Hi Amy,

You are not bugging me! And, it's my fault, because I can't type☺ Olive Township should be 417, rather than 416 or 418.

Please don't hesitate if you have any other questions.

Thank you,

Deb

Deb Sutherland | Chief Deputy Clerk/Register of Deeds | Clinton County

I hate to keep bugging you. Olive Township original number is 416 but now you have added 2, so that would add a total of 6 ballots, not 5.

Hi Amy,

The following jurisdictions had additional turnout counts:

- Olive Township - 418
- Riley Township - 339
- Victor Township - 776
- Watertown Township, Pct. 2 - 395
- Westphalia Township - 304

And, you are correct that no candidate totals changed.

Let me know if you have any other questions.

Thanks,

Deb

Hi Amy,

I am working in another office right now, but I will check when I am back in the Clerk's Office. I believe that the correct Poll Book Total should be 11,160 and can confirm which precincts have additions when I have access to the records.

Thanks,

Deb

Also, since the ballots cast on the precinct reports have 11,155 and those vote totals match what you have reported for the candidates, it would seem adding 5 more ballots cast, but not changing the vote totals for any candidate would say that those 5 voters vote was not counted either?

Deb,

We would need to know which precincts these 5 ballots were added to.

Subject: FW: Poll Book Total/ Voter Turn out

Hi Amy,

Diane is out of the office, so she forwarded this message to me.

Our canvassers changed the Poll Book Total to 11,160, as this was the correct total. The total of 11,155, as originally reported, does not include "Ballots Not Counted", which should be included in our Poll Book Total. This is how our software vendor has explained the "Ballots Not Counted" to us:

"In the case of a not counted ballot, the ballot has an error, the error was over ridden. The override capability should be turned of when the system is coded. The override functionality should only be for blank and over voted ballots. All other errors should be turned off in the coding/machine. Over voted and blank ballots are always shown as counted.

It is possible the ballot was overridden when the machine should have disallowed it. A defective or misread ballot should not be allowed to be cast, but it does happen sometimes with the machines. Miss feeding a ballot (running slightly askew) can cause this not counted issue to occur.

It is possible a wrong precinct, wrong number or arrows, start bar detect etc. security header mismatch could be the culprit of what was overridden, that would not have counted but incremented the public counter."

Please let me know if you have any other questions.

Deb

> Hi Diane,
>
> On the Official County Vote Total report you have submitted to the Bureau of Elections, the Poll Book Total is reported as 11,160. However on the Prec by Prec results it shows this number should be 11,155. You have included a Turnout Report that has the 11,160 number but it looks like this may have been generated on election day and my not be the correct number. I also looked at your official results you have posted to the website and it reports voter turn out as 11,155. Can you please verify the correct number?
