Article 1 – Statement of Work (SOW)

1.0 Project Identification

1.001 PROJECT REQUEST

The purpose of this Contract is to provide life/health and property/casualty actuarial services and to pre-qualify actuarial service vendors for either one or both services.

Pre-qualified vendor qualifications and availability will be accessed by the Office of Financial and Insurance Services (OFIS) under a second tier, competitive selection process. OFIS may then enter into a work contract with the vendor offering the best overall value for the specific OFIS examination.

1.002 BACKGROUND

The Office of Financial and Insurance Services (OFIS) regulates a wide range of entities including but not limited to the following:

- Full and single line HMO's
- Blue Cross Blue Shield of Michigan
- Multiple Employer Welfare Arrangements
- Property, Casualty, Life and Health Insurance Companies
- US Branches of Canadian Insurers
- Limited Liability Pools
- Reciprocal Exchanges
- Municipal Pools

Specifically the OFIS is responsible for regulating the financial solvency and compliance with National Association of Insurance Commissioners (NAIC) requirements and the Michigan Insurance Code by the above regulated entities. The OFIS attempts to insure compliance with the regulations and Code through periodic examinations of the regulated entities. The examinations can occur throughout the United States and Canada. The staff of the OFIS conducts the examinations, but the Division has no fully certified actuaries (actuaries who have taken and passed all ten exams) with training or experience in the fields of life, health, property or casualty insurance actuarial science. An analysis and evaluation by a Fellow of the Society of Actuaries/Fellow of the Casualty Society of Actuaries of the adequacy of reserves of regulated entities are critical to the Commissioner's ability to adequately examine the entities and ensure compliance with standards, regulations and Code.

Also, it is imperative that the actuarial firms or individuals assisting the OFIS with specific examinations not be associated, either financially or contractually, with the entity being examined and that there shall be no financial or contractual relationship, either written or oral, for two years prior to, during the life of and for two years after any contract awarded or any subsequent contract work order without the written consent of the OFIS. Failure by the firm to comply with this provision may result in the cancellation of services.

It is because of the concern about conflict of interest that the OFIS feels it is imperative to have a pool of contract actuaries available to assist with examinations. The pool of pre-qualified firms is also required because it is anticipated that there may be 60 or more examinations annually, with many examinations going on simultaneously.

A pool of a minimum of six (maximum of 10) life/health and a minimum of six (maximum of 10) property/casualty actuarial firms will be developed. It is possible for firms to be qualified to provide actuarial services in both the life/health and property/casualty categories as long as the firm can certify to all reserves in both categories.

1.1 Scope of Work and Deliverables

1.101 IN SCOPE

When specific company examinations require actuarial services, the OFIS Contract Administrator will prepare a written work statement detailing the line items where the State needs an actuary to analyze and opine to the adequacy of the reserves.

The OFIS may also, on occasion, require experience in particular lines of business such as medical malpractice and liquor liability. Also, from time to time, OFIS may have a need for actuarial services to conduct reviews under Section 830(3) of the Michigan Insurance Code regarding requests by domestic insurers for changes in actuarial methodologies. Other actuarial services that may be requested are reviews of mortality tables and reviews of concerns regarding adequacy of reserving. If such experience is required, it will be described in the work statement. Also, there are some examinations where several members within an insurance holding company are being examined at the same time. One property and casualty contractor will be awarded all property and casualty companies within the insurance holding company and one life and health contractor will be awarded all life and health companies within the insurance holding company. When awarding individual contracts, additional consideration may be given firms that can render opinions on all members of an insurance group (both life/health and property/casualty). However, the firm must be one of the pre-qualified firms in both pools. Each statement of work will be initiated by the contract administrator and submitted via e-mail to all pre-qualified firms. Each statement of work will contain the following information:

- Name of company to be analyzed
- The last examination period
- Period to be covered by this examination
- Items needing analysis
- Excerpts from Company's Annual Statement and Actuarial Opinion.

