# Downloadable Data Files

MI School Data

There are several ways to produce data files in MI School Data. All can be opened as an Excel spreadsheet. The different methods generate different files.. Use this guide to find the files, and to see the type of files generated by each method.

Enter your location and report settings and click View Results. After your report renders, click Download/Print at the top. For most reports you will see:

START HERE
from within a report

PDF with graph and data table for selected location & selected report settings. For cut & paste, printing, sharing.

Spreadsheet with data for selected location, selected report settings.

Student Counts | Grad/Dropout Rate | Non-Resident Status

Student Count | Retained In Grade | Attendance | Student Mobility

Data for your selected Location | Related Data

As a PDF   As a .CSV

Download All Data for the Selected Location

Statewide Data For Report (Cell Suppressed) as a .csv
The Statewide Data for Report file provides data for the most recent year. To access data for previous years at the statewide level please use the School Data File.

Request School Data File (Non-Cell Suppressed)

Please download the latest version of Adobe to access the PDF reports.
The latest version can be found here: http://get.adobe.com/reader/

Spreadsheet with data for selected location, ALL DATA delivered (including demographics).

NON-SUPPRESSED spreadsheet. Takes user to a data file request dialog; file is emailed based on user permissions.

Cell-suppressed STATEWIDE spreadsheet (all data - statewide, ISDs, districts, and schools.

Navigate to Other/Data Files to request a single-year, more customized data file. If your email of record shows you have secure login privileges, you will receive an unsuppressed* data file.

Field descriptions

Select location (statewide, or school/district

A link to data file is sent your email address (secure users get non-cell suppressed file)

One file for each year.

List of districts, schools, and contacts

Includes student count, MEAP, MME, and grad rate on one row for a school/district.

Economically disadvantaged and top to bottom ranking data

START HERE

Select as many files as you wish

*So there is no risk of identifying an individual student, MI School Data uses *cell suppression*. No data will display in a graph or spreadsheet *cell* for student counts under 10, or percentages less than 5 or greater than 95. Users with a secure login will receive an *unsuppressed* data file.

Under Other/Data Files, click Additional K-12 Data Files or College Data File.

- **These files are not not necessarily in a standard MI School Data report.**
- **Each submenu offers a different set of downloadable files.**
- **Some Excel files contain several tabs with different data sets.**
- **These files were formerly housed on the CEPI website.**

College enrollment and transfer files too

Files formerly on CEPI website

Menu similar to MI School Data navigation

Each topic provides different sets of data files – take time to browse

| K-12 School Data File | College Data File | Additional K-12 Data Files | Student Pathways |

| District/School Information | Student Counts | Staffing Information | Financial Reports |

| Student Count | Nonpublic Student Counts | Free and Reduced Lunch Counts | Special Education Enrollment |
| District FTE Pupil Counts | Grad/Dropout |
