Contract for the Provision of Mainframe Data Processing Hardware and Software for the Michigan Information Processing Center (MIPC) in accordance with the attached Cost Models, Terms and Conditions.

Estimated Contract Value: \$ 28,663,778.00

MICHIGAN INFORMATION TECHNOLOGY CONTRACT TERMS  
FOR  
DEPARTMENT OF MANAGEMENT AND BUDGET  
INVITATION TO BID NO. 07115001494

The following is the contract to be used to acquire the systems described in Invitation to Bid No. 07115001494 for the State of Michigan, Department of Management and Budget.

The following are MANDATORY TERMS to which the Contractor MUST agree without word modification.

- 1 Definition of Terms
- 2 Term of Contract
- 3 Installation and Delivery Dates
- 4 Liquidated Damages
- 5 Performance and Reliability Evaluation (PARE)
- 6 Terms of Use
- 7 Maintenance of Equipment
- 8 Alterations and Attachments
- 9 Major Field Modification
- 10 Patent and Copyright Protection
- 11 Training
- 12 Site Preparation
- 13 Transportation, Installation, Relocation, and Return of Equipment
- 14 Risk of Loss or Damage
- 15 Indemnification
- 16 Contractors Liability Insurance
- 17 Supplies
- 18 Taxes - Federal, State and Local
- 19 Title
- 20 Assignment
- 21 Cancellation
- 22 State's Obligation
- 23 Contractor's Obligation
- 24 Principal and Interest Schedule - Purchase Option
- 25 General

**Rider A**

**Terms and Conditions**

**Contract Number 071B5000692**

## RIDER A

### 1. DEFINITION OF TERMS

- A. Acceptance Date - The first day of the successful Performance and Reliability Evaluation (PARE) period. It is the date from which payments accrue
- B. Equipment - An all-inclusive term which refers either to individual machines or components, individually or collectively
- C. Equipment Failure - A malfunction in the equipment, excluding all software and external factors which prevents or impedes the accomplishment of a job.
- D. Hourly Equipment Rate - In the case of a leased machine, the monthly payment including maintenance per unit divided by 175.
- E. Installation Date - The date specified in the contract by which the Contractor must have the ordered equipment ready (certified) for use by the State.
- F. Job - One or more programs or routines necessary to achieve a specified objective.
- G. Liquidated Damages - A settlement due: (1) the State from the Contractor if the Contractor fails to install and make ready for use by the State the equipment designated in a Rider B on or before the installation date specified in that Rider B; (2) the State from the Contractor if the Contractor fails to deliver the programming aids (software) specified in a Rider B on or before the delivery date specified in that Rider B.
- H. Machine - An individual unit, including special features installed thereon, separately identified by a type and/or model number.
- I. Mechanical Replacement - The replacement of one machine for another occasioned by the mechanical condition of the machine being replaced
- J. Operational Use Time - That time during which equipment is in actual operation of State programs on a scheduled basis other than system generation. It is not synonymous with power-on time.
- K. Performance and Reliability Evaluation (PARE) - A period of time during which the State, by appropriate tests and production runs, evaluates the performance of the equipment.
- L. Preventive Maintenance - That maintenance performed by the Contractor which is designated to keep the equipment in proper operating condition. It is performed on a scheduled basis
- M. Principle Period of Maintenance (PPM) - Will be the same hours as the State's normal working hours (currently Monday through Friday, 8:00 a.m. to 5:00 p.m., excluding a one-hour lunch period, excepting State-observed holidays)
- N. Programming Aids - The licensed and unlicensed software furnished by the Contractor

- O. Remedial Maintenance - The maintenance performed by the Contractor which results from equipment failure and which is performed as required, and, therefore, on an unscheduled basis.
- P. On-Site - Under a Maintenance Agreement.
- Q. On-Call - Per call hourly charge

2. TERM OF CONTRACT

A. This contract is effective from the date hereof through 60 months and incorporates the following specific phases:

- 1) All equipment lease/purchases ~~or outright purchases~~ hereunder shall be initiated during the first 12 months of the contract period. *Outright purchases may be initiated during the full contract term.*
- 2) The term of the unlimited usage lease/purchase agreement for equipment is for the 48 months from the acceptance date of any units of equipment, subject to the terms thereof. If there are specific usage charges applicable to the lease/purchase agreement, they shall be as identified in the Cost Model
- 3) All hardware maintenance services as well as software licenses and related ancillary services shall be provided during the full contract term.

