This 2004 Uniform Crime Report is the 46th annual report on crime in Michigan prepared pursuant to PA 319 of 1968, as amended.

The Department of State Police appreciates the cooperation and support of all the police departments, sheriffs' offices, and specialized law enforcement agencies that provide offense and arrest data for this report. Statewide in 2004, 82% of all law enforcement agencies submitted complete data.

UCR data has been published in the past using only actual figures. Since the 1999 report, state totals are now calculated by combining actual figures with estimates of missing data. This estimation process has been adapted from that used by the FBI (see Appendix C). The estimation will help to ensure an accurate portrayal of crime trends and minimize fluctuations due to reporting discrepancies.

This report includes Michigan Incident Crime Reporting (MICR) data. This year's crime data was submitted to the UCR program through the MICR system by 98% of Michigan law enforcement agencies. The MICR data provides much more detail than the traditional summary UCR system. MICR data cannot currently be used to provide a picture of crime statewide; it is, however, an excellent tool for examining crime trends within areas where the system is used. 2004 was the last year that the UCR section was collecting summary data. Beginning in 2005, Michigan will only be collecting MICR data from all law enforcement agencies.

This report, when analyzed, can significantly contribute to management and planning activities at local, state, and federal levels, especially by state officials, the law enforcement community, the Legislature, and nonprofit organizations.

## PUBLIC ACT 319 of 1968, (as amended)

### 28.251 Uniform crime reports; duties of police departments to file; contents.

Sec. 1. The police department of each city or village, any duly constituted police department of a township, and the sheriff's department of each county, once each month upon a date and form prescribed and furnished by the director of the department of state police, shall forward to the department of state police a crime report. Each reporting department shall report only on cases within its jurisdiction and upon which it is making, or has made, the primary police investigation. The report shall be called the uniform crime report and shall cover crimes reported and otherwise processed during the month preceding the month of the report. It shall contain the number and nature of offenses committed, the disposition of such offenses and such other information as the director of state police shall specify relating to the method, frequency, cause and prevention of crime. Under no circumstances shall the name of any person be reported.

### 28.252 Compilation of monthly uniform crime reports; use.

Sec. 2. Upon receipt of the monthly uniform crime reports from the reporting agencies, the department of state police shall prepare a statewide compilation of the statistics contained therein and the resulting statistical compilation shall be available to any governmental law enforcement agency in the state, the judiciary committees of the Michigan state senate and the Michigan state house of representatives, and the federal bureau of investigation, upon request. The statistics made available through the uniform crime report shall be used for the purpose of studying the causes, trends and effects of crime in this state and for intelligence upon which to base a more sound program of crime detection and prevention and the apprehension of criminals.

### 28.253 Voluntary crime reports; inclusion in compilation.

Sec. 3. Any governmental police agency, not falling within the description of those required to submit the monthly uniform crime report set forth in section 1, which desires to submit such a report, shall be furnished with the proper forms by the department of state police. When a report is received by the department of state police from a governmental police agency not required to make such report, the information contained therein shall be included within the monthly compilation provided for in section 2.

### 28.254 Reports of wanted persons and stolen vehicles.

Sec. 4. The chief of police of each city or village and of each township having a police department, and the sheriff of each county within this state, shall report to the department of state police, in a manner prescribed by the department, all persons wanted by, and all vehicles stolen from, their primary police jurisdictions. The report shall be made as soon as is practical after the investigating department either ascertains that a vehicle is stolen or obtains a warrant for an individual's arrest or determines that they have reasonable grounds to believe that the individual committed a crime. In no case shall this time exceed 12 hours after the reporting agency determines that it has grounds to believe that a vehicle was stolen or that the wanted person should be arrested.

### 28.255 Reports of apprehension or recovery.

Sec. 5. When at any time after making a report required by section 4 it is determined by the reporting agency that a person is no longer wanted because of his apprehension, or any other factor, and when a vehicle reported stolen under section 4 is recovered, the chief of police or sheriff of the reporting agency shall immediately notify the department of state police in a manner prescribed by the department.