A sample work statement is provided in Appendix A and B. Each category of examination, Life/Health and Property/Casualty, will receive a work Statement.

The pre-qualified vendors will have two weeks to submit via e-mail a work plan in response to the work statement. Pre-qualified vendors will respond to the statement of work with a task proposal by the date specified in the statement of work. In detailing costs, the contractor must not exceed the hourly rate included in their response. Each Task proposal will include the following:

1. Introduction – statement of the assignment
2. End product of the assignment
3. Services to be provided (activities, tasks and individuals assigned to each task or activity)
4. Background information and relevant specific experience of firm and names, experience and resumes of individuals assigned to the project
5. Detail of Costs:
 - Indicating who will be assigned
 - The hours they will be assigned
 - The hourly rate
 - Travel costs*
 - Total cost

*Travel costs will be billed at state rates in effect at the time the expense is incurred. Travel costs should include any costs that may be incurred by the contractor during the normal course of the examination. Should the contractor be required to defend their findings at a hearing, the OFIS will reimburse the contractor for any specific travel costs incurred while defending the findings. This reimbursement is in addition to the total cost bid and accepted by the OFIS. Travel costs incurred for defending the contractor's findings will only be reimbursed if prior approval for the travel is received from the Contractor Administrator.

The pre-qualified firm that presents the highest quality proposal, price considered, will be selected to perform the analysis. Whenever possible, the OFIS will ensure that no contractor will be awarded a contract to examine a company that they examined during the last state audit. Persons/firms selected may be expected to begin work one week following the receipt of a contract release. Should none of the contractors offer an acceptable proposal, the State may pursue acquisition of services from other vendors. The OFIS may interview the proposed staff before making a final decision on the award of a contract release.

The average bid price for P&C proposals is approximately \$7,500 and the average bid price for Life proposals is approximately \$25,000. The total cost for very complex examinations often exceeds these averages and the total cost for relatively straight-forward examinations often is less than these averages.

1.104 WORK AND DELIVERABLE

Contractor shall provide Services and staff, and otherwise do all things necessary for or incidental to the performance of work, as set forth below:

A. Review and opine on actuarial items in connection with financial examinations of domestic insurance companies, including Canadian and alien insurance companies using Michigan as the state of entry into the United States or other liabilities or assets specifically determined by the OFIS which need to be reviewed by an actuary.

B. The actuarial items to be reviewed may include but are not limited to, policy reserves, policy holder dividend scales and philosophy, tax liability, product features, risk based capital and surplus requirements, cash flow tests, asset adequacy testing and loss and loss adjustment expense reserves.

C. The actuary is responsible for reconciling all the data provided by the company back to the annual statement. Specifically, the property and casualty actuary must tie its loss data back to Schedule P, Part I.

D. The liabilities and assets to be reviewed and certified by the contractor will be determined at the beginning of each examination. The contractor must use, if available, the Company's actuarial opinion, report and work papers to the greatest extent possible without compromising the contractor's responsibility to perform the necessary tests to render his/her opinion on the agreed upon areas as defined in the work statement.

E. The contractor must work closely with the examiner-in-charge (EIC) and other staff assigned to the examination to ensure the appropriate underlying master file and other data used by the contractor in rendering his opinion is tested for completeness and accuracy by the OFIS staff. The contractor must give the EIC progress reports throughout the examination. These reports can be verbal. The contractor must immediately notify the EIC of any exceptions and important issues.

F. It is also imperative that the contractor(s) not be associated with (either financially or contractually) the entity regulated by the OFIS to which the contractor is providing services and that such a relationship not be entered into for two years prior to, during the life of and for two years after the contract award without the written consent of the OFIS. Failure by the Contractor(s) to comply with this provision may result in the cancellation of any contract.

G. The reports and opinions for life and health entities must be signed by a Fellow of the Society of Actuaries (FSA); and reports and opinions for property and casualty entities must be signed by a Fellow of the Casualty Actuarial Society (FCAS). The fellow must play a significant role in the analysis and oversight of the project.

