

Wind Power Installed in Michigan

The Energy Office has identified 55.5 MW (55,500 kW) of wind energy systems installed in Michigan. The chart below indicates the cumulative kW that have been installed. In 1996 a 600 kW wind generator was installed in Traverse City and in 2001 two 900 kW wind generators were installed near Mackinaw City. In 2007, 32 wind generators (52.8 MW) were installed as the Harvest Wind Farm near Pigeon in the Thumb.
