contaminated site. Response activities include site fencing; source removal; the design, construction, and operation of groundwater and/or soil treatment systems; and demolition.

SA: Site Assessment – Assessment and delineation extent of contamination at a site to determine needed cleanup actions.

SF: Superfund – Cleanup activities undertaken by EGLE, RRD, Superfund Section, using both state and federal funds.

ACTIVITY STATUS: Status of the specified activity listed.

DEVELOPMENT TYPE: Describes what the property will be used for once actions are complete.

COMMENTS: Describes the problem that will be resolved and other pertinent information.

REPORTING REQUIREMENTS

This report fulfills a number of reporting obligations found in annual appropriation bills and related reporting obligations found in Parts 195, 196, and 201 of Act 451. The reporting requirements covered by this report are more fully described below.

Village of Douglas Contamination	Allegan	03000032	In Progress	12/31/2020	$1,001,943	$889,953	$86,402	$976,355	Contamination is present in soil and in groundwater that discharges to Wicks Creek at concentrations in excess of groundwater surface water interface criteria. Continued operation of existing treatment system and construction of new treatment system will eliminate contaminants from migrating into groundwater and Wicks Creek. The liable party no longer exists. There is an existing sanitary sewer. These actions will maximize risk reduction to groundwater and surface water and facilitate the property owner's plans to develop residential housing.
Wayland Recycling	Allegan	03000237	In Progress	3/31/2026	$3,564,827	$1,981,223	$8,604	$1,989,827	The site is located at 763 Elm Street in the city of Wayland, approximately a half-mile from the Rabbit River. The area around the site is used for residential, commercial, and industrial purposes. The area is served by municipal water. Contaminated groundwater may be discharging into a storm sewer, which discharges into the Rabbit River approximately 1/2 mile away. Soil and groundwater contamination remain at the site at concentrations exceeding several of the generic cleanup criteria (drinking water, groundwater surface water interface, direct contact, soil volatilization to indoor air).
Wessel Road Quarry	Alpena	04000127	In Progress	2/28/2037	$1,095,000	$690,905	$1,321	$692,226	Contaminated groundwater from cement kiln dust (CKD) with levels of heavy metals such as arsenic, lead, mercury and zinc. Install groundwater interception trench to Newton Creek including oversight and one-year operation and maintenance to prevent discharge from Newton Creek into Thunder Bay, Lake Huron.
Former Werth Dry Cleaners	Alpena	04000142	In Progress	5/1/2024	$200,000	$196,005	$0	$196,005	Remedial investigation to refine soil excavation limits, groundwater investigation. The Thunder Bay River and Lake Besser are within 1,000 feet of the site.
Alpena Hide and Leather	Alpena	04000162	In Progress	9/30/2022	$2,770,000	$1,825,098	$7,457	$1,832,555	Contaminated soil and groundwater exceeds above drinking water criteria. The site is located in the City of Alpena approximately 300 feet from the shore of the Thunder Bay River. The site is over ten acres in size. The site is made up of numerous parcels of property. The site has active youth soccer fields, a former school now used as a residential treatment facility for adults with chemical dependency, a bingo hall, and a brewery with a restaurant. All of the properties are on municipal water.
38/39 State Street	Barry	08000112	In Progress	12/28/2018	$30,286	$30,286	$0	$30,286	Contaminated ground water exceeds drinking water criteria. Several individual water supply wells exist in the potential downgradient direction from the facility and contaminants in the groundwater represent a threat to the adjacent Thornapple River.
Saginaw Bay Industries	Bay	09000181	In Progress	9/29/2018	$1,120,000	$947,529	$0	$947,529	Highly impacted source soil will be removed to eliminate the continual threat of contaminated groundwater discharging to the nearby Saginaw River via the Groundwater/Surface Water (GSI) pathway
Harbor Plating	Berrien	11000075	OM	9/30/2038	$2,488,268	$1,659,640	$103,273	$1,762,913	Soil contamination covering a large area is leaching contaminants to groundwater and is venting to Ox Creek and its tributaries at concentrations exceeding cleanup criteria. Removal of soil contamination and continued operation of the groundwater treatment system will prevent contaminants from venting to Ox Creek. Liable property owner/operator is deceased and the property tax reverted to the city of Benton Harbor. A public sewer line is on-site. Operation of the groundwater treatment system will reduce the amount of hexavalent chromium and solvents contaminating off-site groundwater and help prevent the discharge of these contaminants to Ox Creek, the Paw Paw River, and Lake Michigan. Intercepting the contaminated groundwater is the most economical way to reduce the risk to area surface waters. Reducing this risk is essential to the city of Benton Harbor's long-term goal of improving the water quality in Ox Creek as part of the city's ongoing economic
Verona Well Field	Calhoun	13000006	OM	9/30/2026	$2,352,645	$327,282	$21,026	$348,308	Groundwater that is contaminated above drinking water standards threatens the municipal well field. A groundwater restoration remedy is in operation to ensure safe drinking water for the municipal water supply. Liable party is bankrupt. The sanitary sewer system is maintained by the city of Battle Creek. The AS/SVE system treats the contaminated soils and groundwater, thereby improving the groundwater quality, reducing risk, and eventually returning the aquifer back to drinkable quality.
Brooks Foundry	Calhoun	13000073	In Progress	2/28/2022	$395,000	$0	$504	$504	The State of Michigan acquired the property through tax reversion in 1991.