*LAFO*  
*[Signature]*

- B. Rider B shall designate mutually agreed upon installation and delivery dates; and, if applicable, removal dates of each leased machine under this agreement.
- C. The purchase price of equipment shall not increase for the life of the contract. If there are any general price reductions during the term of the contract, the State shall pay the reduced price for any equipment ordered after the reduction takes effect provided the State agrees to any terms and conditions associated with that price reduction
- D. Any equipment replaced or added to this contract shall be subject to the approval of the Office of Purchasing. Pricing for such equipment shall be shown to be consistent with the pricing levels of the originally contracted equipment. The Contractor shall supply documentation to the satisfaction of the Office of Purchasing to support such pricing of all additions to the contract.
- E. Should the State elect to exercise any lease extension, or purchase option, the Contractor shall offer continued maintenance support for the term of the contract as provided under the terms of this contract

3. INSTALLATION AND DELIVERY DATES

A. Equipment

- (1) The Contractor shall supply equipment ready for use as specified in ITB 07115001494
- (2) All hardware must be delivered and installed in operational order in accordance with the contract terms attached. The State will provide the vendor access to State sites for the purpose of delivering the equipment
- (3) Installation dates may be advanced by mutual consent of the Contractor and the State by amendment to Rider B, Part I. In advance of any installation date, the Contractor shall receive written notice from the State at least 30 days prior to the advanced installation date.

- (4) The State reserves the unilateral right to delay any installation. The Contractor shall receive written notice from the State at least 30 days prior to the scheduled installation date.
- (5) If the equipment is certified to be ready for use prior to the installation date, the State, at its option, may elect to use the equipment and change the installation date accordingly. In this event, the purchase order shall be amended accordingly.

#### 4 LIQUIDATED DAMAGES

The installation dates of the equipment set forth in Rider B and the delivery dates of programming aids set forth in Rider B have been fixed so that the utilization of the equipment and programming aids is consistent with the timing schedules of the State's programs. If any of the programming aids are not delivered to the State within the time limits specified in a specific Rider B, and if any of the units of equipment are not installed within the time specified in a specific Rider B, the delay will interfere with the proper implementation of the State's programs utilizing the equipment, whether leased or purchased pursuant to this contract, to the loss and damage of the State. From the nature of the case, it would be impracticable and extremely difficult to fix the actual damage sustained in the event of any such delay. The State and the Contractor, therefore, presume that in the event of any such delay, the amount of damage which will be sustained from a delay will be the amount set forth below, and they agree that in the event of any such delay, the Contractor shall pay such amount as liquidated damages and not as a penalty. The State at its option, for amounts due the State as liquidated damages, may deduct such from any money payable to the Contractor or may bill the Contractor as a separate item.

##### A. Equipment (Hardware)

- (1) If the Contractor does not install or deliver the system and/or machines (designated by the Contractor's type and model number), and special features and accessories included on a specific deliverable as scheduled in Rider B with the system and/or machines, ready for use, on or before the installation date of that deliverable in that Rider B, the Contractor shall pay to the State, as fixed and agreed, liquidated damages, for each calendar day between the installation date for such equipment specified in Rider B and the date of actual installation for such equipment, but not more than 180 calendar days in lieu of all other damages due to such non-installation, an amount of 1/1095th of the total contract payment (including contracted maintenance) due under that deliverable as scheduled in Rider B. If the Contractor supplies substitute equipment acceptable to the State, liquidated damages will not apply, provided, however, liquidated damages will apply if such substitute equipment is provided later than the installation date specified in the Rider B.
- (2) If some, but not all, of the machines under a Rider B deliverable are installed or delivered ready for use, by the installation date, and the State makes or may reasonably make operational use of any such installed machines, liquidated damages shall not accrue against those machines. The liquidated damages payment will be prorated accordingly. The use of machines for scheduled program development shall be included as operational use.
- (3) If the delay is more than thirty (30) calendar days, then by written notice to the Contractor, the State may terminate the right of the Contractor to install the equipment under a specific deliverable within Rider B, and may obtain substitute equipment. In this event, the Contractor shall be liable for liquidated damages in the amounts specified above until acceptable substitute equipment is installed, ready for use, or for 180 days from the original Rider B installation date, whichever occurs first. The Contractor shall also be liable for outbound preparation and shipping costs for contracted items returned under this clause.

##### B. Programming Aids (Software)

- (1) If the Contractor does not deliver all of the programming aids under a specific deliverable as scheduled in Rider B that are required to meet RFQ specifications ready for operation in substantial conformance with

the Contractor's specification on or before the delivery dates specified on Rider B, subject to subparagraph A.(2) of this Paragraph, the State may, at its option, delay the equipment installation date and the Contractor shall pay to the State as fixed and agreed liquidated damages in the amount 1/1095th of the total contract payment, due under that Rider B, irrespective of the number of programming aids undelivered, except as provided in Paragraph (2) below, for each calendar day between the date specified in the Rider B and the date of the delivery of such programming aids, but not for more than 180 calendar days in lieu of all other damages for non-delivery of software. If the Contractor provides suitable substitution of software, acceptable to the State, liquidated damages shall not apply, provided, however, liquidated damages will apply if such substituted software is provided later than the delivery date specified in Rider B. Liquidated damages for nondelivery of software shall likewise not apply for any day on which liquidated damages for non-installation of equipment accrues

