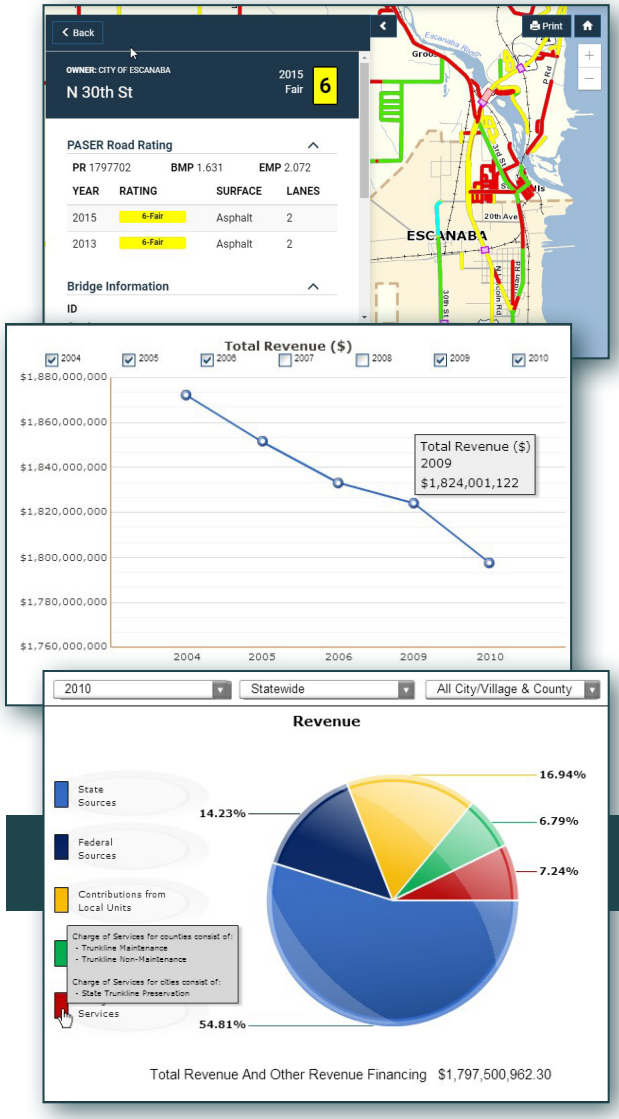
Data Driven Decision Making Tools

The TAMC strives to lead the nation in providing data that can be easily accessed and tell the story:

- Interactive Map – Road and Bridge Conditions
- Dashboards – Annual metrics from finance to safety data
- Investment Reporting Tool – Detailed information on road and bridge projects



Mission Statement

To develop and support excellence in managing Michigan's transportation assets by:

- Advising the Legislature and the State Transportation Commission
- Promoting Asset Management principles
- Providing tools and practices for road agencies

Contact Information

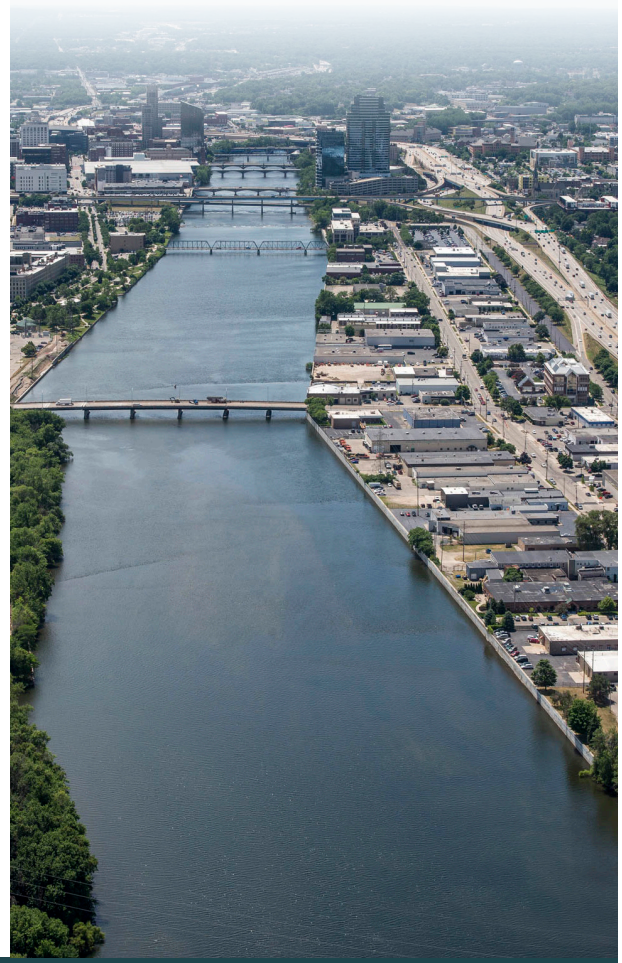
Anyone can sign up for Gov Delivery on the TAMC Website to be notified of significant events, press releases or updates to any of the different training, reporting and data efforts.

Michigan Transportation Asset Management Council



www.michigan.gov/tamc

The Transportation Asset Management Council (TAMC) is comprised of professionals representing road commissions, cities, counties, townships, regional and metropolitan planning organizations, and state transportation department personnel.

Preserving Roads & Bridges

The Michigan Transportation Asset Management Council acts as a resource for independent objective data on the condition of Michigan's roads and bridges and a resource for implementing the concepts of asset management.

Strategic Plan

The TAMC continues to promote the principles of asset management statewide to enhance the productivity of investing in Michigan's roads and bridges through coordination and collaboration among state and local transportation agencies.

The TAMC's Activities Include:

- Surveying and reporting the condition of roads and bridges by functional classification categories
- Analyzing completed and planned investments in roads and bridges
- Supporting the development of appropriate asset management methodologies
- Providing education and training on the benefits of asset management principles and procedures

Building & Maintaining Partnerships

The TAMC has over 10 years of experience in collecting and analyzing data. Partnerships formed at the local, state and national level, along with education and teamwork across all aspects of asset management, continue to make these efforts a success.

TAMC Actively Engaged

In 2017, The 21st Century Infrastructure Commission brought a great deal of attention to Michigan's infrastructure. One of the first efforts to be recognized was the work of the TAMC. The lessons learned and expertise in building partnerships and the consistent collection of data of the TAMC have served as a potential model moving forward across other infrastructure assets.

"All public roads in Michigan will be managed using the principles of asset management"

- Public Act (PA) 499 of 2002 created the TAMC

The TAMC serves an advisory role to the Michigan State Transportation Commission (STC) regarding:

- Asset management process
- Tools and education
- Statewide asset management strategy
- Federal aid system condition and
- Non-federal aid system condition

TAMC Related Legislation:

The TAMC was formed under PA 499 of 2002 (amended by PA 338 of 2006, PA 199 of 2007, PA 257 of 2010, PA 298 of 2012 and PA 506 of 2012) and is required to prepare an annual report detailing its activities during the previous year, and its plans for the upcoming year. The most recent report, as well as an archive of previous reports, can be found online at *www.michigan.gov/tamc*.
