

Information on the MDSS release 1.0.5
Monday, January 10th, 2005

MDSS Users,

We are pleased to announce the pending release of the latest version of the Michigan Disease Surveillance System. This new version will be available and in service on Monday, January 10th. Highlights of the system enhancements include:

- 1.) The ability to add lab results on the last page of new case entry in the HTML.
Allows you to add results without having to first create the case and then go back in and edit the case.
- 2.) Addition of Syphilis and Gonorrhea case detail (PDF) forms.
- 3.) The ability from the Syphilis and Gonorrhea case detail (PDF) forms to create new co-infection cases automatically for either Syphilis or Gonorrhea.
- 4.) Addition of the following new reportable conditions
Syphilis - Early Latent
Syphilis - Latent of Unknown Duration
Syphilis - Late Latent
Syphilis - Late with Manifestations
Syphilis – Secondary
- 5.) Performance improvements to Reports 2, 3, 4