- (2) If some, but not all, of the programming aids are delivered ready for use by the delivery date in the Rider B and the State makes or may reasonably make operational use of such Programming Aids, liquidated damages will not accrue against those Programming Aids. The liquidated damages payment will be prorated accordingly. The use of programming aids for scheduled program development shall be included as operational use.
- (3) If the Contractor's delay in delivering programming aids as listed on a Rider B, or an equivalent substitute acceptable to the State, is more than 30 calendar days, then by written notice to the Contractor, and subject to subparagraph A (2) of this Paragraph, the State may terminate the right of the Contractor to install or may discontinue the equipment immediately in the event it was already installed. In the event the State terminates the right of the Contractor to install or the State discontinues the equipment, the Contractor shall be liable for liquidated damages for the period of time between the date of installation specified for the specific deliverables in Rider B and the date that the State terminates the right of the Contractor to install, or the date of discontinuance of lease of the equipment, but not for more than 180 calendar days

The Contractor shall be liable for all out-bound preparation and shipping costs for contracted items returned under this clause. Liquidated damages for non-delivery of software shall likewise not apply for any day on which liquidated damages for non-installation of equipment accrues

#### C. Exception

- (1) Except with respect to defaults of subcontractors, the Contractor shall not be liable for liquidated damages when delays arise out of causes beyond the control and without the fault or negligence of the Contractor. Such causes may include, but are not restricted to, acts of God, or of the public enemy, acts of the State in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, and unusually severe weather; but, in every case, the delays must be beyond the control and without the fault or negligence of the Contractor. If the delays are caused by the default of a subcontractor, if such default arises out of causes beyond the control of both the Contractor and subcontractor and without the fault or negligence of any of them, the Contractor shall not be liable for liquidated damages for delays, unless the supplies or services to be furnished by the subcontractors were obtainable from other sources in sufficient time to permit the Contractor to meet the required performance schedule.

#### 5 PERFORMANCE AND RELIABILITY EVALUATION (PARE)

When the State requires that a performance and reliability evaluation (PARE) is to be performed, the standard of performance for the PARE will be closely monitored during the acceptance period

In the event that the PARE is for components only, all references to systems (processors) should be changed to components.

The Performance and Reliability Evaluation will consist of two phases.

A. PHASE I

The first phase shall be comprised of a specification compliance review of the equipment listed on the ordering documents. Such equipment shall be checked for total compliance with all required specifications of the RFQ. In the event that the State determines that any component or feature of the delivered equipment or software does not comply with the mandatory specifications of the RFQ, the State shall so notify the Contractor, allowing 14 calendar days for rectification by the Contractor. Should the Contractor be unable to rectify the deficiency, the State reserves the right to cancel the ordering document. Should the equipment and software pass the specification conformance review, the equipment shall enter Phase II of the PARE.

B PHASE II

(1) Determination of System Readiness

- a. Prior to the PARE, a committee of three persons will be formed to evaluate the system's performance on a daily basis. The committee will consist of one Contractor representative and two State personnel
- b. The PARE will begin on the installation dates when the Contractor certifies that the equipment is ready for use by the State.

(2) During the PARE:

All rerun times resulting from equipment failure and preventive maintenance shall be excluded from the performance hours

- a. All reconfiguration and reload time shall be excluded from the performance hours
- b. If files are destroyed as a result of a problem with Contractor equipment and must be rebuilt, the time required to rebuild the files will be considered "down-time" for the system
- c. If the Contractor requests access to failed equipment and the State refuses, then such maintenance will be deferred to a mutually agreeable time and the intervening time will not count against the PARE
- d. A functional benchmark demonstration will be run for the PARE Committee to confirm that the installed system is capable of performing the same functions that were demonstrated. This run must be completed to the satisfaction of the PARE Committee

C STANDARD OF PERFORMANCE

- a. The performance period (a period of thirty consecutive calendar days) shall commence on the installation date, at which time the operational control becomes the responsibility of the State. It is not required that one thirty day period expire in order for another performance period to begin
- b. If each component operates at an average level of effectiveness of 95 percent or more for a period of 30 consecutive days from the commencement date of the performance period, it shall be deemed to have met the State's standard of performance period. The State shall notify the Contractor in writing of the successful completion of the performance period. The average effectiveness level is a percentage figure determined by dividing the total operational use time by the total operational use time plus associated

down-time. In addition, the equipment shall operate in substantial conformance with the Contractor's published specifications applicable to such equipment on the date of this Agreement. Equipment added by amendment to this contract shall operate in conformance with the Contractor's published specifications applicable to such equipment at the time of such amendment

- c During the successful performance period, all rerun time resulting from equipment failure and preventive maintenance time shall be excluded from the performance period hours. All reconfigurations and reload time shall be excluded from the performance hours. Equipment failure down-time shall be measured by those intervals during the performance period between the time that the Contractor is notified of equipment failure and the time that the equipment is returned to the State in operating condition.
- d During the successful performance period, a minimum of 80 hours of operational use time on each component will be required as a basis for computation of the average effectiveness level. However, in computing the effectiveness level, the actual number of operational use hours shall be used when in excess of the minimum stated above.
- e No more than one hour will accrue to the performance hours during any one wall clock hour.
- f Equipment shall not be accepted by the State and no charges will be paid by the State until the standard of performance is met.
- g When a system involves on-line machines which are remote to the basic installation, the required effectiveness level shall apply separately to each component in the system
- h Promptly upon successful completion of the performance period, the State shall notify the Contractor in writing of acceptance of the equipment and authorize the monthly payments to begin on the first day of the successful performance period.
- i If successful completion of the performance period is not attained within 90 days of the installation date, the State shall have the option of terminating the Contract, or continuing the performance tests. The State's option to terminate the contract shall remain in effect until such time as a successful completion of the performance period is attained. The Contractor shall be liable for all outbound preparation and shipping costs for contracted items returned under this clause
- j The PARE will be complete when the equipment has met the required effectiveness level for the prescribed time period

