IBM License Information document

Return to previous page

LICENSE INFORMATION

The Programs listed below are licensed under the following terms and conditions in addition to those of the International License Agreement for Evaluation of Programs.

Program Name: IBM Rational RequisitePro 7.1.2
Program Number: 5724-G39

Evaluation Period

The evaluation period begins on the date that Licensee agrees to the terms of this Agreement and ends after 30 days.

Supporting Programs

The Program is licensed as a multi-product package and includes the Supporting Programs identified below. Licensee is authorized to install and use such Supporting Programs only to support Licensee's use of the Principal Program under this Agreement and within the limits of the Proofs of Entitlement for the Program (unless broader rights are provided elsewhere in this License Information document). The phrase "to support Licensee's use" would include only those uses that are necessary or otherwise directly related to a licensed use of the Principal Program or another Supporting Program. The Supporting Programs may not be used for any other purpose. Licensee is not authorized to transfer or remarket the Supporting Programs separate from the Principal Program. The terms of this Agreement may replace or modify the license terms for the Supporting Programs. In the event of conflict, these terms supersede the terms of the license agreement which accompanies the Supporting Programs. When Licensee's right to use the Program expires or terminates, Licensee must discontinue use, destroy or promptly return all copies of the Supporting Programs to the party from whom Licensee acquired the Program. If Licensee downloaded the Supporting Programs, Licensee should contact the party from whom Licensee acquired the Program. If Licensee wishes to license the Supporting Programs for any use beyond the limits set forth above, please contact an IBM Sales Representative or the party from whom Licensee acquired the Program to obtain the appropriate license.

The following are Supporting Programs licensed with the Program:
IBM Rational License Server 8.1.1
IBM DB2 Enterprise Server Edition V9.7 for Linux, UNIX, and Windows
IBM Installation Manager and Packaging Utility for the Rational Software Development Platform 1.4.1

Benchmarking

Licensee may disclose the results of any benchmark test of the Program or its subcomponents to any third party provided that Licensee (A) publicly discloses the complete methodology used in the benchmark test (e.g., hardware and software setup, installation procedure and configuration files), (B) performs Licensee's benchmark testing running the Program in its Specified Operating Environment

using the latest applicable updates, patches and fixes available for the Program from IBM or third parties that provide IBM products ("Third Parties"), and (C) follows any and all performance tuning and "best practices" guidance available in the Program's documentation and on IBM's support web sites for the Program. If Licensee publishes the results of any benchmark tests for the Program, then notwithstanding anything to the contrary in any agreement between Licensee and IBM or Third Parties, IBM and Third Parties will have the right to publish the results of benchmark tests with respect to Licensee's products provided IBM or Third Parties complies with the requirements of (A), (B) and (C) above in its testing of Licensee's products.

Notwithstanding the foregoing, under no circumstances may Licensee publish the results of benchmark tests run on Oracle Outside In Technology without prior written permission.

The above benchmarking terms apply to the following Programs or subcomponents:
The embedded version of IBM WebSphere Application Server component of the Program.

Source Components

The Program may include some components in source code form ("Source Components"). Licensee may copy and modify Source Components for internal use only provided such use is within the limits of the license rights under this Agreement, provided however that Licensee may not alter or delete any copyright information or notices contained in the Source Components. IBM provides the Source Components without obligation of support and "AS IS", WITH NO WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING THE WARRANTY OF TITLE, NON-INFRINGEMENT OR NON-INTERFERENCE AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Program Keys

For Programs which require keys to operate, Licensee may not have more keys to the Program in Licensee's Enterprise than Licensee has entitlements.

Program-unique Terms

MULTI-PROGRAM OFFERING

Programs may be licensed as part of a 'suite' or a multi-program offering. The separate Programs comprising the suite or multi-program offering may not be used simultaneously by different users, and may be used by only one user at a time. If third party software is included with any Program, the third party software may not be separated from, or used independently of, the Program.

WEBSPHERE APPLICATION SERVER COMPONENT:

The Program is accompanied by a portion of WebSphere Application Server product (Application Server). The Program includes the Application Server components on the following CD-ROMs and/or DVDs:

- WebSphere Application Server
- WebSphere Application Server Supplements
- WebSphere Application Server Toolkit (Windows and Linux/Intel platforms only)
- IBM Rational Application Developer, trial edition
- Rational Agent Controller
- Quick Start Guide

For each Program server Proof of Entitlement (PoE), Licensee is entitled to install and use, from the media provided with the Program, one copy of each of the WebSphere Application Server components required to support Licensee's licensed use of the Program.

Licensee is responsible for complying with all licenses, agreements and copyright laws for third-party software that Licensee uses in conjunction with the Application Server. Nothing herein grants Licensee any greater right than Licensee may otherwise have to use third-party software not distributed with the Application Server.

MULTIPLE COMPONENT VERSIONS
The media for the Application Server may include multiple versions of the same Application Server component, such as versions designed for different operating systems and versions translated into different languages. Each Proof of Entitlement for the Program authorizes Licensee to use a single version of the Application Server. Licensee is not authorized to use multiple versions of the same Application Server component under the same Proof Entitlement, even if multiple versions of a component are included on the media for the Application Server.

UNLIMITED COPY COMPONENTS
In addition to the authorizations above, for each Proof of Entitlement for the Program, Licensee is authorized to install and use an unlimited number of copies of the following Application Server on any of Licensee's machines to support Licensee's authorized use of the other components of the Application Server. Licensee is entitled to warranty protection under the Agreement for each Proof of Entitlement Licensee obtains for the IBM HTTP Server for WebSphere Application Server Component.

- IBM HTTP Server for WebSphere Application Server
- Administrative Scripting
- Administrative Console
- Performance and Analysis Tools: Dynamic Cache Monitor, Tivoli Performance Viewer, Performance Servlet
- WebServer Plugins
- Application Clients (including - WebServices Thin Client and Thin Admin Client)
- Memory Dump Diagnostic for Java (MDD4J)

RESTRICTED USE COMPONENTS
Licensee's use of the following Application Server is limited to the uses specified below in support of the other Application Server. Licensee may not use the following Application Server for other purposes.

CLOUDSCAPE COMPONENTS
Licensee may use the IBM Cloudscape components solely for development, testing and evaluation of applications and for production use only as a data repository for data generated and managed by Application Server.

Some examples of authorized production use include:

(i) provide persistence of "HTTP Session Objects" using the "session persistence" component of the Application Server to support Licensee's authorized use of such component;

(ii) provide a data repository for the UDDI Registry component of the Application Server to support Licensee's authorized use of such component;

(iii) provide a data repository for the Scheduler and EJB Timer components of the Application Server to

support Licensee's authorized use of such components; and

(iv) provide a data repository for the messaging engine component of the Application Server to support Licensee's authorized use of such component.

No IBM Cloudscape components may be used separately from the Application Server, or for any other purpose, or in support of any other programs. If Licensee wishes to license IBM Cloudscape for any use beyond the limits of this license, please contact an IBM sales representative to obtain the appropriate licenses.

DATA DIRECT TECHNOLOGIES COMPONENTS
Licensee is only authorized to install and use the Data Direct components of the Application Server on a machine to support Licensee's authorized use of, the Application Server component. Licensee may not use the Data Direct components for other purposes.

INTEGRATED SOLUTIONS CONSOLE
The Application Server includes a version of the IBM Integrated Solutions Console (ISC) component. Unless otherwise stated in this LI, Licensee is authorized to use the ISC component, its embedded components, and programming interfaces, only for the purposes of installation, configuration, management and administration of software programs.

APPLICATION SERVER TOOLKIT
Licensee is authorized to install and use an unlimited number of copies of the Application Server Toolkit components of the Application Server on any of Licensee's machines to support Licensee's authorized use of the other components of the WebSphere Application Server. Applications developed with the Application Server Toolkit components of the Application Server may only be deployed and used with the Application Server product for which Licensee has acquired a Proof of Entitlement for the Application Server. Licensee may not use the Application Server Toolkit components of the Program for other purposes.

DB2 Connect components: The Application Server includes portions of DB2 Connect technology. Licensee is authorized to install and use one copy of these components only in association with Licensee's licensed use of Application Server for the purpose of application development and modeling data objects managed by DB2 for z/OS and DB2 for iSeries. DB2 Connect technology provided with the Application Server cannot be used for any other purpose. DB2 Connect technology cannot be used to provide connectivity for any application other than the Application Server. If such connectivity is required, a proper DB2 Connect license must be purchased.

Licensee's use of the DB2 Connect components is subject to the terms and conditions of the license agreement which accompany the components except as limited in this license. The DB2 Connect components may not be used for any other purpose. Please contact Licensee's DB2 Reseller if Licensee's needs exceed this license agreement, to obtain a full DB2 Connect license.

