MPART Fast Facts 2026

MICHIGAN PFAS ACTION RESPONSE TEAM

The Michigan PFAS Action Response Team (MPART) was formed in late 2017 to protect Michigan's public health and the environment from per- and polyfluoroalkyl (PFAS) substance contamination. Since then, MPART has been working diligently and collaboratively to continue to address PFAS across the state.

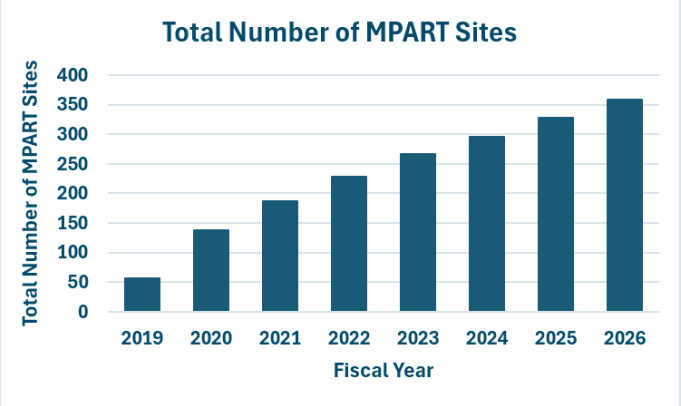
Following are actions taken in fiscal year (FY) 2026.

Protected Michiganders from PFAS Contamination

31 new MPART sites for a total of **359**

Over **520** new drinking water wells sampled.

165 homes sampled with Michigan Department of Health and Human Services (MDHHS) self-test kits.



Re-sampled **more than 2,590** drinking water wells that were sampled in previous years.

Provided more than **320** PFAS-reducing filters and **1,220** replacement cartridges.

2,819 public water supplies monitored.

341 water samples collected from lakes and streams in **20** different watersheds.

1,563 fish samples collected to determine the need for fish consumption advisories.

Awarded over **$10 million** to airports to support PFAS testing, monitoring, and remediation as well as fire truck clean-out and purchasing PFAS-free firefighter turn-out gear at airports across the state.

Michigan Department of Agriculture and Rural Development began a **$3.5 million Farmer Assistance Program** to help Michigan farms identify and address PFAS contamination.

Educated the Public

Hosted the first ever **PFAS Awareness Week**

- **Three free webinars** on PFAS attended by nearly 1,000 people.
- Over a **dozen in-person events** hosted by partners
- News coverage in **33 different states.**

- **MDHHS** published a new **statewide recommendation** that everyone reduce their exposure to all PFAS when and wherever possible.
- Launched a statewide PFAS campaign with information on the radio, TV, social media, billboards, and more.

Increased Transparency

Updated and created numerous pages on the MPART website to better serve the public, including a new section detailing how MPART evaluates and samples drinking water wells as part of investigations and new PFAS criteria and other values page.

MDHHS published **over 10** health consultations and other public reports as of the end of FY 2026.