## 6. TERMS OF USE

### A Invoices and Payments

- (1) The Contractor shall certify in writing to the State on the installation date that the bid equipment is installed and ready to use. Subject to the provisions of Section 5 of this contract, charges shall begin on that unit in agreement with the RFQ from the first day after completion of the PARE for purchased equipment or from the first day of successful performance period (PARE) for lease/purchased equipment.
- (2) The Contractor will render invoices for applicable charges. The State shall pay all such invoices in accordance with the State's standard payment procedure as specified in Public Act #279 of 1984
- (3) In the case of equipment leased by the State, payment for fractions of a calendar month shall be computed at the rate of 1/30 of the applicable monthly charge for each day the equipment was installed, except that the 31st day of any month will not be included in the computation of partial month billing for

discontinued equipment. This partial month billing can only occur for the first month of operation  
Subsequent bills are to be monthly costs only

7. MAINTENANCE OF EQUIPMENT

- MAI  
R
- A. The Contractor must be responsible for maintenance (labor and parts) at the prices shown in the cost model for each maintenance cost and shall keep quoted equipment in good operating condition for the length of the contract. All maintenance performed must be identified by equipment serial number.
  - B. The Contractor shall normally respond by phone within one hour after notification by the State that the equipment is inoperative. The phone call will establish the urgency and time of arrival on site. In critical situations the Contractor shall arrive within 2 PPM hours and the equipment shall be repaired within 12 hours. If the Contractor fails to repair the equipment within the above period, the Contractor shall allow credit, for each work day the equipment is inoperative, in an amount of 1/30 of the monthly maintenance charge for equipment furnished by the contractor that is not operable (not to exceed one month charge in any calendar month). Equipment which experiences repeated failures may be deemed unreliable equipment under L. below.

There are no additional charges for remedial maintenance during the principal period of maintenance (8:00 a.m. to 5:00 p.m.).

- C. All Remedial Maintenance will be performed promptly after notification of equipment becoming inoperative. The vendor shall provide the State with a designated continuous contact point and shall make arrangements to enable the maintenance representative to receive such notification and respond.
- D. Contractor must be responsible for contractor required preventive maintenance. Preventive maintenance must be performed at no additional cost, between the hours of 8:00 a.m. to 5:00 p.m., at a time agreeable to the State.
- E. The Contractor must supply, upon request, a monthly service report to the designated State office for service performed.

The following information is required on the Contractor Service Report: (This will be provided on a monthly basis.)

- Serial/Model number of equipment being repaired
- Service performed
- Date/Time equipment repaired
- Date/Time service request received
- Location of service
- Cause of breakdown or need of service
- field engineer's name performing service
- Service report control number
- Replacement part description

- F. Principle Period of Maintenance (PPM) will be the same hours as the State's normal working hours (currently Monday through Friday, 8:00 a.m. to 5:00 p.m., excluding a one (1) hour lunch period, excepting State-observed holidays).
- G. The principle period of maintenance hours may be changed upon 30 days written notice by mutual agreement, except that the Contractor shall make every reasonable effort to change his schedule in a shorter period of time.
- H. All repairs performed must be guaranteed for 30 days. Any subsequent related failure during this 30-day period will be repaired at no additional cost to the State when under vendor maintenance agreement.
- I. After the initial 12 months of the Maintenance Contract, provided the Contractor has given thirty (30) days prior written notice, the State agrees to change the maintenance charges paid to the Contractor not to exceed five (5) percent per year.
- J. The State has the option to cancel or switch the type of maintenance for any or all devices with thirty (30) days written notice.
- K. Malfunction Reports

The Contractor shall furnish a malfunction incident report to the State upon completion of each maintenance call. Such reports shall initiate at the request of the Contract Administrator and shall continue until designated to halt. The report shall include, as a minimum, the following:

- (1) Date and time (hours, minutes, and a.m. or p.m.) notified (to be supplied by user and verified by Contractor).
- (2) If applicable, date and time (hours, minutes, and a.m. or p.m.) of arrival (to be supplied by user and verified by Contractor)
- (3) Type and model number(s) of machine(s).
- (4) Time (hours, minutes, and a.m. or p.m.) repair completed
- (5) Description of malfunction (equipment or software)
- (6) If charges are applicable, the estimated full amount.

L. Unreliable Equipment

In the event of equipment failure to the degree that productivity is seriously impaired, the State shall call for a review of the malfunction reports, as required in Paragraph 7 N, Malfunction Reports, for the preceding 3 months. If accumulated malfunction time (determined by Paragraph 7 N. reports) for this period is equal to or exceeds 5% of the schedule hours for this period, it shall be determined that the productivity has been seriously impaired.

