State Boundary Commission:

This letter is in regards to docket 15-AP-03. A development group has petitioned you to forcefully take land from Lapeer Township and place it in The City Of Lapeer. I'm sure you know that the city signed an agreement a few years ago with the township not to too annex any more land from the township for a time period of, I believe, 25 years. It appears that the city is trying to live up to their agreement but this development group is trying a end run by petitioning the State Boundary Commission. There is plenty of vacant property in the city that would work for their proposed buildings. But this is probably their the least expensive option.

This development group really doesn't care if they ruin a residential neighbor or create congestion on our roads. If they did they would choose from one of the many properties that already exist in the city for this exact use. There is large parcel just down the road, SE corner of Turill and Lapeer Rd., from their preposed site. Across I69 is a huge area, SW corner of I69 and Lapeer Rd., that would work very well and would not increase traffic on residential roads. But again they don't care because they don't live here. I do and I care. Please don't let this happen.

Sincerely,

Dean Allamnd
