

REPORT TO THE LEGISLATURE
Pursuant to P. A. 331 of 2006
Section 909
MPRI –MDCH Joint Efforts Regarding Hepatitis C

The Michigan Department of Corrections (MDOC) has been working jointly with the Michigan Department of Community Health (MDCH) to implement The Michigan Prisoner Release Initiative (MPRI) for prisoners with Hepatitis C. All prisoners prior to release are tested for this disease by means of an Alanine Aminotransferase (ALT) test and given the results. Joint Committees are in place and meeting to find the best methods of properly dispersing this information to the medical staff of the local MPRI Committees.