Marshall Iron & Metal	Calhoun	13000274	In Progress	12/31/2020	$1,525,000	$547,463	$29,737	$577,200	Soil removal and disposal remedy. Excavation in late 2015 identified that the extent of LNAPL-contaminated soils was more extensive on the source property than previous investigations indicated, and also extended further south onto the Marshall Wastewater Treatment plant property. The site is situated in an industrial area adjacent to the City of Marshall Waste Water Treatment Plant and 650 feet north of the Kalamazoo River. A mixed residential/commercial neighborhood is located on adjacent properties north of the site. The area is served by municipal water.
DME Company	Charlevoix	15000010	In Progress	6/30/2020	$992,283	$888,371	$79,929	$968,300	Contaminants exceeding groundwater surface water interface criteria are entering Lake Charlevoix and Stover Creek. Addressing the source areas of contamination will eliminate the groundwater surface water interface exceedances affecting Lake Charlevoix and Stover Creek. The liable party declared bankruptcy in 2009. The facility is served by the city of Charlevoix's public sewer system. Progress is being made on meeting risk reduction objectives but the objectives have not been completely attained.
Cheboygan MGP	Cheboygan	16000119	Closed/Monitoring	6/30/2021	$320,000	$179,706	$19,882	$199,588	Laboratory analytical results from the sediment samples collected from the Cheboygan River at 12 feet below the river bottom in 2002 had benzo(a)pyrene detections exceeding the Part 201 Direct Contact Criteria. Other PNAs and some metals were also detected in the three sediment samples collected in the river adjacent to the property. Remedial Investigation found soil contamination exceeding direct contact and groundwater/surface water interface criteria.
Gladstone Creosote Discharge	Delta	21000110	In Progress	9/30/2022	$402,943	$341,735	$39,995	$381,730	Operation of a groundwater/petroleum product collection system prevents discharge of contaminants into Lake Michigan above groundwater surface water interface criteria. The liable party filed for bankruptcy and was dissolved in 1981. The city of Gladstone's sanitary sewer line services the area. Operation of the collection and treatment system has minimized the amount of contaminated groundwater discharging to Lake Michigan through treatment of the captured groundwater prior to discharge. The system would also capture migrating NAPL that may be present gradient of the capture zone. These actions demonstrate progress toward maximizing risk reduction. There were no economic development objectives
916 S Main	Eaton	23000149	In Progress	12/16/2022	$827,219	$374,116	$35,446	$409,562	Contaminants in the groundwater exceed groundwater surface water interface criteria and are entering the storm sewer system which empty into the Grand River. Planned activities would address the contaminants in the groundwater that are intercepting the storm sewer system. The current owner/operator is not liable for the historic releases and previous dry cleaner owner/operators are deceased. The city of Eaton Rapids maintains a sanitary sewer in the area. These actions are necessary to reduce mass of contaminant loading entering city of Eaton Rapids storm water system by treatment of the chlorinated solvent groundwater "hot spot." The funded activities maximize risk reduction in the area and assist with the redevelopment of the property.
Little Traverse Bay CKD Release Site	Emmet	24000060	PLP	TBD	$83,360	$64,811	$18,549	$83,360	Contamination from mercury and other metals discharge to Lake Michigan above groundwater surface water interface criteria. The State is overseeing and monitoring response actions installed and operated by Consumers Energy (CMS) pursuant to an U.S. EPA Administrative Order. The liable party filed for bankruptcy in 1980. Wastewater treatment services are provided by Bay Harbor. Currently work is being funded by CMS as stipulated in the settlement agreement.

