REQUEST FOR RULEMAKING (RFR)

In accordance with MCL 24.239(1): “Before initiating any changes or additions to rules, an agency shall file with the State Office of Administrative Hearings and Rules a request for rulemaking.” The agency will complete this form and send an electronic copy to the SOAHR at soahr_rules@michigan.gov. The SOAHR will review the request for rulemaking and send its response to the agency (see last page).

Department or agency	Natural Resources and Environment
Bureau/Division	Air Quality
Address	525 West Allegan Street, Lansing, MI 48933
Contact person	Brenda Blemaster, Administrative Rules Coordinator
Telephone	517-335-6984
FAX	517-335-6993

Title of proposed rule(s) or rule set:

Air Pollution Control Rules: Part 2, Air Use Approval

Rule number(s) or rule set range of numbers:

R 336.1211

Estimated timetable for completion:

12-18 months

Brief description of the proposed rule(s):

Existing rules in Part 2 provide Michigan with the legal authority to require applications for, write, and issue Renewable Operating Permits that comply with the federal requirements under Title V of the Clean Air Act. Recent federal-level promulgation of new rules that modify applicability levels under Title V for greenhouse gases requires that Michigan modify R 336.1211 to allow permitting of facilities subject to federal Title V requirements by virtue of greenhouse gas emissions only.

State or federal statutory or regulatory basis for this proposed rule(s) [include statutory references and public acts, as necessary]:

Sections 5503 and 5512, Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, provide for the promulgation of rules.

Problem the proposed rule intends to address/solve:

Existing Michigan Part 2 rules do not allow the state to fully implement the recently promulgated federal Prevention of Significant Deterioration and Title V Greenhouse Gas Tailoring Rule. R 336.1211 must be modified to give Michigan legal authority to write and issue permits for facilities that become subject to federal Title V requirements by virtue of their greenhouse gas emissions only.