# APPENDIX C
## Estimation Procedure

The Michigan estimation procedure was developed based on the process used on the national level by the Federal Bureau of Investigation (FBI). The following decisions were made and followed in the estimation procedure:

-Crime will be estimated for both offenses and arrests
-Crime will be estimated to the law enforcement agency level only for the purpose of calculating state totals, not for use at the agency level
-Only state total estimated figures will be published in the annual report
-Population figures used in cross sectional estimating will come from the U.S. Census
-Arrest data will be estimated only for the total, not for the breakdowns of age, race, and sex
-Agencies that are classified as "zero population" (see Appendix B for definition) that fall into the cross sectional estimation method will not be included in the estimation

Three different methods are used, depending on the extent of missing data:

**Averaging Method**
Definition: Taking the existing months of data, averaging it, and using the averaged figure for the remaining months of missing data.

When Used: When six or more months of actual data exists.

Steps:
-Identify agencies that have reported six or more months of data for the year.
-For each arrest and each offense take the numbers reported, add them together, and divide by the number of months reported.
-Multiply this averaged figure for each arrest and offense by 12.

**Longitudinal Method**
Definition: Taking the same agency's data from last year, calculating the rate of change between the two previous years, applying this rate of change to last year's data, using these calculated figures for the current year.

When Used: When an agency has reported less than six months of data for the year, but reported 12 months of data the previous two years.

Steps:
-Identify all the agencies that have reported less than six months of data for the current year but reported 12 months of data the previous two years.
-Calculate the rate of change between the two complete years.
-Disregard any data reported during the current year.
-Apply the rate of change from the two complete years to the most recent complete year's data to calculate the current year's estimate.

# APPENDIX C
## Estimation Procedure

**Cross Sectional Method**

Definition: Taking averaged crime rate data from a group of similar agencies and applying this figure to agencies with missing data.

When Used: When an agency has reported less than six months of data for the year, and did not report 12 months of data for the previous year.

Steps:

-Identify all agencies with 12 months of data reported for the current year.

-Place all agencies with full data for this year into the appropriate population group, based on their population.

a) up to 999
b) 1,000 – 2,499
c) 2,500 – 4,999
d) 5,000 – 9,999
e) 10,000 – 24,999
f) 25,000 – 49,999
g) 50,000 – 99,999
h) 100,000 – 249,999
i) 250,000 +

-For each agency, calculate the crime rate for each offense and arrest.

-For each agency, for each offense and arrest, add the total rates within each group and divide by the number of agencies to get an average.

-Apply the averaged figure for each arrest and each offense for those agencies missing data and fitting into the grouping.

## PROPER USE OF DATA
Users should note the following factors when analyzing changes in the volume and types of crimes: missing data, population density, urbanization, composition of the population, stability of the population, modes of transportation, economic conditions, cultural characteristics, family cohesiveness, climate, strength and policies of the criminal justice system, and crime reporting practices of the citizenry. When used properly, the data provided in this report can significantly contribute to management and planning activities at local, state, and federal levels, especially by state officials, law enforcement agencies, the legislature, and nonprofit organizations. Questions on the proper use of UCR statistics can be directed to the Crime Analysis Unit or the Uniform Crime Reporting Section of the Criminal Justice Information Center (contact information provided on page 1).

# APPENDIX D
# Data Use

## MONTHS REPORTED

The months reported figure indicates the number of months that an agency submitted data to the state program. Data users should view this with caution, because a month of data does not necessarily indicate that an agency has reported all activity for that month. It should not be assumed that changes in data indicate an actual change in crime; it may be a change in reporting. Users should check with the individual departments or with the state program before assuming that changes are indicative of actual trends.

## HATE CRIME STATISTICS

A Hate Crime or Bias Crime is a criminal offense committed against a person or property which is motivated, in whole or in part, by the offender's bias against a race, religion, ethnic/national origin, sexual orientation or disability group. Hate Crimes are not separate, distinct crimes, but rather traditional offenses motivated by the offender's bias. The Hate Crime statistics reported to the Michigan Uniform Crime Reporting program may have some reporting inconsistencies. The decision to classify an offense as a hate crime is left to the discretion of the responding law enforcement officer. It is believed that different interpretations of this definition have lead to over reporting by some agencies and underreporting by others. For this reason, Hate Crime statistics should be used cautiously. In addition, the Other Bias category appears to be misunderstood by many reporting agencies. Consequently, all incidents reported as Other Bias have been removed.