Groundwater concentrations were found in excess of drinking water protection and groundwater surface water interface protection. Residential homes with private drinking water supplies are located 500 feet down gradient of the source and Grand Traverse East Bay is 700 feet down gradient.

Liable parties are bankrupt. The sanitary sewer is operated by the city of St. Louis. Actions at this site will reduce risks to surface water and
Velsicol Burn Pit	Gratiot	29000147	In Progress	6/24/2046	$440,000	$30,826	$11,815	$42,641	The Velsicol Burn Pit covers five acres within the east side of the Hidden Oaks Golf Course on Monroe Road in St. Louis, Gratiot County, Michigan. The Velsicol Burn Pit site was created by the disposal of solid and liquid waste from the Velsicol Chemical Corporation which is a separate National Priorities List (NPL) site known as the Velsicol Chemical Corporation Superfund site. The Velsicol Burn Pit is adjacent to Operable Unit 2, the Pine River, and across the river from Operable Unit 1, the former Velsicol Chemical Corporation manufacturing plant site of the Velsicol Chemical Superfund site. The nearest residence to the site is less than 50 feet away.

An investigation of contaminated groundwater, sediment, and surface water will be conducted to determine actions needed to protect public health and the environment. Liable parties are bankrupt. A sanitary sewer system services the site. Ongoing efforts are preventing contaminants from entering Torch Lake and continue to demonstrate progress toward risk reduction to human health and ecological
Abandoned Mining Wastes, Torch Lake	Houghton	31000098	In Progress	6/1/2029	$3,330,000	$1,951,044	$321,092	$2,272,136	In August 2013, EGLE's Remediation and Redevelopment Division determined that additional investigation and response actions were necessary, especially related to the significant concentrations of PCBs in Torch Lake water, the presence of uninvestigated abandoned containers on the lake bottom, and other unaddressed wastes (USTs, asbestos, etc.) in the industrial ruins.
Sebewaing Industries	Huron	32000007	In Progress	8/28/2020	$1,295,000	$403,300	$12,687	$415,987	The remedial investigation showed that there are concentrations of VOCs and metals located off-site and migrating towards the Sebewaing River. Between the source area and the river, there are two residential homes. In 2014, during investigations of oil sheen on the river, it was found that the storm sewers from the plant area were contributing to the oil sheen on the Sebewaing River. The village of Sebewaing provides municipal water to the property and there currently are not any drinking water wells located on the property.
Main St. 115 E Sebewaing	Huron	32000114	In Progress	9/30/2020	$990,000	$317,836	$12,816	$330,652	Remedial Investigation to determine the extent of highly contaminated soil and/or groundwater migrating into the Sebewaing River will be performed. It is probable that excavation of highly contaminated soil will be performed to minimize groundwater contamination. By initiating this project, the state will undertake actions that will demonstrate progress toward maximizing risk reduction and economic development.
Americhem	Ingham	33000492	OM	12/30/2038	$5,221,429	$5,591,937	$83,074	$5,675,011	The contaminated groundwater plume is venting to Sycamore Creek at multiple locations and impacts potable water. Continued operation and enhancement of free petroleum product recovery and groundwater treatment systems will continue to improve water quality. Cost recovery actions have determined that the liable party does not have sufficient financial resources to conduct remedial actions. The facility is serviced by the city of Mason's sanitary sewer system. Decreasing groundwater impacts represent progress being made toward risk reduction.

