were younger than 25 years of age.

- According to 2013 data provided by the Michigan Department of Health and Human Services, motor vehicle crashes account for 39.2 percent of all accidental deaths for children ages 1-14.
- The economic loss in Michigan traffic crashes amounted to more than $8.6 billion in 2013, which is the most recent year of data available. If costs were spread across the state’s population, this would translate into a loss of $869.98 per state resident.
