

## Geological Repositories and NGGDPP

### Michigan has Two Public Geologic Repositories

In KALAMAZOO is the Michigan Geological Repository for Research and Education ([MGRRE](#)) at Western Michigan University with an emphasis on Southern Peninsula geology. More information can be found at [MGRRE](#).

In MARQUETTE is the Northern Michigan Geological Repository which focuses on Northern Peninsula geology.

Please contact Ms. Melanie Humphrey, at the Upper Peninsula District Office, DEQ, Office of Oil, Gas, and Minerals by telephone (906) 346-8566 or by [E-Mail](#) to arrange for access to the Northern Michigan Geological Repository.

Michigan geologists are working with the U. S. Geological Survey as part of the The National Geological and Geophysical Data Preservation Program (NGGDPP) activities. The NGGDPP is working to identify, catalog, and preserve a wide range of materials and data that support a wide range of activities, including, but not limited to:

Identifying new oil and gas and mineral deposits

Contributing to research on climate change

Addressing issues related to water quality

Enhancing the ability to identify geologic hazards

Supporting research on development of unconventional energy sources.

For more information can be found at [NGGDPP](#).

If you would like to donate geologic materials to this effort please contact either of the repositories.