The malfunction condition(s) shall be corrected within five (5) working days of such review. If at the end of this period it has not been corrected, the issue will be escalated to a special committee which shall consist of:

- 1. Two Departmental Representatives
- 2. One Contractor Representative

This committee shall determine by majority vote which of the following three options is most appropriate.

1. Provide a backup machine, without additional charge to the State.
2. Provide on-site service and call in appropriate Contractor engineering or plant personnel.
3. Mechanically replace the equipment (In whole or in part) Contractor shall replace a persistently failing machine for up to one year after warranty commencement. Thereafter, Contractor shall replace all persistently failing components.

The Contractor will not unreasonably decline to perform the option determined by the Committee.

At the end of the five (5) working day period, and upon written notice to the Contractor, the State may exercise the option to initiate termination proceedings on the unreliable equipment. The Contractor is obligated to continue, in compliance with contractual terms contained herein, to the date set forth for removal of the equipment in a written notice from the State to the Contractor.

When the Contractor provides replacement equipment or substitute equipment, for backup purposes, charges will be limited to normal monthly charges for the equipment replaced or for substitute equipment, whichever is less.

The Contractor shall be liable for all outbound preparation and shipping costs for equipment returned pursuant to this provision.

#### 8 ALTERATIONS AND ATTACHMENTS

- A. The State may make alterations to the equipment and software or install attachments to the equipment, at the State's expense, with written consent of the Contractor.
- B. In the event that such changes increase the cost of maintenance, mutually agreeable arrangements for additional maintenance charges may be made in a contract addenda.
- C. Such alterations or attachments, if requested by the Contractor, will be removed and the equipment restored to the prior configuration at State expense before discontinuance of the equipment.
- D. If any such alteration or attachment creates a safety hazard, the State will, upon written notice from the Contractor to that effect, promptly correct same or restore the machines to their normal condition.

#### 9 MAJOR FIELD MODIFICATIONS

- A. The Contractor shall provide for major on-site field modification, which is defined as a Contractor-generated improvement in equipment which Contractor provides without cost to other similar customers. Such modification must be scheduled and approved by the State.
- B. When the Contractor requests such modification activity and it results in equipment remaining inoperable for periods in excess of eight (8) consecutive hours of State scheduled operation (Saturday, Sunday, and State holidays excluded), lease/purchase and maintenance credits will be allowed for each such day.
- C. Any hours during which the Contractor is prevented from performing work on the equipment for causes specified in paragraph 4.C. of this Rider shall not accrue toward the eight-hour period.

#### 10. PATENT AND COPYRIGHT PROTECTION

The Contractor, at his own expense, will defend any suits which may be brought against the State, its agencies and employees, for the infringement of United States patents or copyrights by the equipment furnished hereunder and such suit will satisfy any final award against the State, its agencies and employees, for such infringement. This is upon the condition that the State shall give Contractor prompt written notice of such suit and full right and opportunity to conduct the defense thereof, together with full information and all reasonable cooperation, at no cost or expense to the State, its agencies and employees, and upon further condition that the claimed infringement does not result from the combination of equipment furnished hereunder with other equipment, apparatus, or devices not furnished hereunder. No cost or expense shall be incurred for the account of Contractor without its written consent.

If in the Contractor's opinion, the equipment furnished hereunder is likely or does become the subject of a claim of infringement of a United States patent, the Contractor will immediately notify the State in writing, and, without diminishing Contractor's obligation to satisfy said award, Contractor may, at its option, (a) substitute suitable equipment satisfactory to the State, at Contractor's option and expense, (b) obtain the right for the State to continue the use of such equipment, or (c) provide an alternative acceptable to both the Contractor and the State

If the use of equipment by the State shall be prevented by permanent injunction, the Contractor agrees to take back such equipment. The State will pay for use and maintenance of the equipment from the acceptance date until the State is enjoined from use, according to the terms of this contract. The Contractor agrees to grant the customer a credit for returned equipment as depreciated. The depreciation shall be an equal amount per year over the life of the equipment in accordance with the prevailing United States Tax Laws.

The Contractor will reserve the right to exclusive control of settlement negotiations.

11. TRAINING

- A. The Contractor shall provide training for personnel to achieve the level of proficiency necessary as noted in the Invitation to Bid. Charges, if any, for specified RFQ requirements shall be listed in the Cost Evaluation Model.
- B. Technical Services. A vendor's technical representative must be available to State personnel by phone to solve minor problems/questions, or on-site visits to solve more complex problems or questions. Charges, if any, for specified RFQ requirements shall be listed in the Cost Evaluation Model.

12. SITE PREPARATION

- A. Site preparation specifications for equipment listed in Rider B shall be furnished by the Contractor promptly upon request by the State. These specifications shall be in such detail to ensure that equipment to be installed shall operate in accordance with any special State requirements which were identified to the Contractor in the State's RFQ and the Contractor's published specifications.
- B. The State will prepare the sites as specified by the Contractor. Subsequent alterations or modifications in site preparation required by the Contractor, which are attributable to Contractor's requirements and which involve additional expense to the State shall be made at the expense of the Contractor.
- C. If any such site alterations as specified in sub paragraph B. above, cause a delay in the installation, the provisions of Paragraph 4 will apply (Liquidated Damages)
- D. The Contractor will notify the State in writing as to the adequacy of the State's planned layout of the equipment within ten (10) days after receipt of the State's plan.