TECHNOLOGY PREVIEW CODE
Technology Preview code that is included or distributed with the Application Server updates thereto. Technology Preview code will be identified as such in the "Notices File" (or in an updated "Notices File" accompanying the updates), or in a file or files referenced in such "Notices File". Some or all of the code may not be made generally available by IBM as a product. Production use of Technology Preview code is not authorized. Technology Preview code shall only be used for internal evaluation, testing or demonstration purposes and is provided with no support. Licensee may not transfer Technology Preview code to another party. Technology Preview code may contain a disabling device that will prevent it from being used after the evaluation period ends. Licensee will not tamper with this

disabling device or the Technology Preview code. Licensee should take precautions to avoid any loss of data that might result when the program can no longer be used. The evaluation period begins when Licensee agrees to the terms of this Agreement and ends 1) as of the duration or date specified in the Notices File (or in an updated Notices File accompanying the updates), or in a file or files referenced in such Notices File, 2) when otherwise notified by IBM, or 3) when the Technology Preview code automatically disables itself. Unless IBM specifies in the Notices File (or in an updated Notices File accompanying updates), or in a file or files referenced in such Notices File that Licensee may retain the Technology Preview code, Licensee will destroy the Technology Preview code and all copies made of it within ten days after the end of the evaluation period. If IBM notifies Licensee that Licensee may retain specified Technology Preview code and that productive use of such Technology Preview code is authorized, upon receipt of such notice the specified Technology Preview code shall no longer constitute an Excluded Component and the preceding provisions of this paragraph shall no longer apply to such Technology Preview code.

"HP-UX Java RTE
This Application Server includes HP-UX Java RTE software as separately licensed code, which is licensed to Licensee under the terms of the HP-UX license agreement and not those of this Agreement. In no event can the HP-UX Java RTE software be modified or redistributed a part from the Program or used for any purpose other than running the Program into which the HP-UX Java RTE software is incorporated."

SOURCE CODE
Some of the components of the Application Server may be provided in source code form. Notwithstanding anything to the contrary in this Agreement, support is only provided for the unmodified, binary code versions of these components included in the Application Server packaging, and not for the source code for these components or for any modifications of such components Licensee may create.

SUPPORT INFORMATION
For information on non-IBM supported operating systems or other specific configurations and level of Application Server components Licensee must have to acquire support for the Programs, please contact Licensee IBM Sales Representative.

DATADIRECT CONNECT FOR JDBC
The Program includes software from DataDirect. Licensee may use the DataDirect software provided with this Program only in conjunction with the Program and not separately.

Tivoli Monitoring for Virtual Servers 6.2.1

Terms applicable to Supporting Programs: IBM Tivoli Monitoring, Version 6

The Program is bundled with or includes one or more components of the IBM Tivoli Monitoring Version 6 ("ITM Version 6") program under a no-charge limited use license under the Supporting Programs clause above.

The ITM Version 6 license terms and conditions include certain restrictions on use of the various components included in or with ITM Version 6, including without limitation, the following: Licensee may not use any ITM Version 6 monitoring agents with Licensee's Program, except the Universal Agent, unless Licensee has acquired rights to do so under a separate license agreement. If Licensee's needs exceed these restricted use rights, please contact an IBM Sales Representative or IBM reseller to obtain an ITM Version 6 license that is appropriate to Licensee's needs.

Terms applicable to Supporting Programs: IBM Tivoli Monitoring Agent Builder V6

Licensee may use the ITM Agent Builder program bundled with ITM v6 with the Program pursuant to the terms of the license that accompanies that program.

Supporting Program Details - IBM DB2

The following applies to use of the IBM DB2 edition(s) specified in the Supporting Programs section of this License Information:

- Entitlement: Ratio 1/1
- Use Limitations: Use by Principal Program

"Ratio n/m" means that Licensee receives some number ('n') entitlements for the Supporting Program for every specified number ('m') entitlements of the Principal Program as a whole. Unless otherwise specified, the number of entitlements for the Supporting Program is rounded up to a multiple of 'n'. For example, if a Program includes 100 PVUs for a Supporting Program for every 500 PVUs obtained of the Principal Program and Licensee acquires 1,200 PVUs of the Program, Licensee may install the Supporting Program and have processor cores available to or managed by it of up to 300 PVUs. Those PVUs would not need to be counted as part of the total PVU requirement for Licensee's installation of the Program on account of the installation of the Supporting Program (although those PVUs might need to be counted for other reasons, such as the processor cores being made available to the Principal Program, as well).

"Use by Principal Program" means that the Supporting Program is provided exclusively for use by the Principal Program. Neither Licensee nor any application, program or device is authorized to directly use or access the services of the Supporting Program except Licensee may access the Supporting Program to perform administrative functions for the Supporting Program such as backup, recovery and authorized configuration

D/N: L-KHUY-88MRXB
P/N: L-KHUY-88MRXB

LICENSE INFORMATION

The Programs listed below are licensed under the following terms and conditions in addition to those of the International Program License Agreement.

Program Name: IBM Rational RequisitePro 7.1.2
Program Number: 5724-G39

Supporting Programs

The Program is licensed as a multi-product package and includes the Supporting Programs identified below. Licensee is authorized to install and use such Supporting Programs only to support Licensee's use of the Principal Program under this Agreement and within the limits of the Proofs of Entitlement for the Program (unless broader rights are provided elsewhere in this License Information document). The phrase "to support Licensee's use" would include only those uses that are necessary or otherwise directly related to a licensed use of the Principal Program or another Supporting Program. The Supporting

Programs may not be used for any other purpose. Licensee is not authorized to transfer or remarket the Supporting Programs separate from the Principal Program. The terms of this Agreement may replace or modify the license terms for the Supporting Programs. In the event of conflict, these terms supersede the terms of the license agreement which accompanies the Supporting Programs. When Licensee's right to use the Program expires or terminates, Licensee must discontinue use, destroy or promptly return all copies of the Supporting Programs to the party from whom Licensee acquired the Program. If Licensee downloaded the Supporting Programs, Licensee should contact the party from whom Licensee acquired the Program. If Licensee wishes to license the Supporting Programs for any use beyond the limits set forth above, please contact an IBM Sales Representative or the party from whom Licensee acquired the Program to obtain the appropriate license.

The following are Supporting Programs licensed with the Program:
IBM Rational License Server 8.1.1
IBM DB2 Enterprise Server Edition V9.7 for Linux, UNIX, and Windows
IBM Installation Manager and Packaging Utility for the Rational Software Development Platform 1.4.1

Benchmarking

Licensee may disclose the results of any benchmark test of the Program or its subcomponents to any third party provided that Licensee (A) publicly discloses the complete methodology used in the benchmark test (e.g., hardware and software setup, installation procedure and configuration files), (B) performs Licensee's benchmark testing running the Program in its Specified Operating Environment using the latest applicable updates, patches and fixes available for the Program from IBM or third parties that provide IBM products ("Third Parties"), and (C) follows any and all performance tuning and "best practices" guidance available in the Program's documentation and on IBM's support web sites for the Program. If Licensee publishes the results of any benchmark tests for the Program, then notwithstanding anything to the contrary in any agreement between Licensee and IBM or Third Parties, IBM and Third Parties will have the right to publish the results of benchmark tests with respect to Licensee's products provided IBM or Third Parties complies with the requirements of (A), (B) and (C) above in its testing of Licensee's products.

Notwithstanding the foregoing, under no circumstances may Licensee publish the results of benchmark tests run on Oracle Outside In Technology without prior written permission.

The above benchmarking terms apply to the following Programs or subcomponents:
The embedded version of IBM WebSphere Application Server component of the Program.

Source Components

The Program may include some components in source code form ("Source Components"). Licensee may copy and modify Source Components for internal use only provided such use is within the limits of the license rights under this Agreement, provided however that Licensee may not alter or delete any copyright information or notices contained in the Source Components. IBM provides the Source Components without obligation of support and "AS IS", WITH NO WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING THE WARRANTY OF TITLE, NON-INFRINGEMENT OR NON-INTERFERENCE AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Program Keys

For Programs which require keys to operate, Licensee may not have more keys to the Program in

Licensee's Enterprise than Licensee has entitlements.

