Table(s) of "sib_group" Picture Object	
Name	sib_group
Comment	Generates the SIB_GRP_ID which considers all members of one or more children's cases as one group to avoid the duplication of data. This is especially true in sibling cases. For instance, if two brothers are on different cases and they have the same parents, then the parents' information need not be repeated. The SIB_GRP_ID when combined with the PERSON_ID, as can be seen in the table GROUP_PERSON, achieves this purpose.

Table(s) of "provider" Picture Object	
Name	provider
Comment	Contains information about providers (Board & Care, Services, Licensee and others) identified by a unique combination of PROVIDER_ID and PROVIDER_TYPE; as the PROVIDER_ID can potentially repeat across the provider types. If the PROVIDER_TYPE is M for MPS (model payments) providers, then the PROVIDER_ID is downloaded from the MPS system. If the PROVIDER_TYPE is L for Licensee or O for Other, the PROVIDER_ID also would be taken from other systems. Only for the SWSS 'S' provider types, will a number be generated within SWSS.
