Cyber Warriors

SUMMER STEM CAMPS 2027

Build real projects. Explore technology careers.

Hands-on AI and robotics for students with disabilities, including students who are blind or have low vision. Explore your interests with accessible learning and support.

Autonomous Racing

June 14–18, 2027 | Intro Program

Build and program a self-driving AI car to explore lanes, obstacles, and autonomous racing.

Iron Man Lab

July 7–9, 2027 | Year 3 Program

Code smartwatch apps and create wearable AI experiences with sensors and creative design.

Computer Vision & Edge AI

July 12–16, 2027 | Year 2 Program

Connect an AI camera to an edge computer to detect, count, track, and react.

AI Robot Dog

July 26–30, 2027 | Intro Program

Build and code a robotic dog, teach it tricks, and explore sensors and smart behaviors.

Build Your Own Personal AI Supercomputer

August 2–6, 2027 | Year 2 Program

Build a compact AI computer and explore language, voice, and vision models.

AI Robotic Arm & Smart Factory Automation

August 9–13, 2027 | Year 3 Program

Program a robotic arm with sensors and vision to sort objects and automate tasks.