13. TRANSPORTATION, INSTALLATION, RELOCATION, AND RETURN OF EQUIPMENT

- A. Transportation

- (1) Shipments to site(s) specified by the State shall be made at the cost as indicated in the Cost Evaluation Model.
- (2) Transportation charges for the shipment of empty packing cases shall be paid by the Contractor except when equipment is moved from one State location to another.
- (3) Transportation charges, regardless of point of origin or destination of the equipment, shall not exceed the cost of shipment between the State location and the location of the Contractor's nearest plant of manufacture for each component.
- (4) The Contractor shall bear the cost of transportation when the equipment is replaced at the Contractor's request, unless replacement was due to fault or negligence of the State.

B Installation

- (1) The State shall pay only those rigging and drayage costs as indicated in the Cost Evaluation model
- (2) When equipment is moved for mechanical replacement purposes, the Contractor shall pay all rigging and drayage costs, unless replacement was due to fault or negligence of the State.
- (3) Supervision of placement of equipment shall be furnished by the Contractor without charge to the State.

C Relocation

- (1) The State reserves the right to move the equipment acquired under this contract from one State office to any other State office within the State
- (2) The State will notify the Contractor in writing of all equipment relocation within 30 days following the move.
- (3) The State will provide a relocation site that conforms to the Contractor's specification according to paragraph 12 B. of the Rider.
- (4) The State shall arrange and pay for all transportation, rigging, drayage and any other relocation charges.
- (5) Rearrangement of equipment within the same office for State convenience shall be at the State's expense.

D Return of Equipment

- (1) If equipment is returned to the Contractor pursuant to Section 4, Liquidated Damages, or Section 7. L., Unreliable Equipment the following procedure will be used:
  - a Within 20 days of written notification to the Contractor, the equipment will be prepared by the Contractor for removal and shall provide the State with required shipping instructions.
  - b Within 30 days the State shall ship the equipment in accordance with instructions (1.a)
- (2) All shipping costs will be borne by the Contractor.

14. RISK OF LOSS OR DAMAGE

A FOR LEASE/PURCHASED EQUIPMENT

The lessor shall specify the care and maintenance to be provided by the lessor, if any, until ownership of the property transfers to the State in accordance with the terms and conditions of the lease/purchase agreement. The State shall otherwise maintain the leased property in good condition according to commonly accepted and/or agreed procedures and practices, with reasonable wear and tear excepted. The State shall not be responsible for loss or damage to the property from any cause or occasion which is absent of negligence by the State, its officers or employees.

The State shall not assume responsibility, cost damages or expense arising out of death or injury to any person or damage to property caused or occasioned by the lessor's ownership and/or maintenance of the leased property. The State shall assume responsibility as permitted by the laws of the State of Michigan for any liability, cost, damages or expense arising out of death or injury to any person or damage to property caused or occasioned by the State's use, maintenance or control of the leased property.

The State shall not assume responsibility for any property or liability insurance desired by the lessor in connection with the leased property, however, the lessor may include relevant insurance expenses along with other factors considered in the lease rate(s).

During the lease/purchase period, the conditions described above for leased property apply. When the purchase option is exercised without further time payments and ownership transfers to the State, all risks of loss or damage to the property and future responsibility for liabilities in connection with the property transfer to the State.

B. FOR PURCHASED EQUIPMENT

When ownership of equipment transfers to the State, all risks of loss and damage to the property and future responsibility for liabilities in connection with the equipment transfer to the State.

15 INDEMNIFICATION:

The Contractor shall indemnify and hold harmless the State of Michigan and its agents and employees from and against all claims, damages, losses and expenses including attorneys' fees arising out of or resulting from the performance of the work, which includes all labor, material and equipment required to produce the commodity, construction and/or service required by the Contract, provided that any such claim, damage, loss or expense (1) is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible personal property (other than the Work itself) and (2) is caused in whole or in part by any negligent act or omission of the Contractor, its Subcontractors, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable.

In any and all claims against the State of Michigan or any of its agents or employees by any employee of the Contractor, any Subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, the indemnification obligation under this contract shall not be limited in any way by the amount or type of damages, compensation or benefits payable by or for the Contractor or any Sub-contractor under Workmen's Compensation acts, disability benefit acts or other employee benefit acts.

The obligations of the Contractor under this Contract shall not extend to the liability of the State of Michigan, its agents or employees arising out of (1) the preparation or approval of maps, drawings, opinions, reports, surveys, Change Orders, designs or specifications, or (2) the giving of or the failure to give directions or instructions by the State of Michigan, its agents or employees provided such giving or failure to give is the primary cause of the injury or damage.