Authorized User Single Install

Authorized User Single Install is a unit of measure by which the Program can be licensed. An Authorized User is a unique person who is given access to the Program. An Install is an installed copy of the Program on a physical or virtual disk made available to be executed on a computer. The Program may be installed on any number of computers or servers, but if the Authorized User has accessed or has access to more than one Install of the Program, the Authorized User requires a separate entitlement for each such Install. Licensee must obtain separate, dedicated entitlements for each Authorized User accessing the Program on each Install in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

Floating User Single Install

Floating User Single Install is a unit of measure by which the Program can be licensed. A Floating User is a person who is accessing the Program at any particular point in time. An Install is an installed copy of the Program on a physical or virtual disk made available to be executed on a computer. The Program may be installed on any number of computers or servers, but if the Floating User simultaneously accesses more than one Install of the Program, the Floating User requires a separate entitlement for each such Install. Licensee must obtain separate entitlements for each Floating User simultaneously accessing the Program on each Install in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means.

Program-unique Terms

MULTI-PROGRAM OFFERING

Programs may be licensed as part of a 'suite' or a multi-program offering. The separate Programs comprising the suite or multi-program offering may not be used simultaneously by different users, and may be used by only one user at a time. If third party software is included with any Program, the third party software may not be separated from, or used independently of, the Program.

WEBSPHERE APPLICATION SERVER COMPONENT:

The Program is accompanied by a portion of WebSphere Application Server product (Application Server). The Program includes the Application Server components on the following CD-ROMs and/or DVDs:

- WebSphere Application Server
- WebSphere Application Server Supplements
- WebSphere Application Server Toolkit (Windows and Linux/Intel platforms only)
- IBM Rational Application Developer, trial edition
- Rational Agent Controller
- Quick Start Guide

For each Program server Proof of Entitlement (PoE), Licensee is entitled to install and use, from the media provided with the Program, one copy of each of the WebSphere Application Server components required to support Licensee's licensed use of the Program.

Licensee is responsible for complying with all licenses, agreements and copyright laws for third-party software that Licensee uses in conjunction with the Application Server. Nothing herein grants Licensee any greater right than Licensee may otherwise have to use third-party software not distributed with the Application Server.

MULTIPLE COMPONENT VERSIONS
The media for the Application Server may include multiple versions of the same Application Server component, such as versions designed for different operating systems and versions translated into different languages. Each Proof of Entitlement for the Program authorizes Licensee to use a single version of the Application Server. Licensee is not authorized to use multiple versions of the same Application Server component under the same Proof Entitlement, even if multiple versions of a component are included on the media for the Application Server.

UNLIMITED COPY COMPONENTS
In addition to the authorizations above, for each Proof of Entitlement for the Program, Licensee is authorized to install and use an unlimited number of copies of the following Application Server on any of Licensee's machines to support Licensee's authorized use of the other components of the Application Server. Licensee is entitled to warranty protection under the Agreement for each Proof of Entitlement Licensee obtains for the IBM HTTP Server for WebSphere Application Server Component.

- IBM HTTP Server for WebSphere Application Server
- Administrative Scripting
- Administrative Console
- Performance and Analysis Tools: Dynamic Cache Monitor, Tivoli Performance Viewer, Performance Servlet
- WebServer Plugins
- Application Clients (including - WebServices Thin Client and Thin Admin Client)
- Memory Dump Diagnostic for Java (MDD4J)

RESTRICTED USE COMPONENTS
Licensee's use of the following Application Server is limited to the uses specified below in support of the other Application Server. Licensee may not use the following Application Server for other purposes.

CLOUDSCAPE COMPONENTS
Licensee may use the IBM Cloudscape components solely for development, testing and evaluation of applications and for production use only as a data repository for data generated and managed by Application Server.

Some examples of authorized production use include:

(i) provide persistence of "HTTP Session Objects" using the "session persistence" component of the Application Server to support Licensee's authorized use of such component;

(ii) provide a data repository for the UDDI Registry component of the Application Server to support Licensee's authorized use of such component;

(iii) provide a data repository for the Scheduler and EJB Timer components of the Application Server to support Licensee's authorized use of such components; and

(iv) provide a data repository for the messaging engine component of the Application Server to support Licensee's authorized use of such component.

No IBM Cloudscape components may be used separately from the Application Server, or for any other purpose, or in support of any other programs. If Licensee wishes to license IBM Cloudscape for any use beyond the limits of this license, please contact an IBM sales representative to obtain the appropriate licenses.

DATA DIRECT TECHNOLOGIES COMPONENTS
Licensee is only authorized to install and use the Data Direct components of the Application Server on a machine to support Licensee's authorized use of, the Application Server component. Licensee may not use the Data Direct components for other purposes.

INTEGRATED SOLUTIONS CONSOLE
The Application Server includes a version of the IBM Integrated Solutions Console (ISC) component. Unless otherwise stated in this LI, Licensee is authorized to use the ISC component, its embedded components, and programming interfaces, only for the purposes of installation, configuration, management and administration of software programs.

APPLICATION SERVER TOOLKIT
Licensee is authorized to install and use an unlimited number of copies of the Application Server Toolkit components of the Application Server on any of Licensee's machines to support Licensee's authorized use of the other components of the WebSphere Application Server. Applications developed with the Application Server Toolkit components of the Application Server may only be deployed and used with the Application Server product for which Licensee has acquired a Proof of Entitlement for the Application Server. Licensee may not use the Application Server Toolkit components of the Program for other purposes.

LICENSE INFORMATION

The Programs listed below are licensed under the following terms and conditions in addition to those of the International License Agreement for Evaluation of Programs.

Program Name: IBM Rational Software Architect 8.0
Program Number: 5725-A30

Program Name: IBM Rational Software Architect Extension for Integrated Architecture Frameworks V8.0
Program Number: 5725-A30

Program Name: IBM Rational Software Architect Extension for Deployment Planning V8.0
Program Number: 5725-A30

Program Name: IBM Rational Software Architect Extension for C++ V8.0
Program Number: 5725-A30

Program Name: IBM Rational Software Architect Extension for SOA and WebSphere V8.0
Program Number: 5725-A30

Program Name: IBM Rational Software Architect Extension for Communications V8.0
Program Number: 5725-A30

Program Name: IBM Rational Software Architect Simulation Toolkit V8.0
Program Number: 5725-A30

Evaluation Period

The evaluation period begins on the date that Licensee agrees to the terms of this Agreement and ends after 30 days.

Supporting Programs

The Program is licensed as a multi-product package and includes the Supporting Programs identified below. Licensee is authorized to install and use such Supporting Programs only to support Licensee's use of the Principal Program under this Agreement and within the limits of the Proofs of Entitlement for the Program (unless broader rights are provided elsewhere in this License Information document). The phrase "to support Licensee's use" would include only those uses that are necessary or otherwise directly related to a licensed use of the Principal Program or another Supporting Program. The Supporting Programs may not be used for any other purpose. Licensee is not authorized to transfer or remarket the Supporting Programs separate from the Principal Program. The terms of this Agreement may replace or modify the license terms for the Supporting Programs. In the event of conflict, these terms supersede the terms of the license agreement which accompanies the Supporting Programs. When Licensee's right to

use the Program expires or terminates, Licensee must discontinue use, destroy or promptly return all copies of the Supporting Programs to the party from whom Licensee acquired the Program. If Licensee downloaded the Supporting Programs, Licensee should contact the party from whom Licensee acquired the Program. If Licensee wishes to license the Supporting Programs for any use beyond the limits set forth above, please contact an IBM Sales Representative or the party from whom Licensee acquired the Program to obtain the appropriate license.

The following are Supporting Programs licensed with the Program:
1. IBM(R) 32-bit Runtime Environment for Windows(R), Java(TM) Technology Edition, Version 6 (IBM JRE 1.6 SR8)
2. IBM Rational Agent Controller V8.3
3. IBM WebSphere Application Server Test Environment and Stubs 6.1, 7.0, and 8.0
4. IBM Installation Manager 1.4.1

Separately Licensed Code

The provisions of this paragraph do not apply to the extent they are held to be invalid or unenforceable under the law that governs this license. Each of the components listed below is considered "Separately Licensed Code". IBM Separately Licensed Code is licensed to Licensee under the terms of the applicable third party license agreement(s) set forth in the NON_IBM_LICENSE file(s) that accompanies the Program. Notwithstanding any of the terms in the Agreement, or any other agreement Licensee may have with IBM, the terms of such third party license agreement(s) governs Licensee's use of all Separately Licensed Code unless otherwise noted below.

Future Program updates or fixes may contain additional Separately Licensed Code. Such additional Separately Licensed Code and related licenses are listed in another NON_IBM_LICENSE file that accompanies the Program update or fix. Licensee acknowledges that Licensee has read and agrees to the license agreements contained in the NON_IBM_LICENSE file(s). If Licensee does not agree to the terms of these third party license agreements, Licensee may not use the Separately Licensed Code.

