General Provisions of Sale

Pricing

All prices in U.S. dollars. Prices and specifications are subject to change without notice. All prices are F.O.B. Alamo Industrial® Shipping Points (which are listed on each price page under the product name).

Guards

For Commercial/Industrial Use, OSHA, SAE, and ANSI standards require the use of Chain Guards, Deflectors, or Solid Skirts/Bands at all times. Alamo Industrial strongly recommends the use of one of these guarding systems for agricultural purposes as well when there are persons, animals, roadways, or structures within 100 yards of the mowing operation.

Mount Kits

For proper fit of the axle-mounted boom rests, the rear tires must be spread to a distance of 32" from the center line of the tractor to inside of the tire. In addition, Alamo Industrial is not responsible for improper fitting for mount kit where tractors are changed by the Manufacturers or by special or unusual tractor options mounted to the tractors. In such cases the Dealer is responsible for the modifications for proper application and fit.

OTHER SPECIFICATIONS

1) Tractors should not be ordered with mid-mount loader valves as they may interfere with the subframe structure.
2) New Holland TL-A models require a smaller replacement battery. We recommend Exide #34R-84N (Alamo #02982767).
3) The John Deere 5105/5205 will require a modification to the front bolster for proper driveline clearance.

THE SAFETY CURRICULUM

TRAIN THE OPERATOR PROGRAM

Conducted at your location

It's one thing to teach safety. It's another to make sure it has been learned. The Cutting Edge Safety Program measures the quality of what is learned through pre- and post-course testing. In only one day, your operators will receive both classroom and hands-on instruction.

All training is done by both an OSHA authorized and National Association of Safety Professionals (NASP) certified Safety Training/Planning Specialist.

PARTICIPANT EXTRAS

Every participant will receive a complete course safety package including a workbook along with safety work gloves, safety glasses, and safety ball caps, all ordered to your area specifications.