H. The contractor must be available for meetings with the regulated entity and the OFIS. Also, from time to time, the contractor may be called upon to appear at a place designated by the OFIS, to discuss the issues of an emergency nature on short notice. Further, the contractor is required to be flexible in changing their work efforts to accommodate the concerns of the OFIS. The contractor must be prepared and available to defend the contractor's findings in a hearing. The contractor must be willing to testify as an expert witness and perform other tasks related to the area of expertise as needed.

I. The contractor may be called upon to help the OFIS analyze complex reinsurance agreements and transactions or any other special assignment, where actuarial assistance may be deemed necessary by the OFIS.

J. From time to time, there may be special projects that may be performed on non-domestic insurers or in areas which may be considered beyond the scope of a routine examination, which the contractor may be asked to provide to the OFIS. The scope of the project or area will be defined by the OFIS and agreed upon with the contractor before the work begins.

K. The actuary should be able to perform most of the analysis from their work location. Due to the nature of the life insurance products, actuaries should plan to make one visit on-site to the company. All visits by the actuary to the company being examined must be coordinated with the approval by the Examiner-in-Charge.

L. The contractor must agree to comply with Section 222(4) of the Michigan Insurance Code regarding the confidentiality of all information and knowledge obtained by the contractor during an examination of an entry under this contract. Section 222(4) states, in part, all work papers, correspondence, memoranda, reports, records and other written or oral information related to an examination report or an investigation shall be withheld from public inspection, shall be confidential, shall not be subject to subpoena, and shall not be divulged to any person, except as provided for in Section 222(4). If the contractor receives a subpoena for any information related to an examination under contract, the contractor must contact the OFIS immediately. The contractor should also be aware of Section 226 of the Michigan Insurance Code that states, in part, a person appointed or acting under this act who discloses any fact or information that is confidential under this act is guilty of a misdemeanor, punishable by a fine of not more than \$1,000, or imprisonment of not more than one (1) year, or both.

M. All of the contractor's work papers are the property of the OFIS and should be sent to the OFIS at the conclusion of the examination.

N. Contractors will not be allowed to bid on a company if the contractor performed the analysis and review for the OFIS during the last examination.

1.2 Roles and Responsibilities

1.201 CONTRACTOR STAFF, ROLES, AND RESPONSIBILITIES

See Work and Deliverables Section 1.104.

1.202 STATE STAFF, ROLES, AND RESPONSIBILITIES

The OFIS will oversee the amount of work to be performed under the contract by making assignments and sending financial statements to the contractor at the beginning of each examination. In all cases, the number and type of tasks will be specified by the OFIS.

1.5 Acceptance**1.501 CRITERIA**

The following criteria will be used by the State to determine Acceptance of the Services and/or Deliverables provided under this SOW.

The OFIS will require a deliverable work product in the form of an appropriately detailed written report and actuarial opinion for each assignment. The detailed report should adequately support the actuarial opinion. The report should include a discussion of the scope of the work performed and assumptions used, a summary of findings, any recommendations to the company for improving its system, loss developments, the accuracy of the aggregate reserves and other provisions for policy obligations and any other pertinent information used to render the opinion. The actuarial opinion should be in the format of and contain the information required by the NAIC Annual Statement Instructions. The final detailed report and opinion must be delivered to the OFIS prior to the end of the on-site examination by the OFIS staff examiners unless prior consent is given by the OFIS. The contractor will provide four copies of the report. The certification will not be attached or bound with the actuarial report but will be a separate document. The actuarial opinion must be submitted with the actuarial report. The detailed report and supporting work papers will become part of the OFIS work papers which are confidential and are only available to other parties as defined by specific statutes. The regulated entity will also have a copy of the actuarial report supporting the certification. The regulated entity may provide a copy of the actuarial report and opinion to its appointed actuary.

