GROUP CONVERSION

RATES FOR ALTERNATIVE EFFECTIVE DATES

This filing presents proposed rates effective June 1, 2009. To the extent that the rate review process delays the effective date of the rate increase, the proposed premiums to be charged are adjusted to reflect the new rating period.

Section II, Table 2 provides proposed rate schedules for a rate increase effective up to 12 months after the current requested effective date. The proposed rate level for each rate increase effective month reflects additional claims and expense trend to get to the new effective rate period. For example, if there is a one month delay in the effective date (i.e. July 1, 2009), the proposed rates are adjusted to reflect an additional month of trend.

Section III, Table 3 provides additional detail behind this rate development.