For Programs acquired under the International Program License Agreement ("IPLA") or International Program License Agreement for Non Warranted Program ("ILAN") and Licensee is the original licensee of the Program, if Licensee does not agree with the third party license agreements, Licensee may return the Program in accordance with the terms of, and within the specified time frames stated in, the "Money-back Guarantee" section of the IPLA or ILAN IBM Agreement.

Note: Notwithstanding any of the terms in the third party license agreement, the Agreement, or any other agreement Licensee may have with IBM:
(a) IBM provides this Separately Licensed Code to Licensee WITHOUT WARRANTIES OF ANY KIND;
(b) IBM DISCLAIMS ANY AND ALL EXPRESS AND IMPLIED WARRANTIES AND CONDITIONS INCLUDING, BUT NOT LIMITED TO, THE WARRANTY OF TITLE, NON-INFRINGEMENT OR INTERFERENCE AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO THE SEPARATELY LICENSED CODE;
(c) IBM is not liable to Licensee, and will not defend, indemnify, or hold Licensee harmless for any claims arising from or related to the Separately Licensed Code; and
(d) IBM is not liable for any direct, indirect, incidental, special, exemplary, punitive or consequential damages including, but not limited to, lost data, lost savings, and lost profits, with respect to the Separately Licensed Code.

Notwithstanding these exclusions, in Germany and Austria, IBM's warranty and liability for the Separately Licensed Code is governed only by the respective terms applicable for Germany and Austria in IBM license agreements.

Note: IBM may provide limited support for some Separately Licensed Code. If such support is available, the details and any additional terms related to such support will be set forth in the License Information document.

The following are Separately Licensed Code:
Cairo Binding,
Mozilla Binding
Eclipse 3.6,
Eclipse BIRT 2.6.0,
Eclipse CDT 7.0.0,
Eclipse EMF 2.6.0,
Eclipse EMF-Model Query 1.4.0,
Eclipse EMF-Model Transaction 1.4.0,
Eclipse EMF-Validation Framework 1.4.0,
Eclipse Equinox (OSGi Services) 3.6,
Eclipse GEF 3.6,
Eclipse GMF 2.3.0,
Eclipse M2T-JET 1.1.0,
Eclipse OCL 3.0.0M6,
Eclipse UML2 3.1.0,
Eclipse WTP 3.2.0,
Eclipse XSD 2.6.0,
Carbon Binding,
LPG Runtime 1.1

Source Components

The Program may include some components in source code form ("Source Components"). Licensee may copy and modify Source Components for internal use only provided such use is within the limits of the license rights under this Agreement, provided however that Licensee may not alter or delete any copyright information or notices contained in the Source Components. IBM provides the Source Components without obligation of support and "AS IS", WITH NO WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING THE WARRANTY OF TITLE, NON-INFRINGEMENT OR NON-INTERFERENCE AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

For Source Components listed in a Program's REDIST file, Licensee may redistribute modified versions of those Source Components consistent with the terms of this license and any instructions in the REDIST file applicable to those Source Components.

Program Keys

For Programs which require keys to operate, Licensee may not have more keys to the Program in Licensee's Enterprise than Licensee has entitlements.

Program-unique Terms

MULTI-PROGRAM OFFERING

Programs may be licensed as part of a 'suite' or a multi- program offering. The separate Programs comprising the suite or multi-program offering may not be used simultaneously by different users, and may be used by only one user at a time. If third party software is included with any Program, the third party software may not be separated from, or used independently of, the Program.

IBM WEBSPHERE APPLICATION SERVER

WEBSPHERE APPLICATION SERVER: The Program is accompanied by multiple copies of WebSphere Application Server, including copies of WebSphere Application Server included in the Program's "unit test environment". Licensee is authorized to install each component of these copies of the WebSphere Application Server on the same machine as the remainder of the Program for use by a single developer for purposes of "unit testing", which is limited to testing of code written or generated by such developer to confirm that such code functions as designed. Licensee is not authorized to use copies of the WebSphere Application Server components installed and used under Unit Test Proofs of Entitlement for the following purposes: testing applications on servers separate from the developer's machine; or simulating production workloads or testing scalability of any code, application or system. The WebSphere Application Server components cannot be used for production purposes.

JRPC DEVELOPMENT KIT

The following are certain rights and restrictions associated with the inclusion of the JRPC Development Kit in the Program. By installing the Program, Licensee agrees to the following terms and conditions:

The JRPC Development Kit is not designed or intended for use in on-line control of aircraft, air traffic, aircraft navigation or aircraft communications; or in the design, construction, operation or maintenance of any nuclear facility. Licensee warrants that it will not use the JRPC Development Kit for such purposes.

DISTRIBUTION OF JRE REDISTRIBUTABLES

Licensee may distribute the software listed below (the "JRE Redistributables") only in conjunction with Licensee's application and subject to the following terms: (1) Licensee's redistribution of the JRE Redistributables must be in object code and must comply with all technical and user directions provided with the Program; (2) Licensee's application must redistribute other Redistributables identified in this license with the JRE Redistributables unless Licensee's application is designed to run only on general computer devices (e.g., desktops and servers) and not pervasive devices; (3) Licensee may not remove any copyright or notice files contained in the JRE Redistributables; (4) Licensee will indemnify IBM or third parties that provide IBM products ("Third Parties") from and against any third party claim arising out of the use or distribution of Licensee's application; (5) Licensee may not use the same path name as the original files/modules; (6) Licensee may not use IBM's or Third Parties' names or trademarks in connection with the marketing of Licensee's applications without IBM's or Third Parties' prior written consent; and (7) IBM or Third Parties provide copies of these files or modules "AS IS," i. e., Licensee is responsible for all technical assistance for Licensee's application.

In Licensee's license agreement with the recipient, Licensee will notify the recipient that these files or modules may not be 1) used for any purpose other than to enable Licensee's application, 2) copied (except for backup purposes), 3) further distributed without Licensee's application or 4) reverse assembled, reverse compiled, or otherwise translated.

The JRE Redistributables software can be found in the following directory on the installation media:

/jdk/jre

D/N: L-KHUY-86FJAT
P/N: L-KHUY-86FJAT

LICENSE INFORMATION

The Programs listed below are licensed under the following terms and conditions in addition to those of the International Program License Agreement.

Program Name: IBM Rational Software Architect 8.0
Program Number: 5725-A30

Program Name: IBM Rational Software Architect Extension for Integrated Architecture Frameworks V8.0
Program Number: 5725-A30

Program Name: IBM Rational Software Architect Extension for Deployment Planning V8.0
Program Number: 5725-A30

Program Name: IBM Rational Software Architect Extension for C++ V8.0
Program Number: 5725-A30

Program Name: IBM Rational Software Architect Extension for SOA and WebSphere V8.0
Program Number: 5725-A30

Program Name: IBM Rational Software Architect Extension for Communications V8.0
Program Number: 5725-A30

Program Name: IBM Rational Software Architect Simulation Toolkit V8.0
Program Number: 5725-A30

Supporting Programs

The Program is licensed as a multi-product package and includes the Supporting Programs identified below. Licensee is authorized to install and use such Supporting Programs only to support Licensee's use of the Principal Program under this Agreement and within the limits of the Proofs of Entitlement for the Program (unless broader rights are provided elsewhere in this License Information document). The phrase "to support Licensee's use" would include only those uses that are necessary or otherwise directly related to a licensed use of the Principal Program or another Supporting Program. The Supporting Programs may not be used for any other purpose. Licensee is not authorized to transfer or remarket the Supporting Programs separate from the Principal Program. The terms of this Agreement may replace or modify the license terms for the Supporting Programs. In the event of conflict, these terms supersede the terms of the license agreement which accompanies the Supporting Programs. When Licensee's right to use the Program expires or terminates, Licensee must discontinue use, destroy or promptly return all copies of the Supporting Programs to the party from whom Licensee acquired the Program. If Licensee downloaded the Supporting Programs, Licensee should contact the party from whom Licensee acquired the Program. If Licensee wishes to license the Supporting Programs for any use beyond the limits set forth above, please contact an IBM Sales Representative or the party from whom Licensee acquired the

Program to obtain the appropriate license.