1.502 FINAL ACCEPTANCE

Final Acceptance is when the project is completed and functions according to the requirements. Any intermediate acceptance of sub-Deliverables does not complete the requirement of Final Acceptance.

1.6 Compensation and Payment

All rates quoted in bidder's response to this CONTRACT will be firm for the duration of the Contract. No price changes will be permitted.

- (a) After receipt by the State of notice of the action or proceeding involving a claim in respect of which it will seek indemnification, the State shall promptly notify Contractor of such claim in writing and take or assist Contractor in taking, as the case may be, any reasonable action to avoid the imposition of a default judgment against Contractor. Notwithstanding the foregoing, the State may retain control of the defense and settlement of a claim by written notice to Contractor given within ten (10) days after the State's receipt of Contractor's information requested by the State pursuant to clause (ii) of this paragraph if the State determines that Contractor has failed to demonstrate to the reasonable satisfaction of the State Contractor's financial ability to carry out its defense and indemnity obligations under this Section. Any litigation activity on behalf of the State of Michigan, or any of its subdivisions pursuant to this Section, must be coordinated with the Department of Attorney General.

In the event the insurer's attorney represents the State pursuant to this Section, the insurer's attorney may be required to be designated as a Special Assistant Attorney General by the Attorney General of the State of Michigan.

- (c) If Contractor does not deliver a Notice of Election relating to any claim of which it is notified by the State as provided above, the State shall have the right to defend the claim in such manner as it may deem appropriate, at the cost and expense of Contractor. If it is determined that the claim was one against which Contractor was required to indemnify the State, upon request of the State, Contractor shall promptly reimburse the State for all such reasonable costs and expenses.

2.306 LIMITATION OF LIABILITY

The Contractor's liability for damages to the State shall be limited to two times the value of the Contract or \$200,000 (*for low risk contracts – Select a higher amount for moderate to high risk contracts*) which ever is higher. If, under this Contract, Contractor procures any equipment, software or other Deliverable for the State (including equipment, software and other Deliverables manufactured, re-marketed or otherwise sold by Contractor under Contractor's name), then in addition to Contractor's other responsibilities with respect to such items as set forth in this Contract, Contractor shall assign or otherwise transfer to the State or its designees, or afford the State the benefits of, any manufacturer's warranty for the Deliverable.
12. The contract signatory has the power and authority, including any necessary corporate authorizations, necessary to enter this contract, on behalf of Contractor.

Contractor shall notify the State within two (2) days of any such interest that may be incompatible with the interests of the State.
15. All financial statements, reports, and other information furnished by Contractor to the State as part of its response to the ITB or otherwise in connection with the award of this Contract fairly and accurately represent the business, properties, financial condition, and results of operations of Contractor as of the respective dates, or for the respective periods, covered by such financial statements, reports, other information. Removal of key actuarial personnel without the written consent of the State may be considered by the State to be a material breach of this Contract. 2.6 Breach of Contract

2.601 BREACH DEFINED

Failure to comply with articles, sections, or subsections of this agreement, or making any false statement in this agreement will be considered a material breach of this agreement giving the state authority to invoke any and all remedies available to it under this agreement.

In addition to any remedies available in law and by the terms of this contract, if the Contractor breaches Sections 2.508, 2.509, or 2.510, such a breach may be considered as a default in the performance of a material obligation of this contract.

2.602 NOTICE AND THE RIGHT TO CURE

In the event of a curable breach by the Contractor, the State shall provide the Contractor written notice of the breach and a time period to cure said breach described in the notice. This section requiring notice and an opportunity to cure shall not be applicable in the event of successive or repeated breaches of the same nature or if the State determines in its sole discretion that the breach poses a serious and imminent threat to the health or safety of any person or the imminent loss, damage or destruction of any real or tangible personal property.

