## Appendix – Definitions of Account Codes

### INTRODUCTION

The purpose of this section is to provide the reader with an overview of the required coding structure; the graphic display and definitions which follow should be used for that purpose.

The coding structure is consistent with “Financial Accounting for Local and State School Systems” published by the National Center for Education Statistics, 2009. Standard coding found in this section is necessary to satisfy state and federal reporting requirements. Each district should review local needs before additional elements of the coding structure are added. The accounting system designed should accommodate the planning, budgeting, evaluating, and analysis functions of the system and should be cross-referenced to other information files of that system.

Dimension - Block of related digits.

Fund - An independent fiscal and accounting entity, preferably with a self-balancing set of accounts, with its own assets, liabilities, resources, and fund balances which are segregated for the purpose of carrying on specific activities in accordance with special regulations, restrictions, or limitations (two positions). Edited field in the Financial Information Database (FID)

Transaction Code - A code used to identify whether an accounting entry is balance sheet, revenue, or expenditure (one position). Used internally in district accounting systems. Not reported to the FID as a separate field. The transaction code is used to determine which file (revenue, expenditure, or balance sheet) the record is to be uploaded for FID submission.

Major Class - The basic account identifier for recording transactions involving assets, liabilities, fund balance and revenues (three positions). Edited field in the FID.

Suffix - The code used to further define/distinguish between revenue sources (four positions). Edited field in the FID. Edited for revenue records, but not balance sheet.

Function -The basic account identifier for expenditures. It describes the activity for which a service or material is acquired. The basic functional categories operated by most districts are instruction, pupil support, instructional staff support, general administration, business services, operations and maintenance, transportation, central services, community services, and facilities acquisition. Edited field in FID.

Object - The code used to describe the service or commodity obtained as the result of a specific expenditure. The broad object code categories include salaries, benefits, purchased services, supplies/materials, and capital outlay. Edited to the 2<sup>nd</sup> position in FID.

Program - The code used to describe a plan of activities and procedures designed to accomplish predetermined objective or set of allied objectives (three positions). Edited field in the FID.

Grant Code - The code used to identify various grant programs/funding source (four positions). Fourth position may be used at district’s discretion. **This is a required field for reporting all restricted grant related expenditures. We recommend using it on all corresponding restricted grant revenue records as a good financial management practice. Some grant offices may require that districts report information in this field on both FID revenue and expenditure records as a condition for receiving a particular grant.**

Facility/School - The state assigned code used to designate a district building or administrative unit. (five positions). Edited field in the FID.

Other - A dimension available to further define a school district's activities; i.e., subject matter, special cost center, etc. (four positions).