The following are Supporting Programs licensed with the Program:
1. IBM(R) 32-bit Runtime Environment for Windows(R), Java(TM) Technology Edition, Version 6 (IBM JRE 1.6 SR8)
2. IBM Rational Agent Controller V8.3
3. IBM WebSphere Application Server Test Environment and Stubs 6.1, 7.0, and 8.0
4. IBM Installation Manager 1.4.1

Separately Licensed Code

The provisions of this paragraph do not apply to the extent they are held to be invalid or unenforceable under the law that governs this license. Each of the components listed below is considered "Separately Licensed Code". IBM Separately Licensed Code is licensed to Licensee under the terms of the applicable third party license agreement(s) set forth in the NON_IBM_LICENSE file(s) that accompanies the Program. Notwithstanding any of the terms in the Agreement, or any other agreement Licensee may have with IBM, the terms of such third party license agreement(s) governs Licensee's use of all Separately Licensed Code unless otherwise noted below.

Future Program updates or fixes may contain additional Separately Licensed Code. Such additional Separately Licensed Code and related licenses are listed in another NON_IBM_LICENSE file that accompanies the Program update or fix. Licensee acknowledges that Licensee has read and agrees to the license agreements contained in the NON_IBM_LICENSE file(s). If Licensee does not agree to the terms of these third party license agreements, Licensee may not use the Separately Licensed Code.

For Programs acquired under the International Program License Agreement ("IPLA") or International Program License Agreement for Non Warranted Program ("ILAN") and Licensee is the original licensee of the Program, if Licensee does not agree with the third party license agreements, Licensee may return the Program in accordance with the terms of, and within the specified time frames stated in, the "Money-back Guarantee" section of the IPLA or ILAN IBM Agreement.

Note: Notwithstanding any of the terms in the third party license agreement, the Agreement, or any other agreement Licensee may have with IBM:
(a) IBM provides this Separately Licensed Code to Licensee WITHOUT WARRANTIES OF ANY KIND;
(b) IBM DISCLAIMS ANY AND ALL EXPRESS AND IMPLIED WARRANTIES AND CONDITIONS INCLUDING, BUT NOT LIMITED TO, THE WARRANTY OF TITLE, NON-INFRINGEMENT OR INTERFERENCE AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO THE SEPARATELY LICENSED CODE;
(c) IBM is not liable to Licensee, and will not defend, indemnify, or hold Licensee harmless for any claims arising from or related to the Separately Licensed Code; and
(d) IBM is not liable for any direct, indirect, incidental, special, exemplary, punitive or consequential damages including, but not limited to, lost data, lost savings, and lost profits, with respect to the Separately Licensed Code.

Notwithstanding these exclusions, in Germany and Austria, IBM's warranty and liability for the Separately Licensed Code is governed only by the respective terms applicable for Germany and Austria in IBM license agreements.

Note: IBM may provide limited support for some Separately Licensed Code. If such support is available,

the details and any additional terms related to such support will be set forth in the License Information document.

The following are Separately Licensed Code:
Cairo Binding,
Mozilla Binding
Eclipse 3.6,
Eclipse BIRT 2.6.0,
Eclipse CDT 7.0.0,
Eclipse EMF 2.6.0,
Eclipse EMF-Model Query 1.4.0,
Eclipse EMF-Model Transaction 1.4.0,
Eclipse EMF-Validation Framework 1.4.0,
Eclipse Equinox (OSGi Services) 3.6,
Eclipse GEF 3.6,
Eclipse GMF 2.3.0,
Eclipse M2T-JET 1.1.0,
Eclipse OCL 3.0.0M6,
Eclipse UML2 3.1.0,
Eclipse WTP 3.2.0,
Eclipse XSD 2.6.0,
Carbon Binding,
LPG Runtime 1.1

Redistributables

If the Program includes components that are Redistributable, they will be identified in the REDIST file that accompanies the Program. In addition to the license rights granted in the Agreement, Licensee may distribute the Redistributables subject to the following terms:
1) Redistribution must be in object code form only and must conform to all directions, instruction and specifications in the Program's accompanying REDIST or documentation;
2) If the Program's accompanying documentation expressly allows Licensee to modify the Redistributables, such modification must conform to all directions, instruction and specifications in that documentation and these modifications, if any, must be treated as Redistributables;
3) Redistributables may be distributed only as part of Licensee's application that was developed using the Program ("Licensee's Application") and only to support Licensee's customers in connection with their use of Licensee's Application. Licensee's application must constitute significant value add such that the Redistributables are not a substantial motivation for the acquisition by end users of Licensee's software product;
4) If the Redistributables include a Java Runtime Environment, Licensee must also include other non-Java Redistributables with Licensee's Application, unless the Application is designed to run only on general computer devices (e.g., laptops, desktops and servers) and not on handheld or other pervasive devices (i.e., devices that contain a microprocessor but do not have computing as their primary purpose);
5) Licensee may not remove any copyright or notice files contained in the Redistributables;
6) Licensee must hold IBM, its suppliers or distributors harmless from and against any claim arising out of the use or distribution of Licensee's Application;
7) Licensee may not use the same path name as the original Redistributable files/modules;
8) Licensee may not use IBM's, its suppliers or distributors names or trademarks in connection with the marketing of Licensee's Application without IBM's or that supplier's or distributor's prior written consent;
9) IBM, its suppliers and distributors provide the Redistributables and related documentation without obligation of support and "AS IS", WITH NO WARRANTY OF ANY KIND, EITHER EXPRESS OR

IMPLIED, INCLUDINGTHE WARRANTY OF TITLE, NON-INFRINGEMENT OR NON-INTERFERENCE AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.;
10) Licensee is responsible for all technical assistance for Licensee's Application and any modifications to the Redistributables; and
11) Licensee's license agreement with the end user of Licensee's Application must notify the end user that the Redistributables or their modifications may not be i) used for any purpose other than to enable Licensee's Application, ii) copied (except for backup purposes), iii) further distributed or transferred without Licensee's Application or iv) reverse assembled, reverse compiled, or otherwise translated except as specifically permitted by law and without the possibility of a contractual waiver. Furthermore, Licensee's license agreement must be at least as protective of IBM as the terms of this Agreement.

Source Components

The Program may include some components in source code form ("Source Components"). Licensee may copy and modify Source Components for internal use only provided such use is within the limits of the license rights under this Agreement, provided however that Licensee may not alter or delete any copyright information or notices contained in the Source Components. IBM provides the Source Components without obligation of support and "AS IS", WITH NO WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING THE WARRANTY OF TITLE, NON-INFRINGEMENT OR NON-INTERFERENCE AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

For Source Components listed in a Program's REDIST file, Licensee may redistribute modified versions of those Source Components consistent with the terms of this license and any instructions in the REDIST file applicable to those Source Components.

Program Keys

For Programs which require keys to operate, Licensee may not have more keys to the Program in Licensee's Enterprise than Licensee has entitlements.

Authorized User

Authorized User is a unit of measure by which the Program can be licensed. An Authorized User is a unique person who is given access to the Program. The Program may be installed on any number of computers or servers and each Authorized User may have simultaneous access to any number of instances of the Program at one time. Licensee must obtain separate, dedicated entitlements for each Authorized User accessing the Program in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

Floating User Single Install

Floating User Single Install is a unit of measure by which the Program can be licensed. A Floating User is a person who is accessing the Program at any particular point in time. An Install is an installed copy of the Program on a physical or virtual disk made available to be executed on a computer. The Program may be installed on any number of computers or servers, but if the Floating User simultaneously accesses more than one Install of the Program, the Floating User requires a separate entitlement for each such Install. Licensee must obtain separate entitlements for each Floating User simultaneously accessing the Program on each Install in any manner directly or indirectly (for example: via a multiplexing

program, device, or application server) through any means.

Program-unique Terms

MULTI-PROGRAM OFFERING

Programs may be licensed as part of a 'suite' or a multi- program offering. The separate Programs comprising the suite or multi-program offering may not be used simultaneously by different users, and may be used by only one user at a time. If third party software is included with any Program, the third party software may not be separated from, or used independently of, the Program.

IBM WEBSPHERE APPLICATION SERVER

WEBSPHERE APPLICATION SERVER: The Program is accompanied by multiple copies of WebSphere Application Server, including copies of WebSphere Application Server included in the Program's "unit test environment". Licensee is authorized to install each component of these copies of the WebSphere Application Server on the same machine as the remainder of the Program for use by a single developer for purposes of "unit testing", which is limited to testing of code written or generated by such developer to confirm that such code functions as designed. Licensee is not authorized to use copies of the WebSphere Application Server components installed and used under Unit Test Proofs of Entitlement for the following purposes: testing applications on servers separate from the developer's machine; or simulating production workloads or testing scalability of any code, application or system. The WebSphere Application Server components cannot be used for production purposes.

JRPC DEVELOPMENT KIT

The following are certain rights and restrictions associated with the inclusion of the JRPC Development Kit in the Program. By installing the Program, Licensee agrees to the following terms and conditions:

The JRPC Development Kit is not designed or intended for use in on-line control of aircraft, air traffic, aircraft navigation or aircraft communications; or in the design, construction, operation or maintenance of any nuclear facility. Licensee warrants that it will not use the JRPC Development Kit for such purposes.