Groundwater treatment and monitoring will be conducted to address the impacted groundwater discharging into the lake. Enforcement actions have resulted in settlements with liable parties. Sanitary sewers are present in the area. The following steps have been or are being taken by the state that demonstrate progress toward maximizing risk reduction and economic development: In-situ injection treatments have been completed to help remediate the groundwater. Treatments were completed to reduce the concentrations of contaminants entering Lake Huron.
Buck Mine Discharge	Iron	36000009	OM	9/30/2122	$444,860	$426,963	$4,425	$431,388	The existing treatment system is being maintained to ensure contaminants are not discharging to the Iron River above criteria. The liable parties no longer exist. The village of Caspian, the village of Gaastra, and the city of Iron River have a joint sewer system adjacent to the facility. Ongoing efforts are preventing contaminants from entering the river and continue to demonstrate progress toward risk reduction to human health and ecological receptors.
Spring Arbor Wash-N-Dry	Jackson	38000030	Complete	4/30/2015	$882,680	$856,077	$26,603	$882,680	Contaminated soil is leaching to groundwater and threatens residential wells. The contaminated soil will be removed to protect public health and the environment. A viable liable party has not been identified. Spring Arbor Township maintains a sewer system in the area. Ongoing efforts are preventing contaminants from entering the groundwater to demonstrate progress toward risk reduction to human health.
North 34th St Area Richland	Kalamazoo	39000030	In Progress	12/31/2030	$3,780,497	$2,776,607	$27,400	$2,804,007	Removal of contaminated source material and continued operation of existing groundwater treatment system will ensure contaminated groundwater does not migrate to wetland. Litigation actions adjudicated liability for liable party, who subsequently dissolved in bankruptcy. The facility is serviced by the city of Kalamazoo wastewater treatment plant. Completion of remedial design for the site-wide remedy is a significant phase of work demonstrating progress toward maximizing risk reduction and economic development objectives identified for

The liable party entity is no longer in existence. The facility is serviced by the city of Kalamazoo's sanitary sewer system. Remedial actions have not been initiated to reduce risk to receptors.
Performance Paper Inc.	Kalamazoo	39000140	In Progress	12/31/2023	$4,160,685	$3,509,333	$0	$3,509,333	Metals and semi-volatile organic compounds above residential direct contact criteria were present in adjacent upland areas. Metals and volatile organic compounds were also present at levels that pose a risk to the surface water. The Performance Paper site (Performance) is located in the city of Kalamazoo (City). Land use adjacent to the property is residential, commercial, and light industrial. The area is served by municipal water. Portage Creek (Creek) splits the property and flows from south to north. The Alcott Street Dam at one time formed the former Bryant Mill Pond on Portage Creek, located immediately south of Alcott Street.
Nolichucky Industrial Corp	Kalamazoo	39000450	In Progress	5/31/2020	$1,190,000	$860,686	$12,952	$873,638	VOCs remain in the soil in excess of soil saturation concentration screening levels and drinking water protection, groundwater surface water interface protection, groundwater contact protection, volatization to indoor air, and direct contact criteria. Metals, semi-volatile organic compounds, and PCBs also remain in soil in excess of direct contact, drinking water protection, or groundwater surface water interface protection criteria. Groundwater at the site exceeds drinking water and groundwater surface water interface criteria for VOCs and metals. Kalamazoo Township has identified the Nolichucky Site, as well as the adjoining Georgia Pacific Mill Site, as high-priority redevelopment sites. The work being conducted by EGLE will assist the township in future marketing of the area for brownfield redevelopment opportunities.
Paris Cleaners	Kalamazoo	39000505	In Progress	12/31/2019	$210,000	$174,202	$6,264	$180,466	The property is located south of downtown Kalamazoo, on the northwest corner of Westnedge Avenue and Crosstown Parkway. The property is immediately adjacent to Axtell Creek and within 600 feet of the city of Kalamazoo's Well Field #7. The area is a mixture of commercial and residential properties and is served by municipal

Partial demolition of the building will be conducted to address the groundwater contamination. The liable party has filed for bankruptcy and has settled its environmental liability with the State. Sanitary sewers service the facility. Funding been utilized to maximize risk reduction and achieve economic development objectives by removing contaminated source area soils at the facility and reduce contaminant loading to groundwater.
413 Hall Street SE	Kent	41001121	In Progress	9/30/2023	$395,000	$213,772	$0	$213,772	Groundwater and Soil contamination exceeds drinking water protection criteria. Site is located in an urban area of Grand Rapids with a mix of residential and commercial properties all served by a municipal water supply. The Grand River is approximately 3 miles away.