## MICR STATUS

Michigan Incident Crime Reporting (MICR) is Michigan's incident-based reporting system in which data are collected on each single crime occurrence. MICR provides data to the FBI through NIBRS. The National Incident Based Reporting System (NIBRS) is the result of efforts by the FBI and various law enforcement organizations to improve and modernize the Uniform Crime Reporting program. The implementation of MICR is still progressing throughout Michigan. The majority of Michigan law enforcement agencies are now reporting through the new Michigan Incident Crime Reporting (MICR) system. In 2004, 98% of agencies, representing 89% of the population, submitted data through MICR. Additional information on the MICR program can be obtained by contacting the UCR Section (see contact information on page 1).

## MICR CONVERSION

In order to make reporting from all sources consistent, MICR data must be converted back to the traditional UCR format. The MICR database was constructed to allow for such a conversion so that UCR's long-running trend analysis could continue. The majority of the data shown in this report is in UCR summary format. This is the last year that summary data will be collected. Starting in 2005, all crime data must be submitted using the MICR format. The MICR section of this report shows data as reported in the MICR format. Users should note that this data does not include all agencies in the state and therefore are not a true indication of the statewide crime picture.

# MICR REPORT 2004

# Michigan Incident Crime Reporting (MICR) System

Michigan participates in a voluntary national program to collect crime statistics. The program is administered by the Federal Bureau of Investigation. The state's Uniform Crime Reporting system was instituted in 1959 when the State Police requested all law enforcement agencies voluntarily submit crime data to them for the purpose of compiling a uniform crime report. The Michigan Uniform Crime Reporting program (UCR) is designed to meet federal reporting requirements as well as to provide detailed information for state law enforcement agencies. The enactment of Michigan Public Act 319 in 1968, making submission of crime data mandatory, greatly spurred the growth of the state program.

Initially, only summary data was collected. Beginning in 1976, the Michigan UCR program began collecting incident data from agencies willing to convert to the new system. The main difference between the summary and incident system is the degree of detail in reporting. Agencies submitting summary data report aggregate counts of offense and arrest information for both index and non-index crimes. The types of data collected include the number of offenses, clearances, types, and values of stolen and recovered property, and the age, race, and sex of persons who are arrested. Under the incident system, agencies collect more detailed information regarding individual crime incidents and arrests. This information is submitted using prescribed data elements for each incident and arrest. Information submitted through both these systems is combined to provide a comprehensive database to define the type and extent of crime in Michigan. This combined data is shown throughout this report as UCR data. The incident data is shown here in the MICR report.

Following several years of extensive study requested by the International Association of Chiefs of Police and the National Sheriffs Association, guidelines and specifications were developed in 1985 for the National Incident Based Reporting System (NIBRS). Implementation began in 1989. Also in 1989, the Michigan UCR Program, with the endorsement of the Michigan Association of Chiefs of Police and the Michigan Sheriffs Association, applied for a federal grant to redesign the state program. The state program was named the Michigan Incident Crime Reporting program (MICR). MICR began implementation in 1994. Since then, additional agencies have converted to the MICR system each year. In 2004, 98% of Michigan law enforcement agencies reported MICR data.

To obtain statewide crime statistics, the detailed incident information collected through MICR must be converted into the summary UCR format. The data is all combined to obtain the statewide UCR dataset shown throughout most of this report. As soon as all Michigan law enforcement agencies convert to the MICR system, statewide totals will be available in the MICR format (see MICR Appendix A for a list of agencies not included in the MICR data).

This MICR report provides valuable, detailed crime information for all agencies on the system. Additional MICR reports are available to reporting agencies or to anyone by making a request through the MSP Crime Analysis Unit (see contact information on page 1 of UCR report).

MICR data includes Group A and Group B crimes. Group A crimes are considered the more serious, or more prevalent, crime types. Group A is used as a common indicator for crime trends. For a complete list of all Group A and Group B crimes, see MICR Appendix B.