DISTRIBUTION OF JRE REDISTRIBUTABLES

Licensee may distribute the software listed below (the "JRE Redistributables") only in conjunction with Licensee's application and subject to the following terms: (1) Licensee's redistribution of the JRE Redistributables must be in object code and must comply with all technical and user directions provided with the Program; (2) Licensee's application must redistribute other Redistributables identified in this license with the JRE Redistributables unless Licensee's application is designed to run only on general computer devices (e.g., desktops and servers) and not pervasive devices; (3) Licensee may not remove any copyright or notice files contained in the JRE Redistributables; (4) Licensee will indemnify IBM or third parties that provide IBM products ("Third Parties") from and against any third party claim arising out of the use or distribution of Licensee's application; (5) Licensee may not use the same path name as the original files/modules; (6) Licensee may not use IBM's or Third Parties' names or trademarks in connection with the marketing of Licensee's applications without IBM's or Third Parties' prior written consent; and (7) IBM or Third Parties provide copies of these files or modules "AS IS," i. e., Licensee is responsible for all technical assistance for Licensee's application.

In Licensee's license agreement with the recipient, Licensee will notify the recipient that these files or modules may not be 1) used for any purpose other than to enable Licensee's application, 2) copied

(except for backup purposes), 3) further distributed without Licensee's application or 4) reverse assembled, reverse compiled, or otherwise translated.

The JRE Redistributables software can be found in the following directory on the installation media:

/jdk/jre

LICENSE INFORMATION

The Programs listed below are licensed under the following terms and conditions in addition to those of the International Program License Agreement.

Program Name: IBM Rational AppScan Standard Edition v 7.9.0.3
Program Number: 5724-T59

Program Name: IBM Rational AppScan Tester Edition v 7.9.0.3
Program Number: 5724-T51

Program Name: IBM Rational AppScan Express v 7.9.0.3
Program Number: 5724V91

Program Keys

For Programs which require keys to operate, Licensee may not have more keys to the Program in Licensee's Enterprise than Licensee has entitlements.

General Charge Terms

Based upon the Program license obtained, Licensee may use the Program as follows:

MULTI-PROGRAM OFFERING

Programs may be licensed as part of a 'suite' or a multi-program offering. The separate Programs comprising the suite or multi-program offering may not be used simultaneously by different users, and may be used by only one user at a time. If third party software is included with any Program, the third party software may not be separated from, or used independently of, the Program.

Some of the components of the Program may be provided in source-code form. Notwithstanding anything to the contrary in the Agreement, Licensee may modify the components of the Program provided in source-code form; provided, however, that Support is only provided for the unmodified, binary code versions of these components included in Program packaging, and not for the source-code for these components or for any modifications of such components Licensee may create. IBM is providing this source-code on an "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND (EITHER EXPRESS OR IMPLIED) INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND ANY WARRANTY OF NON-INFRINGMENT.

The Program performs invasive and non-invasive tests on the website and web application Licensee chooses to scan, which testing entails certain risks, including without limitation the following:

a. Licensee's computer systems may hang or crash, resulting in temporary system unavailability or loss

SCAN ANY WEBSITES AND/OR APPLICATIONS OTHER THAN WEBSITES AND/OR APPLICATIONS OWNED BY LICENSEE OR THOSE THAT LICENSEE HAS THE RIGHT AND AUTHORITY TO SCAN. LICENSEE WILL INDEMNIFY IBM IN FULL FOR LICENSEE'S FAILURE TO COMPLY WITH THE TERMS OF THIS LICENSE OR APPLICABLE LAWS.

Program-unique Terms

Based upon the Program license obtained, Licensee may use the Program as follows:

License Type - Floating User License:
Licensee may utilize the Program, including installation of the Program on multiple clients or servers, provided that the total number of concurrent users does not exceed the total number of Floating User licenses obtained for the Program. Licensee is required to provide a report of all Program use to IBM upon IBM's reasonable request.

License Type - Authorized User License:
An Authorized User License must be obtained for each individual user accessing the Program in any manner. Each Authorized User License is attributable to one and only one individual user. An Authorized User License may only be reassigned for the long-term replacement of personnel. A Program licensed under an Authorized User License may be installed on a single computer, and accessed by multiple users, provided that an Authorized User License has been obtained for each individual user. The Program may be installed and used on a server, provided that a separate Authorized User License is obtained for each individual user accessing the Program. Licensee is required to provide a report of all Program use to IBM upon IBM's reasonable request.

FIXED TERM LICENSE
If Licensee acquires the Program under a fixed term license the following terms apply: Licensee may use the Program only for a limited period of time, called "fixed term". The fixed term will be specified in the Program's PoE. IBM may agree to extend the fixed term for an additional payment. If Licensee wishes to continue to use the Program beyond the fixed term, contact IBM or your IBM reseller prior to the expiration of the fixed term.

MULTI-PROGRAM OFFERING
Programs may be licensed as part of a 'suite' or a multi-program offering. The separate Programs comprising the suite or multi-program offering may not be used simultaneously by different users, and may be used by only one user at a time. If third party software is included with any Program, the third party software may not be separated from, or used independently of, the Program.

Some of the components of the Program may be provided in source-code form. Notwithstanding anything to the contrary in the Agreement, Licensee may modify the components of the Program provided in source-code form; provided, however, that Support is only provided for the unmodified, binary code versions of these components included in Program packaging, and not for the source-code for these components or for any modifications of such components Licensee may create. IBM is providing this source-code on an "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND (EITHER EXPRESS OR IMPLIED) INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND ANY WARRANTY OF NON-INFRINGMENT.

The Program performs invasive and non-invasive tests on the website and web application Licensee chooses to scan, which testing entails certain risks, including without limitation the following:

a. Licensee's computer systems may hang or crash, resulting in temporary system unavailability or loss of data;
b. the performance and throughput of Licensee's systems, as well as the performance and throughput of associated routers and firewalls, may be temporarily degraded during testing;
c. excessive amounts of log messages may be generated, resulting in excessive log file disk space consumption;
d. data may be changed or deleted as a result of probing vulnerabilities;
e. alarms may be triggered by intrusion detection systems;
f. emails may be triggered by the email function of the web application being tested;
g. the Program may intercept the traffic of the monitored network for the purpose of looking for events.

IBM MAKES NO REPRESENTATION OR WARRANTY AS TO THE FITNESS OF THE PROGRAM FOR LICENSEE'S PARTICULAR WEBSITE, WEB APPLICATION OR TECHNICAL ENVIRONMENT. REGARDLESS OF OTHER STATEMENTS MADE AT OR BEFORE THE TIME OF PURCHASE, IT IS LICENSEE'S RESPONSIBILITY TO DETERMINE IF THE PROGRAM IS APPROPRIATE OR SAFE FOR LICENSEE'S WEBSITE, WEB APPLICATION OR TECHNICAL ENVIRONMENT. LICENSEE ACKNOWLEDGES AND ACCEPTS ALL RISKS ASSOCIATED WITH THE USE OF THE PROGRAM.

The Program is designed to identify a variety of potential security and compliance issues in web applications and web services. It does not test all vulnerabilities or compliance risks, nor does it act as a barrier to security attacks. IBM does not represent or warrant that the Program will provide complete security vulnerability or compliance information or that Licensee's web application or web services is secure or compliant. Security threats, regulations and standards continually change, and the Program may not reflect all such changes. The security and compliance of Licensee's website, systems and employees, and any remedial actions, are Licensee's responsibility alone. It is solely within Licensee's discretion to use or not use any of the information provided by the Program. Accordingly, IBM will not be liable for any actions that Licensee takes or chooses not to take based on the Program.

The Program creates reports that describe general compliance-related risks. THE INFORMATION PROVIDED DOES NOT CONSTITUTE LEGAL ADVICE. LICENSEES ARE RESPONSIBLE FOR ENSURING THEIR OWN COMPLIANCE WITH LEGAL REQUIREMENTS. IT IS THE LICENSEE'S SOLE RESPONSIBILITY TO OBTAIN ADVICE OF COMPETENT LEGAL COUNSEL AS TO THE IDENTIFICATION AND INTERPRETATION OF ANY RELEVANT LAWS AND REGULATORY REQUIREMENTS THAT MAY AFFECT THE CUSTOMER'S BUSINESS AND ANY ACTIONS THE LICENSEE MAY NEED TO TAKE TO COMPLY WITH SUCH LAWS.