2.603 EXCUSABLE FAILURE

1. Neither party shall be liable for any default or delay in the performance of its obligations under the Contract if and to the extent such default or delay is caused, directly or indirectly, by: fire, flood, earthquake, elements of nature or acts of God; riots, civil disorders, rebellions or revolutions in any country; the failure of the other party to perform its material responsibilities under the Contract (either itself or through another contractor); injunctions (provided the injunction was not issued as a result of any fault or negligence of the party seeking to have its default or delay excused); or any other cause beyond the reasonable control of such party; provided the non-performing party and its subcontractors are without fault in causing such default or delay, and such default or delay could not have been prevented by reasonable precautions and cannot reasonably be circumvented by the non-performing party through the use of alternate sources, workaround plans or other means, including disaster recovery plans. In such event, the non-performing party will be excused from any further performance or observance of the obligation(s) so affected for as long as such circumstances prevail and such party continues to use its best efforts to recommence performance or observance whenever and to whatever extent possible without delay provided such party promptly notifies the other party in writing of the inception of the excusable failure occurrence, and also of its abatement or cessation.

2. If any of the above enumerated circumstances substantially prevent, hinder, or delay performance of the services necessary for the performance of the State's functions for more than 14 consecutive days, and the State determines that performance is not likely to be resumed within a period of time that is satisfactory to the State in its reasonable discretion, then at the State's option: (a) the State may procure the affected services from an alternate source, and the State shall not be liable for payments for the unperformed services under the Contract for so long as the delay in performance shall continue; (b) the State may cancel any portions of the Contract so affected and the charges payable hereunder shall be equitably adjusted to reflect those services canceled; or (c) the Contract will be canceled without liability of the State to the Contractor as of the date specified by the State in a written notice of cancellation to the Contractor. The Contractor will not have the right to any additional payments from the State as a result of any excusable failure occurrence or to payments for services not rendered as a result of the excusable failure condition. Defaults or delays in performance by the Contractor which are caused by acts or omissions of its subcontractors will not relieve the Contractor of its obligations under the Contract except to the extent that a subcontractor is itself subject to any excusable failure condition described above and the Contractor cannot reasonably circumvent the effect of the subcontractor's default or delay in performance through the use of alternate sources, workaround plans or other means.

2.7 Remedies

2.701 CANCELLATION

The State may cancel this Contract without further liability or penalty to the State, its departments, divisions, agencies, offices, commissions, officers, agents, and employees for any of the following reasons:

In the event that this Contract is cancelled for cause, in addition to any legal remedies otherwise available to the State by law or equity, the Contractor shall be responsible for all costs incurred by the State in canceling the Contract, including but not limited to, State administrative costs, attorneys fees and court costs, and any additional costs the State may incur to procure the services required by this Contract from other sources. All excess re-procurement costs and damages shall not be considered by the parties to be consequential, indirect or incidental, and shall not be excluded by any other terms otherwise included in the Contract.

In the event the State chooses to partially cancel this Contract for cause charges payable under this Contract will be equitably adjusted to reflect those services that are cancelled.

In the event this Contract is cancelled for cause pursuant to this section, and it is therefore determined, for any reason, that the Contractor was not in breach of contract pursuant to the provisions of this section, that cancellation for cause shall be deemed to have been a cancellation for convenience, effective as of the same date, and the rights and obligations of the parties shall be limited to that otherwise provided in the Contract for a cancellation for convenience.

