Accepts Students From (EEM characteristic) - This is a list of Entity Types that are allowed to submit data to this Entity (e.g., MSD B accepts student data from any ISD District, LEA District, and PSA District). This field should only be used with MSD records.

Accountable Entity/Accountability - The term given to the entity (e.g., district) that is responsible for the student’s core fields, demographics, program participation, assessment scores, attendance, annual yearly progress, and graduation and dropout (cohort) information. The accountable entity is the “custodian” of the data, the district that supervises the student’s instruction (not necessarily “responsible for” the student’s instruction). “Responsible For”: the student lives in the district, and the district is “responsible for” the student’s instruction. “Supervises” means the entity provides the student’s instruction.

- Accountability Conditions
- Usually the operating district
- Entity providing student instruction
- Entity responsible for student assessment
- Entity that possesses the student’s permanent record (CA60)
- Only primary education providing entity (PEPE) can hold accountability, however not all PEPEs can be held accountable.

ACT Test Center Code (EEM characteristic) - The six-digit test center code assigned by ACT for the Michigan Merit Exam test center. These data are entered by MDE.

Actively Educating Students (EEM characteristic) - This true/false district level field identifies entities that are actively engaged in educating students.

Agency System of Record - An “Agency System of Record” consists of a database and usually an associated application that serves as a source of data. The Educational Entity Master (EEM) is an example of a “system of record” for entity-level data from intermediate school district (ISD), local education agency (LEA), and public school academy (PSA) districts in Michigan.

Agreement Number (EEM characteristic) - This is the agreement number (formerly referred to as the recipient code) used by the School Support Services Office of the Michigan Department of Education. The EEM system assigns 9-digit agreement numbers to new entities.

Alternative Education Programs for Suspended/Expelled Students (EEM characteristic) - If the entity does not provide an alternative education program,
mark the first choice (“does not provide”). If the entity provides an alternative education program to suspended/expelled students from the home district only, mark the second choice. If the entity provides an alternative education program to suspended/expelled students from the home district and other districts, mark the third choice.

- 1st choice: The school/unique education provider does not provide alternative education programs to suspended and/or expelled students.
- 2nd choice: The school/unique education provider provides alternative education programs to suspended and/or expelled students from the home district only.
- 3rd choice: The school/unique education provider provides alternative education programs to suspended and/or expelled students from the home district and other school districts.

This field compiles information on schools and unique education providers that provide alternative education programs for suspended and/or expelled students. This must be reported by all districts for all schools and unique education providers.

Center for Shared Solutions - Center for Shared Solutions (CSS). The Center for Geographic Information (CGI) is part of the CSS and provides the geographic coordinates and maps that populate geographic searches in the EEM.

Central Contractor Registration (CCR) - After obtaining a Data Universal Numbering System (DUNS) number, American Recovery and Reinvestment Act (ARRA) grant recipients must register with the Central Contractor Registration (CCR). This is a government-wide registry for organizations that seek grants from or otherwise do business with the federal government.

The State Administrator or State Approver must approve this closing.

Entity Code - A code that serves as a unique identifier for entities of a specified Entity Type. It is only unique within all entities of that Entity Type (e.g., DCODE for Districts, BCODE for Schools, Agreement Number for Non-School Recipients [NSRs], etc.)