16 CONTRACTORS LIABILITY INSURANCE

The Contractor shall purchase and maintain such insurance as will protect him from claims set forth below which may arise out of or result from the Contractor's operations under the Contract, whether such operations be by himself or by any Subcontractor or by anyone directly or indirectly employed by any of them, or by anyone for whose acts any of them may be liable:

- A Claims under workmen's compensation, disability benefit and other similar employee benefit act A non-resident Contractor shall have insurance for benefits payable under Michigan's Workmen's Compensation Law for any employee resident of and hired in Michigan; and as respects any other employee protected by workmen's compensation laws of any other state the Contractor shall have insurance or participate in a mandatory state fund to cover the benefits payable to any such employee
- B Claims for damages because of bodily injury, occupational sickness or disease, or death of his employees.
- C Claims for damages because of bodily injury, sickness or disease, or death of any person other than his employees, subject to limits of liability of not less than \$1,000,000 each occurrence and, when applicable, \$1,000,000 annual aggregate, for non-automobile hazards and as required by law for automobile hazards.
- D Claims for damages because of injury to or destruction of tangible property, including loss of use resulting therefrom, subject to a limit of liability of not less than \$100,000 each occurrence for non-automobile hazards and as required by law for automobile hazards.
- E Insurance for Subparagraphs (C) and (D), non-automobile hazards on a combined single limit of liability basis, shall not be less than \$1,000,000 each occurrence and, when applicable, \$1,000,000 annual aggregate.

The insurance shall be written for not less than any limits of liability herein specified or required by law, whichever is greater, and shall include contractual liability insurance as applicable to the Contractor's obligations under the Indemnification clause of the Contract.

17 SUPPLIES

Charges do not include supplies. Supplies used by the State shall conform to the Contractor's specifications or equivalent as set forth in Contractor's Manuals.

18. TAXES - FEDERAL, STATE AND LOCAL

The State of Michigan is exempt from Federal Excise Tax, State and Local Sales Taxes. Such taxes shall not be included in contract prices as long as the State maintains such exemptions. Federal Excise Tax exemption certificates will be furnished with purchase order if requested.

Property acquired for state or state agency through an installment lease agreement as public property shall be considered exempt for purposes of the General Property Tax Act, Act No. 206 of the Public Acts of 1893, being Sections 211.1 to 211.157 of the Michigan Compiled Laws.

19 TITLE

Title to equipment, accessories and devices leased or purchased under this contract shall remain with the Contractor until the State makes the final payment; at that time, title will pass to the State.

20. ASSIGNMENT

Contractor may, with the prior approval of the State, assign its right to receive payments hereunder, provided, that such assignment shall not relieve Contractor of its responsibility to perform and duty imposed upon it herein, and that all payments shall be made to one entity

21. CANCELLATION

Cancellation of contract by the State may be for: (a) default of the contractor; or (b) changes in laws, rules, or regulations, or lack of appropriated funding:

(a) Default is defined as the failure of the contractor to fulfill the material obligations of the quotation, contract, or purchase order. In case of default by the contractor, the State may immediately cancel the contract or purchase order and procure the articles or services from other sources and hold the contractor responsible for any excess costs occasioned thereby

(b) If the State experiences change in laws, rules, or regulations, or a lack of appropriated funding, the State may cancel the contract or purchase order, without further liability to the State, by giving the Contractor written notice of such cancellation 30 days prior to the date of cancellation.

(c) In addition, the state may immediately cancel the contract or purchase order without further liability to the state, its departments, agencies and employees if the contractor, an officer of the contractor, or an owner is convicted of a criminal offense incident to the application for or performance of a state, public, or private contract or subcontract; or convicted of a criminal offense including but not limited to any of the following: embezzlement, theft, forgery, bribery, falsification or destruction of records, receiving stolen property, attempting to influence a public employee to breach the ethical conduct standards for State of Michigan employees; convicted under state or federal antitrust statutes; or convicted of any other criminal offense which in the sole discretion of the state, reflects on the contractor's business integrity

22. STATE'S OBLIGATION

State's obligation is payable only and solely from funds appropriated for the purchase of this agreement. All funds for payments after the end of the current fiscal year are subject to the availability of a legislative appropriation for the purpose of this agreement. Payments during subsequent fiscal periods are dependent upon the same action. The State agrees to give the Contractor written notice of such non-appropriation within thirty (30) days after it receives notice of such non-appropriation.

23. CONTRACTOR'S OBLIGATION

In the event the Contractor has provided equipment or software other than of their own manufacture as specified in all Riders, the State will allow the Contractor, as prime Contractor, to sub-contract to provide the necessary bid item; however, the prime Contractor will retain sole contract responsibilities to the State for all contract obligations contained herein and such substitution shall be upon the approval of the Office of Purchasing

24. PRINCIPAL AND INTEREST SCHEDULE - PURCHASE OPTION

- A. Contractor shall include a Principal and Interest Schedule for each discrete equipment deliverable included in the contract. This schedule shall be provided with the invoicing for each deliverable. Such schedule shall be based on the sum total of the designated number of equal monthly payments for said item.
- B. The State reserves the unilateral right to exercise a purchase option, at any time, on any discrete equipment item under lease purchase payment for the remaining principal balance as indicated by the Principal and Interest Schedule. No otherwise undisclosed prepayment penalties shall be allowed.