2. Cancellation For Convenience By the State. The State may cancel this Contract for its convenience, in whole or part, if the State determines that such a cancellation is in the State's best interest. 3. Non-Appropriation. In the event that funds to enable the State to effect continued payment under this Contract are not appropriated or otherwise made available. The Contractor acknowledges that, if this Contract extends for several fiscal years, continuation of this Contract is subject to appropriation or availability of funds for this project. If funds are not appropriated or otherwise made available, the State shall have the right to cancel this Contract at the end of the last period for which funds have been appropriated or otherwise made available by giving written notice of cancellation to the Contractor. The State shall give the Contractor written notice of such non-appropriation or unavailability within 30 days after it receives notice of such non-appropriation or unavailability.
4. Criminal Conviction. In the event the Contractor, an officer of the Contractor, or an owner of a 25% or greater share of the Contractor, is convicted of a criminal offense incident to the application for or performance of a State, public or private Contract or subcontract; or convicted of a criminal offense including but not limited to any of the following: embezzlement, theft, forgery, bribery, falsification or destruction of records, receiving stolen property, attempting to influence a public employee to breach the ethical conduct standards for State of Michigan employees; convicted under State or federal antitrust statutes; or convicted of any other criminal offense which in the sole discretion of the State, reflects upon the Contractor's business integrity.
5. Approvals Rescinded. The State may terminate this Contract without further liability or penalty in the event any final administrative or judicial decision or adjudication disapproves a previously approved request for purchase of personal services pursuant to Constitution 1963, Article 11, section 5, and Civil Service Rule 7. Termination may be in whole or in part and may be immediate as of the date of the written notice to Contractor or may be effective as of the date stated in such written notice.

All completed or partially completed Deliverables prepared by Contractor pursuant to this Contract shall, at the option of the State, become the State's property, and Contractor shall be entitled to receive equitable fair compensation for such Deliverables. Regardless of the basis for the termination, the State shall not be obligated to pay, or otherwise compensate, Contractor for any lost expected future profits, costs or expenses incurred with respect to Services not actually performed for the State.

The State shall compensate Contractor for such termination assistance at the same rates and charges set forth in the Contract on a time and materials basis in accordance with the Labor Rates indicated within Contractors pricing section. If the Contract is terminated by Contractor under **Section 20**, then Contractor may condition its provision of termination assistance under this Section on reasonable assurances of payment by the State for such assistance, and any other amounts owed under the Contract.

C. Reservation of Rights

We accept the terms and conditions of Invitation to Bid 071I4001365 Actuarial Services without change.

We look forward to being of assistance to Office of Financial and Insurance Services ("OFIS") from our Texas and California offices. Do not hesitate to contact me should you have any questions regarding this proposal.

Sincerely,

Understanding of Engagement

We have carefully reviewed the information provided in the Invitation to Bid #07114001365 Actuarial Services. We understand that OFIS expects an actuarial review of loss and loss adjustment expense reserves, as well as the review of other items such as policy reserves, policyholder dividends, risk-based capital, cash flow testing, and complex reinsurance agreements and transactions, in connection with the financial examination of domestic insurance companies. We also understand that OFIS expects all actuarial data to be reconciled back to the annual statement of the company being examined. OFIS requires each selected contractor to work closely with the examiner in charge and keep them informed of any issues that arise during the examination.

The detailed steps followed by AACG during a financial examination can be found under the 'Availability of Resources and Methods of Performance' section of this proposal.

We believe our experience and the regulatory emphasis of our firm as well as our understanding of OFIS's requirements will enable us to provide OFIS with the assistance needed to effectively complete its financial examinations.

Financial Condition Examinations

Our extensive experience with loss reserving and financial examinations has enabled us to develop an efficient approach for completing the actuarial portion of a financial examination. The following approach is not meant to apply in every situation, but represents our typical approach to a financial examination. Modifications to this process are made to reflect specifics of the insurance company under review (the "Examinee").

In preparation for the financial examination, we will first discuss with OFIS whether a full or limited scope actuarial review is necessary. Our schedule of events for a full scope actuarial review is as follows:

Full Scope Actuarial Review

Preliminary Steps

- Discuss with OFIS any areas and/or goals AACG should focus on which may be different or atypical from other examinations.
- Obtain the names of the financial examiners working on this examination as well as a list of contacts at the Examinee.
- Discuss and prepare a work plan with the Examiner-in-Charge detailing specific goals and deadlines.
- Discuss materiality issues with OFIS.
- Request from the Examinee copies of its actuarial reports, actuarial opinions, and Annual Statements from the last three years. Request from OFIS a copy of its actuarial report from its prior financial examination of the Examinee. Receive and review these documents before the meeting with the Examinee. This will provide us with a better understanding of the Examinee operations and will help us target our questions at the meeting.
- Plan a meeting at the Examinee with the heads of underwriting, claims, and actuarial. Some of the issues discussed with each department include, but are not limited to, the following:

Underwriting

- > Underwriting philosophy including types of insureds.
- > Lines of business written.
- > Policy distribution (independent agents, direct business, ...)
- > Changes in mix of business, class, territory, and hazard group.
- > Rate changes by line of business.
- > Changes in deductibles and policy limits.
- > New insurance products.

