

# Michigan State Police

Crash Advisory # 15

Revised January 2014

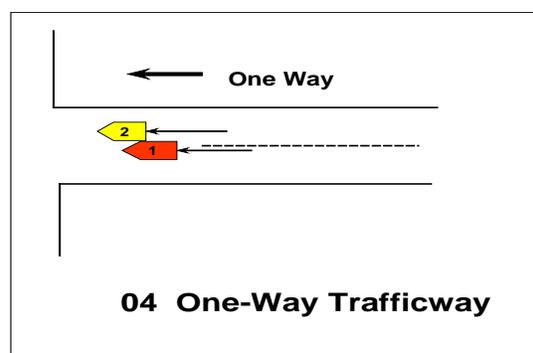

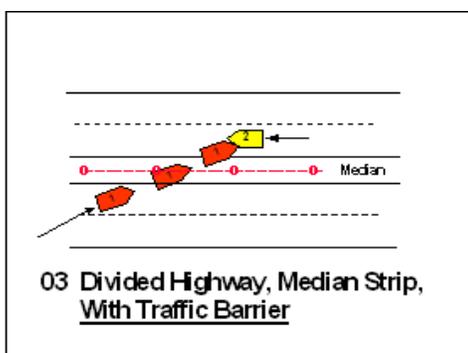

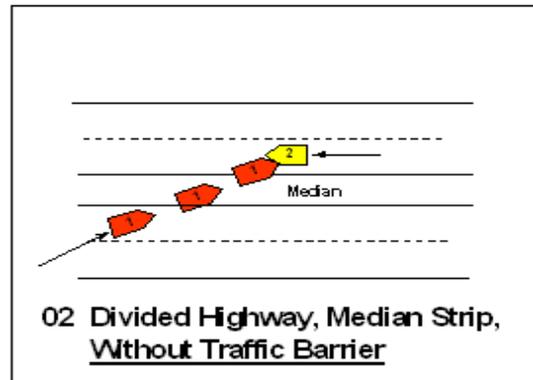

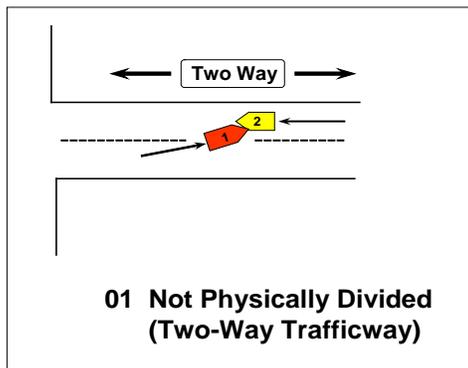

**Below are some diagrams for Trafficway. They have been created in order to assist you in filling out the UD-10 form.**

**Trafficway:** A code indicating whether or not a trafficway is divided, and whether it serves one-way or two-way traffic, at the site of the crash. Indicate the degree of trafficway division at the site of the crash.

**Median:** Distance or area between the inside left-hand pavement edges of a divided highway.

**Traffic Barrier:** A device that provides a physical limitation through which a motor vehicle would not normally pass and is designed to contain or redirect an errant motor vehicle.

Refer to section 2 of the UD-10 Traffic Crash Report Manual for further information.

Please Distribute to All Personnel Who Complete or Review Traffic Crash Reports
