

Neighborhoods that are Hard-to-Count for 2010 Census Senate District 13

"Hard-to-Count" scores are based on twelve socio-economic indicators from the 2000 Census that are correlated with census participation. The higher an area's score, the greater the predicted difficulty in enumerating its population.

- The indicators include:
- Vacancy rates
 - Multi-unit housing and mobile homes
 - Prevalence of rental housing
 - Number of persons per room
 - Marital status
 - Availability of telephone
 - Educational attainment
 - Poverty
 - Public Assistance income
 - Unemployment
 - Linguistic isolation
 - Residential mobility

Legend:

- SENATE DISTRICT (Red outline)
- CITY or VILLAGE (Green outline)
- TOWNSHIP (Green outline)
- STATE (Dashed line)
- COUNTY (Grey outline)
- FREEWAY (Blue line with 'I' shield)
- HIGHWAY (Black line with number)
- LAKE or POND (Blue area)