Claims

- > Claims reporting procedures.
- > Claims reserving philosophy.
- > Use of average reserves.
- > Changes in claims reserving philosophy.
- > Trends in loss experience from management's perspective.
- > Use of third party administrators or independent adjusters.
- > Speedup or slowdowns in payments.
- > Major claims.

Actuarial

- > Recent adverse or favorable reserve developments.
- > Changes in loss development patterns.
- > Comparison of Examinee's carried reserves to actuarial indication.
- > Problematic reserving segments which may have insufficient or unreliable data, or that have a higher probability of adverse reserve development.
- > Examinee's reinsurance treaties.
- > Legislative reforms.
- > Significant court decisions.
- > Social climate.

Actuarial Review

- Prepare and send a data request to the Examinee. The data request itemizes the segmentation and specification of the actuarial data needed for the analysis.
- Review the actuarial data for reasonableness, consistency, and completeness.
- Perform a reconciliation of the actuarial data to the Examinee's Annual Statement, by line of business and accident year. Discuss any reconciliation issues with the Examinee and OFIS.
- Select the actuarial methods to be used for the analysis for each reserving segment. The actuarial methods should consider each segment's characteristics, such as data volatility, length of the tail of development, and number of years of data available.
- Perform the actuarial projections for each reserving segment.
- Prepare a summary of our reserve estimates and compare to the Examinee's carried reserves.
- Perform a sensitivity analysis, whereas underlying assumptions are varied to examine the impact on reserve estimates.
- Prepare a draft report containing the following sections; Narrative, Summary Exhibits, Analysis, and Reconciliation.
 - > The narrative section contains a discussion of the following items:
 - Our conclusions;
 - Examinee's background;
 - Data issues;
 - Actuarial methods used and major assumptions;
 - Differences from the Examinee's own actuarial projections;
 - Examinee's compliance with NAIC Accounting Practices and Procedures Manual as well as statutory laws and regulations.
 - > The summary exhibits display our reserve estimates for each reserving segment, differences from the Examinee's own actuarial projections, and any other relevant summary.
 - > The analysis section displays our full actuarial projections for each reserving segment, as well as the assumptions used.
 - > The reconciliation section displays the data reconciliation between the reserving segments and the Examinee's Schedule P.
- Issue a draft Statement of Actuarial Opinion, if requested by OFIS.

Presentation of Draft Results

- Meet with OFIS to discuss draft report and conclusions.
- Meet with the Examinee to discuss conclusions, if requested by OFIS.
- Identify areas that may require further analysis or modification of assumptions.

Final Report

- Make changes in assumptions or methodologies which have been discussed with OFIS.
- Discuss the effect on results of above changes.
- Prepare the final report.
- Issue a final Statement of Actuarial Opinion, if requested by OFIS.

Limited Scope Actuarial Review

In some cases, a full scope actuarial review may not be required. Although limited and full scope actuarial reviews share many of the same steps, the main differences are that a full actuarial analysis and the issuance of a detailed actuarial report are not necessary in a limited scope actuarial review. The analysis performed in a limited scope actuarial review is usually limited to a review of the assumptions, methodology, diagnostics, and conclusions contained in the existing actuarial report of the Examinee. A memorandum discussing the reasonableness of the existing report is issued to OFIS. The memorandum also discusses whether the existing work papers are adequate and sufficient or if more detailed analyses should be performed.

