

Michigan CSI

(Michigan Cyber Safety Initiative)

Attorney General Mike Cox

The Michigan CSI consists of customized presentations for kindergarten through eighth-grade students and a community seminar. The program was piloted in the spring of 2007 to over 8,500 students and since the program launch in the fall of 2007 has been presented to nearly 300,000 students. The kindergarten through third-grade presentation includes a video of the acclaimed book *Faux Paw's Adventures in the Internet*. The book and seminar material are being presented in cooperation with the Internet Keep Safe Coalition. The primary focus is to emphasize students should: keep safe by not sharing any personal information, keep away from Internet strangers, and keep telling parents or a trusted adult about anything that makes them feel uncomfortable.

In addition to the keep safe, keep away, and keep telling messages, students in fourth grade and above also learn about common Internet predator grooming techniques and appropriate responses to cyber harassment. Fourth- through eighth-grade students watch a realistic fiction video entitled "Predator" provided compliments of the nonprofit group i-SAFE Inc.

Sixth- through eighth-grade students additionally are cautioned about revealing personal information on social networking sites and watch an i-SAFE Inc. video about a female Internet predator victim. The sixth-grade through eighth-grade students also watch an i-SAFE Inc. video about a male cyber-bullying victim.

All students are provided with age-appropriate handouts and an Online Safety Contract to discuss with parent(s) or guardian(s).

The community seminar provides practical tools, including a PowerPoint handout of slides covered during the seminar. The seminar provides concrete tools, including a demonstration of how to access the Michigan Sex Offender Registry and sign up for e-mail updates. The seminar also demonstrates how to access online tutorials to: search and access a child's social networking site(s) (i.e., MySpace and Facebook); view Internet history logs to determine where a child has been online; and turn on safe surfing filters.

The community seminar can be viewed online at www.michigan.gov/csi, through Comcast On-Demand, on local cable television channels, or by requesting a free DVD from the Department of Attorney General by e-mail at AGCSI@michigan.gov or by calling toll-free at 1-877-765-8388. Additionally, a Community Seminar calendar is available online with dates and locations of currently scheduled seminars.

The program's impact is remarkable. All handouts and more information are available on the Michigan CSI website (www.michigan.gov/csi). Michigan CSI is offered in cooperation with Comcast. Our expertise is offered free of charge, and we look forward to working together to keep Michigan's children safe.

Thank you for your interest in the Michigan Cyber Safety Initiative.