Licensee shall not, directly or indirectly use the Program (i) to provide services to third parties, including hosting, outsourcing or subscription services; (ii) to publish or provide to a third party any scan results, reports or benchmark tests; (iii) otherwise process or permit to be processed the data and/or applications of a third party; or, (iv) provide training to third parties. However, if Licensee's POE designates that Licensee has a Consultant Term License, items (i) and (ii) shall not apply to Licensee's use of the Program. Independent contractors engaged by Licensee to provide website related services to Licensee may use the program solely for providing services to Licensee.

The Money-back Guarantee in the IPLA does not apply to the Program when acquired under a Consultant Term License.

The program contains CodeBase.dll and CodeBaseBackEnd.dll libraries. Licensee shall not use these libraries for the purposes of computer programming.

Certain laws prohibit any unauthorized attempt to penetrate or access computer systems. LICENSEE

REPRESENTS AND WARRANTS THAT LICENSEE SHALL NOT USE THE PROGRAM TO SCAN ANY WEBSITES AND/OR APPLICATIONS OTHER THAN WEBSITES AND/OR APPLICATIONS OWNED BY LICENSEE OR THOSE THAT LICENSEE HAS THE RIGHT AND AUTHORITY TO SCAN. LICENSEE WILL INDEMNIFY IBM IN FULL FOR LICENSEE'S FAILURE TO COMPLY WITH THE TERMS OF THIS LICENSE OR APPLICABLE LAWS.

The Money-back Guarantee in the IPLA does not apply to the Program when acquired under a Consultant Term License.

The program contains CodeBase.dll and CodeBaseBackEnd.dll libraries. Licensee shall not use these libraries for the purposes of computer programming.

Certain laws prohibit any unauthorized attempt to penetrate or access computer systems. LICENSEE REPRESENTS AND WARRANTS THAT LICENSEE SHALL NOT USE THE PROGRAM TO

SCAN ANY WEBSITES AND/OR APPLICATIONS OTHER THAN WEBSITES AND/OR APPLICATIONS OWNED BY LICENSEE OR THOSE THAT LICENSEE HAS THE RIGHT AND AUTHORITY TO SCAN. LICENSEE WILL INDEMNIFY IBM IN FULL FOR LICENSEE'S FAILURE TO COMPLY WITH THE TERMS OF THIS LICENSE OR APPLICABLE LAWS.

Program-unique Terms

Based upon the Program license obtained, Licensee may use the Program as follows:

License Type - Floating User License:
Licensee may utilize the Program, including installation of the Program on multiple clients or servers, provided that the total number of concurrent users does not exceed the total number of Floating User licenses obtained for the Program. Licensee is required to provide a report of all Program use to IBM upon IBM's reasonable request.

License Type - Authorized User License:
An Authorized User License must be obtained for each individual user accessing the Program in any manner. Each Authorized User License is attributable to one and only one individual user. An Authorized User License may only be reassigned for the long-term replacement of personnel. A Program licensed under an Authorized User License may be installed on a single computer, and accessed by multiple users, provided that an Authorized User License has been obtained for each individual user. The Program may be installed and used on a server, provided that a separate Authorized User License is obtained for each individual user accessing the Program. Licensee is required to provide a report of all Program use to IBM upon IBM's reasonable request.

FIXED TERM LICENSE
If Licensee acquires the Program under a fixed term license the following terms apply: Licensee may use the Program only for a limited period of time, called "fixed term". The fixed term will be specified in the Program's PoE. IBM may agree to extend the fixed term for an additional payment. If Licensee wishes to continue to use the Program beyond the fixed term, contact IBM or your IBM reseller prior to the expiration of the fixed term.

MULTI-PROGRAM OFFERING
Programs may be licensed as part of a 'suite' or a multi-program offering. The separate Programs comprising the suite or multi-program offering may not be used simultaneously by different users, and may be used by only one user at a time. If third party software is included with any Program, the third party software may not be separated from, or used independently of, the Program.

Some of the components of the Program may be provided in source-code form. Notwithstanding anything to the contrary in the Agreement, Licensee may modify the components of the Program provided in source-code form; provided, however, that Support is only provided for the unmodified, binary code versions of these components included in Program packaging, and not for the source-code for these components or for any modifications of such components Licensee may create. IBM is providing this source-code on an "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND (EITHER EXPRESS OR IMPLIED) INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND ANY WARRANTY OF NON-INFRINGMENT.

The Program performs invasive and non-invasive tests on the website and web application Licensee chooses to scan, which testing entails certain risks, including without limitation the following:

a. Licensee's computer systems may hang or crash, resulting in temporary system unavailability or loss of data;
b. the performance and throughput of Licensee's systems, as well as the performance and throughput of associated routers and firewalls, may be temporarily degraded during testing;
c. excessive amounts of log messages may be generated, resulting in excessive log file disk space consumption;
d. data may be changed or deleted as a result of probing vulnerabilities;
e. alarms may be triggered by intrusion detection systems;
f. emails may be triggered by the email function of the web application being tested;
g. the Program may intercept the traffic of the monitored network for the purpose of looking for events.

IBM MAKES NO REPRESENTATION OR WARRANTY AS TO THE FITNESS OF THE PROGRAM FOR LICENSEE'S PARTICULAR WEBSITE, WEB APPLICATION OR TECHNICAL ENVIRONMENT. REGARDLESS OF OTHER STATEMENTS MADE AT OR BEFORE THE TIME OF PURCHASE, IT IS LICENSEE'S RESPONSIBILITY TO DETERMINE IF THE PROGRAM IS APPROPRIATE OR SAFE FOR LICENSEE'S WEBSITE, WEB APPLICATION OR TECHNICAL ENVIRONMENT. LICENSEE ACKNOWLEDGES AND ACCEPTS ALL RISKS ASSOCIATED WITH THE USE OF THE PROGRAM.

The Program is designed to identify a variety of potential security and compliance issues in web applications and web services. It does not test all vulnerabilities or compliance risks, nor does it act as a barrier to security attacks. IBM does not represent or warrant that the Program will provide complete security vulnerability or compliance information or that Licensee's web application or web services is secure or compliant. Security threats, regulations and standards continually change, and the Program may not reflect all such changes. The security and compliance of Licensee's website, systems and employees, and any remedial actions, are Licensee's responsibility alone. It is solely within Licensee's discretion to use or not use any of the information provided by the Program. Accordingly, IBM will not be liable for any actions that Licensee takes or chooses not to take based on the Program.

The Program creates reports that describe general compliance-related risks. THE INFORMATION PROVIDED DOES NOT CONSTITUTE LEGAL ADVICE. LICENSEES ARE RESPONSIBLE FOR ENSURING THEIR OWN COMPLIANCE WITH LEGAL REQUIREMENTS. IT IS THE LICENSEE'S SOLE RESPONSIBILITY TO OBTAIN ADVICE OF COMPETENT LEGAL COUNSEL AS TO THE IDENTIFICATION AND INTERPRETATION OF ANY RELEVANT LAWS AND REGULATORY REQUIREMENTS THAT MAY AFFECT THE CUSTOMER'S BUSINESS AND ANY ACTIONS THE LICENSEE MAY NEED TO TAKE TO COMPLY WITH SUCH LAWS.

Licensee shall not, directly or indirectly use the Program (i) to provide services to third parties, including hosting, outsourcing or subscription services; (ii) to publish or provide to a third party any scan results, reports or benchmark tests; (iii) otherwise process or permit to be processed the data and/or applications of a third party; or, (iv) provide training to third parties. However, if Licensee's POE designates that Licensee has a Consultant Term License, items (i) and (ii) shall not apply to Licensee's use of the Program. Independent contractors engaged by Licensee to provide website related services to Licensee may use the program solely for providing services to Licensee.

The Money-back Guarantee in the IPLA does not apply to the Program when acquired under a Consultant Term License.

The program contains CodeBase.dll and CodeBaseBackEnd.dll libraries. Licensee shall not use these libraries for the purposes of computer programming.

Certain laws prohibit any unauthorized attempt to penetrate or access computer systems. LICENSEE

REPRESENTS AND WARRANTS THAT LICENSEE SHALL NOT USE THE PROGRAM TO SCAN ANY WEBSITES AND/OR APPLICATIONS OTHER THAN WEBSITES AND/OR APPLICATIONS OWNED BY LICENSEE OR THOSE THAT LICENSEE HAS THE RIGHT AND AUTHORITY TO SCAN. LICENSEE WILL INDEMNIFY IBM IN FULL FOR LICENSEE'S FAILURE TO COMPLY WITH THE TERMS OF THIS LICENSE OR APPLICABLE LAWS.

