

Quarterly Report on activities by CMHSPs to form regional partnerships

July 19, 2001

MDCH staff have continued to provide technical assistance forums regarding regional partnerships as requested by CMHSPs. The frequency of these forums has diminished as the make up of the partnerships appears somewhat more stable. There are still a few CMHSPs that have not made a commitment to a particular partnership, but continue to examine and weigh options. There are no specific changes to report since the last quarter report.