Throughout full and limited scope analyses, progress reports will be submitted bi-weekly to the examiner in charge discussing the tasks that have been accomplished to date, any issues found to date, and a list of outstanding tasks.

Peer Review Process

When a draft report is ready to be sent to OFIS, it is first peer reviewed by one of our actuaries to assure completeness as well as reasonableness of the assumptions, methodologies, and conclusions. This peer review process ensures that all of our reports and engagements are completed according to the highest standards of the NAIC and the American Academy of Actuaries.

Actuarial Methodologies

AACG uses generally accepted actuarial methodologies to perform all of its actuarial reviews. Some of the methods used are as follows:

- Paid loss development method;
- Reported loss development method;
- Paid Bornhuetter-Ferguson ("B-F") method;
- Reported B-F method;
- Incremental average paid loss method;
- Adjusted paid and reported development methods.

AACG also reviews a variety of diagnostics as part of its actuarial reviews. Some of the diagnostics reviewed are as follows:

- Reported loss per reported claim;
- Paid loss per closed claim;
- Average case reserve per open claim;
- Ratio of paid loss to reported loss;
- Total average outstanding loss per outstanding claim;
- Ratio of closed claim count to reported claim count.

The selection of actuarial methods is affected by, among other factors, the type of coverage, the number of years of historical data available, the actual loss development patterns, and the current and expected future legal, social, and economic conditions.

Our actuaries tailor their analyses to reflect changes in the operation of the company under review. Adjustments to underlying historical data are made if the diagnostics reveal trends that may cause distortions to our projections.

In addition to our best reserve estimate, we will provide a range of reasonable reserve estimates. Our range of reasonable reserve estimates is obtained by using a variety of actuarial methods and by applying different sets of reasonable assumptions.

Litigation Support and Expert Testimony Services

Should OFIS enter into legal proceedings against any insurance entity, our actuaries are available to provide OFIS with litigation support and expert witness testimony services.

Reinsurance Transactions Consulting Services

AACG can provide a variety of services regarding the analysis of property and casualty reinsurance transactions and contracts. Our services fall within three categories: Reinsurance pricing analysis, financial impact analysis, and risk transfer analysis.

Reinsurance Pricing Analysis

The pricing of a reinsurance treaty involves estimating the amount and timing of losses which are expected to be ceded under the treaty. The losses are usually discounted and an expense load is added in order to calculate a reasonable reinsurance rate. A range of reasonable rates can also be estimated by varying the payment pattern, amount of treaty losses, and discount factor.

Financial Impact Analysis

AACG can analyze the impact of a specific reinsurance contract on a company's future cash flows and surplus. We then provide our opinion on the reasonableness of this particular reinsurance contract considering the financial goals of the insurance company. AACG can also suggest modifications to a reinsurance contract in order to better achieve the insurance company's risk transfer goals.

Risk Transfer Analysis

In order to be considered a true reinsurance agreement, a reinsurance contract must provide for risk transfer between the ceding entity and the reinsurer. Risk transfer requires that:

- The reinsurer assumes significant insurance risk from the ceding entity; and
- The reinsurer may realize a significant loss.

Insurance risk involves uncertainties about both the amount and timing of cash flows falling under the reinsurance contract.

AACG can analyze any reinsurance treaty and determine whether actual risk transfer exists between the ceding and assuming insurance entities.

Conflicts of Interest

AACG does not have any past or current professional relationship with Michigan domestic insurance companies which could be considered a conflict of interest.

Confidentiality Procedures

AACG has strict procedures to protect the confidentiality of data received in the course of an engagement. We do not share any data or information received with outside parties. All of the data received is stored in a secure location. No one at AACG may access confidential records unless specifically authorized to do so. Authorized individuals may use confidential records for authorized purposes only. The data received by AACG is destroyed in a non-recoverable manner five years after the end of every engagement, or any other period of time as agreed upon with OFIS. A copy of all work papers will be made available to OFIS at the conclusion of each examination.