Residential wells are at risk if the groundwater treatment system is not operated. The liable party does not have financial resources to conduct remedial actions. The city of Brighton manages the storm water and sanitary sewer system within the area. Actions in progress continue improving water quality of Leith Lake by intercepting and treating most of the groundwater contamination plume to NPDES permit requirements. Contaminant mass reduction is documented over most of the groundwater contamination plume.
Main Street - Gregory	Livingston	47000099	OM	12/31/2022	$614,510	$521,163	$26,697	$547,860	Continued operation of the groundwater treatment system will prevent contaminants from venting to a county drain at concentrations exceeding groundwater surface water criteria and protects drinking water in the area. The liable party does not have financial resources to conduct remedial actions. The town of Gregory operates a sewer system within the area. Actions in progress reduce risk to the surface water by intercepting and reducing the mass of contaminated groundwater plume venting and under flowing the county drain, thus improving surface water quality and reducing risk to nearby residential wells.
Marcy's Cleaners	Livingston	47000197	In Progress	5/1/2023	$531,209	$302,711	$36,288	$338,999	Groundwater contaminants exceeding drinking water and groundwater surface water interface criteria are entering the storm sewer system. Soil removal and groundwater treatment will abate contaminants and prevent them from entering the storm sewer. The liable party does not have financial resources to conduct remedial actions. The site is within the city limits of Howell, which manages a sanitary and storm water system. Actions being undertaken improve water quality and prevent pollution by reducing the impact of contamination on the storm sewer.

The liable party is deceased. The village of Milford maintains the sanitary sewer collection system in the area. Through the ongoing treatment of groundwater, EGLE has achieved improved groundwater quality and protected the village of Milford municipal wells.
Osceola Refinery (former)	Osceola	67000076	Closed/Monitoring	5/30/2021	$907,741	$867,392	$22,664	$890,056	Soil and groundwater contamination above applicable criteria is discharging to the Hersey River. The response activities being implemented will reduce the amount of petroleum in the soil and the groundwater. The liable party is dissolved. The site is within the sewer planning area of Reed City. The remedial actions have resulted in significant risk reduction in soil contamination and groundwater contamination which had inhibited future development of the area. Also, the remediation of the groundwater has eliminated the discharge of contaminated groundwater to surface

The Du Wel Metal Products facility is a 7.9-acre property located in the city of Hartford (City), Van Buren County, and includes much of the City in an area of residential, commercial, industrial, and agricultural land uses. A tributary to the Paw Paw River is immediately to the west of the site. The City has a municipal water supply that serves a finite number of residents. There are private drinking water wells remaining in the study area that are potentially at risk.
Belgravia (Factory Condominium)	Van Buren	80000010	In Progress	6/30/2020	$6,089,021	$6,755,456	$44,866	$6,800,322	The soil, soil gas, DNAPL, and groundwater contaminant levels that remain represent a significant source area that continues to be a threat to indoor air quality, at the condominiums and the private residences, and long term groundwater quality in the area. Groundwater monitoring and DNAPL gauging conducted in 2011 and 2012, indicated DNAPL is rebounding in selected wells since the recovery system was turned off in fall 2010, that the plume had encroached on the building footprints of both of the two private residences located immediately downgradient of the site, and that DNAPL in soil and the contaminated groundwater would continue to migrate. The site is located in the city of South Haven (City), approximately two blocks from Lake Michigan. It is surrounded by a residential community to the north and west, and an old industrial area to the east and south, now in transition to high-density residential and commercial use. The area is served by a municipal water supply.