25. GENERAL

Attached hereto and incorporated herein by reference are Contractor's applicable agreements. In the event of any conflicts between the State of Michigan Contract Terms and Conditions and the Terms and Conditions of the Contractor Agreements, these State of Michigan Contract Terms and Conditions shall control.

The following constitute the complete and exclusive statement of the agreement between the parties as it relates to this transaction:

- A. State RFQ and any Addenda thereto;
- B. Rider A; These Terms and Conditions
- C. Rider B; Cost Model
- D. Contractor's response(s) to the State's RFQ and Addenda, including Rider C which contains the Contractor's Agreements;

This statement of the agreement supersedes all proposals or other prior agreements, oral or written, and all other communications between the parties relating to this subject.

The failure of a party to insist upon strict adherence to any term of a contract resulting from this RFQ shall not be considered a waiver or deprive the party of the right thereafter to insist upon strict adherence to that term, or any other term, of the contract.

Any contract resulting from this RFQ may not be modified, amended, extended, or augmented, except by a writing executed by the parties hereto, and any breach or default by a party shall not be waived or released other than in writing signed by the other party.

Each provision of this contract shall be deemed to be severable from all other provisions of the contract and, if one or more of the provisions of the contract shall be declared invalid, the remaining provisions of the contract shall remain in full force and effect.

This contract shall in all respects be governed by, and construed in accordance with, the laws of the State of Michigan.

Note 1: Lease buyout allowances of \$1,918,537 (Production System) and \$1,221,319 (Development System) are proposed under 2 options to the State of Michigan. The State has the option to either: 1) take the listed allowances and deduct them from the extended price for items 1 through 11 and items 1 through 6 respectively and buyout the outstanding balances on these State obligations; or 2) not take the allowances and have Unisys make the buyouts.

Either of these options will clear the debt obligation of the State so that clear title to the equipment is granted for salvage or trade-in purposes.

The allowances are based on the buyout amounts as of the month following the scheduled migration to the MIPC. Example: Department of Corrections migration is 12/25/95; therefore, buyout is as of 1/1/96 with the Department making its December '95 payment.

The detail of allowances are listed in Exhibit #1 and identify either the production or development system to which they may be applied.

These allowances are being offered with the understanding that the State acquires the proposed systems and their associated peripherals and software licenses.

**Total:** \$6,338,581 \$7,592 \$3,610

**Note 1:** Lease buyout allowances of \$1,918,537 (Production System) and \$1,221,319 (Development System) are proposed under 2 options to the State of Michigan. The State has the option to either: 1) take the listed allowances and deduct them from the extended price for items 1 through 11 and items 1 through 6 respectively and buyout the outstanding balances on these State obligations; or 2) not take the allowances and have Unisys make the buyouts.

Either of these options will clear the debt obligation of the State so that clear title to the equipment is granted for salvage or trade-in purposes.

The allowances are based on the buyout amounts as of the month following the scheduled migration to the MIPC. Example: Department of Corrections migration is 12/25/95; therefore, buyout is as of 1/1/96 with the Department making its December '95 payment.

The detail of allowances are listed in Exhibit #1 and identify either the production or development system to which they may be applied.

These allowances are being offered with the understanding that the State acquires the proposed systems and their associated peripherals and software licenses.

2	071B005856	\$1,063,225	State	Nov. '93	Oct. '98	\$655,655
3	071B008538	\$260,292	Treasury - A11	Feb '93	Jan. '98	\$62,904
			<b>Total Credits</b>			<b>\$1,643,360</b>
<p>* This figure provides the value of the original Extended Term Plan (ETP) License and does not include any finance charge for those ETP licenses that were financed.</p>						
	071B008425	\$808,931	Corrections	Dec. '91	Nov. '96	\$28,313
	071B008538	\$1,143,151	Treasury - A17	Oct. '91	Sept. '96	\$37,152
<p># The Credit amount shown is calculated based on Unisys Standard policy (Treasury A11) or per the Terms and Conditions of the special 1994 addendum (Exhibit #2) pertaining to the Data Center Consolidation (Lottery and Department of State). Unisys policy is to allow one credit per new license issued as shown in items 1, 2, and 3 on this cost model section. However, Unisys has also provided a special non-standard credit for Department of Corrections A16 and Department of Treasury A17 which has been applied to items 1 through 11 of Production System detailed in Part I. (Please note: The buyout allowances shown in Part I include an allowance for the finance charges of those Extended Term Plans which have been financed.) A list of detailed software credits is included in Exhibit 3. These software credits are based on the scheduled migration dates listed in the Michigan A Series Project Plan for specific Departments. Should a Department's scheduled migration date be delayed such that the actual migration occurs more than 90 days after the date listed in Exhibit 3, and the State has already applied that Department's software credit against the purchased A18 Systems, the Department must reinstate the monthly license payments applicable under the contracts listed above retroactive to the migration date used to calculate the credit and pay such monthly license charges to Unisys until the actual migration date. In such event, if a software ETP expires prior to the actual migration date, the software license charges will be calculated at the then current monthly license charges until the actual date of migration, or under a new ETP if the Department does not migrate.</p>