LICENSE INFORMATION

The Programs listed below are licensed under the following terms and conditions in addition to those of the International Program License Agreement.

Program Name: Rational Host Integration Solution for Multiplatforms or System z Authorized
Program Number: 5724V23
Authorization for Use on Home/Portable Computer: The Program may be stored on the primary machine and another machine, provided that the Program is not in active use on both machines at the same time.

Program Name: Rational Host Integration Solution for Multiplatforms or System z Concurrent
Program Number: 5724V24
Authorization for Use on Home/Portable Computer: The Program may be stored on the primary machine and another machine, provided that the Program is not in active use on both machines at the same time.

Limited Use Rights for Other IBM Programs

If You acquired this Program as part of another IBM Program ("Principal Program") that lists this Program under "Other IBM Programs", You received this Program only in support of the Principal Program, and Your rights to use this Program will be limited by the license of the Principal Program. Please contact Your IBM Sales Representative if You wish to acquire a separate license to this Program not limited by the Principal Program's license terms.

Benchmarking

You may disclose the results of any benchmark test of the Program or its subcomponents to any third party provided that You (A) publicly disclose the complete methodology used in the benchmark test (e.g., hardware and software setup, installation procedure and configuration files), (B) perform Your benchmark testing running the Program in its Specified Operating Environment using the latest applicable updates, patches and fixes available for the Program from IBM or third parties that provide IBM products ("Third Parties"), and (C) follow any and all performance tuning and "best practices" guidance available in the Program's documentation and on IBM's support web sites for the Program. If You publish the results of any benchmark tests for the Program, then notwithstanding anything to the contrary in any agreement between You and IBM or Third Parties, IBM and Third Parties shall have the right to publish the results of benchmark tests with respect to Your products provided IBM or Third Parties complies with the requirements of (A), (B) and (C) above in its testing of Your products.

The above benchmarking terms apply to the following Programs or subcomponents:
Rational Host Integration Solutions

Specified Operating Environment

The Program's specifications and specified operating environment information may be found in documentation accompanying the Program, if available, such as a read-me file, or other information

published by IBM, such as an announcement letter. You agree that such documentation and other Program content may be supplied only in the English language.

Program-unique Terms

The Rational Host Integration Solution for Multiplatforms or the Rational Host Integration Solution for System z, each defined as the "Program", is available based on two charging methods: Authorized User and Concurrent User. Please consult your Proof of Entitlement to determine which charging method applies to your license.

The Authorized User version of the Program consists of the following components:
IBM Personal Communications ("Personal Communications")
IBM WebSphere Host On-Demand ("HOD")
IBM Communications Servers ("Communications Servers")
IBM Rational Host Access Transformation Services ("HATS")
IBM Rational Developer for System z ("RDz")
IBM WebSphere Application Server Network Deployment ("WAS")

The Concurrent User version of the Program consists of the following components:
IBM WebSphere Host On-Demand ("HOD")
IBM Communications Servers ("Communications Servers")
IBM Rational Host Access Transformation Services ("HATS")
IBM Rational Developer for System z ("RDz")
IBM WebSphere Application Server Network Deployment ("WAS")

Entitlement to Program upgrades does not entitle you to upgrades to the individual components unless such components are upgraded as part of a Program upgrade. For example, if the HATS program product is upgraded, you will not be entitled to such upgrade unless a Program upgrade includes the upgraded version of HATS.

Except as modified herein, the use of the components will be governed by the license terms that accompany the components.

Program-Unique Terms

The Program is available based on two charging methods: Authorized User and Concurrent User. The charging methods only apply when the Program is used in a production environment. The number of Program licenses purchased must equal the number of Authorized Users and/or Concurrent Users accessing the Program from the Internet and/or intranet. The Authorized User charging method should be used in all cases where a user can be identified as an Authorized User, as defined below. This includes access from the Internet and intranet. The Concurrent User charging method should only be used in cases where access is from the Internet and a user cannot be identified as a Authorized User.

Authorized User

An Authorized User is one and only one individual, machine, program, or device with a specific identity (ID) within or outside Your enterprise.

A Proof of Entitlement is required for each Authorized User accessing the Program, or any Program component, either directly or indirectly through any means on behalf of the Authorized User. An example of "indirect" access would be through a multiplexing program, device, or application server. Connections (from either users or other applications) made to the Program through other products that

act as connection concentrators must be counted as Authorized Users and are subject to use-base charges based on the number of Authorized Users of those concentrators. An Authorized User license to the Program entitles a distinct Authorized User to access and use the components of the Program subject to the limitations under "Component Restrictions" below.

Customers that would like to deploy HATS rich client applications must purchase the Authorized User version of the Program.

Concurrent User

The Program defines a Concurrent User as any user who cannot be distinctly identified but accesses and uses (i) the Program or (ii) a connection to an existing application from the Program. Examples of connections would be TN3270, TN5250, VT, or JDBC connections. A Concurrent User Authorization must be acquired for each Concurrent User. The total number of Concurrent User Authorization must be equal to the maximum number of Concurrent Users that concurrently access and use the Program at any time. A Concurrent User license to the Program entitles such user to access and use the components of the Program as long as the total number of users concurrently accessing and using the components at any one time does not exceed the total number of Concurrent User authorizations you have acquired. Your use of the Program components is subject to the limitations under "Component Restrictions" below.

Component Restrictions

IBM Rational Host Access Transformation Services

The license to the Program entitles you to use the HATS Toolkit for an unlimited number of developers on an unlimited number of workstations for development purposes. The HATS applications (Runtime deployments), which are generated by the HATS Toolkit, must be in accordance with one of the charging methods above when deployed to production.

IBM Communications Server

The license to the Program entitles you to install and use any combination of IBM Communications Servers provided with the Program. This license entitles you to use the IBM Communications Servers in conjunction with the components of the Program in support of the Concurrent User or Authorized User licenses purchased.

IBM Personal Communications

The license to the Program entitles you to install and use IBM Personal Communications only with the purchase of the Authorized User charging method. The license to the Program does not entitle you to install and use IBM Personal Communications if you purchase the Concurrent User charging method.

IBM WebSphere Application Server

The Program is accompanied by WebSphere Application Server (WAS). The license to the Program entitles you to install and use one copy of WAS on a machine with a single processor provided that you acquire fifty (50) Authorized or Concurrent User authorizations. You may use one additional copy of WAS on one additional processor for each additional one hundred (100) Authorized or Concurrent User authorizations that you acquire.

HIS Authorized or Concurrent License/Total Copies of WAS

1-49/0
50-149/1
150-249/2
250-349/3
etc./etc.

For each copy of WAS to which you are entitled, you are authorized to install and use each component of WAS on a machine with a single processor. Alternatively, you may install and use each copy of WAS on a machine with multiple processors if you either:

i. allocate a copy of WAS to which you are entitled per this Agreement to each additional processor on such machine; or,

ii. acquire a Single Processor Proof of Entitlement of WAS for each additional processor on such machine; or,

iii. for partitionable iSeries and AS/400 machines running OS/400, allocate a copy of WAS to which you are entitled per this Agreement to each additional processor on such machine or acquire a Single Processor Proof of Entitlement of WAS for each processor actually used by the entitled copy of WAS on such machine, as measured or limited using IBM provided tools. To determine the number of processors in a machine actually used by the entitled copy of WAS, you may aggregate portions of physical processors used in the same machine, but you must acquire an additional Single Processor Proof of Entitlement of WAS for any remaining fraction of a processor in such machine used by the entitled copy of WAS after this aggregation.

This license entitles you to use the WAS components only to run Host Access Transformation Services and/or Host On-Demand components of the Program, to run objects created by these components, and to enable connections with these components to other applications and sources of data. This license does not for instance, entitle you to use the WAS components to run applications which do not require the Host Access Transformation Services and/or Host On-Demand components of the Program to operate. Except as modified by this Agreement, your use of the WAS components will be governed by the license terms that accompany the WAS components. If you wish to use the WAS components without these restrictions, you must purchase separate authorizations to use the WAS components.

IBM Rational Developer for System z

The license to the Program entitles you to install and use one (1) license of RDz component when you acquire fifty (50) Authorized or Concurrent User authorizations. Thereafter, you are entitled to install and use one (1) additional RDz for each additional one hundred (100) Authorized or Concurrent User authorizations you acquire, up to a total of five (5) licenses of RDz. This license entitles you to use the RDz component only to develop Host Access Transformation Services applications This license does not entitle you to develop other types of applications using RDz or use the capabilities of RDz for activities unrelated to HATS application development. If you wish to use the RDz component without these restrictions, you must purchase additional RDz licenses.
