NEW Pressure Reduction Foam Core Mattress

See next page for results of fire testing!!!

Integrity30™ Fire Barrier

This is a direct comparison between a mattress that meets all the required flame testing in the United States and a mattress that has been tested and certified to meet California Technical Bulletin #129 using Integrity30™ fire barrier. Tests on mattresses using Integrity30™ fire barrier have clearly demonstrated a significant reduction in the peak rate of heat release, a measurement of relative safety of the mattress product as measured by full scale fire tests and the NFPA Life Safety Code. Integrity30™ is a trademark of Ventex, Inc.

**MATTRESS USING
INTEGRITY30™ FIRE
BARRIER.**

**MATTRESS THAT
MEETS FEDERAL
FLAMMABILITY
STANDARD**

Which bed would you want in YOUR dorm or hospital?
