12a. The number of collection and/or recycling locations (permanent or Intermittent) in the state of Michigan. mailback only

12b. List the weight of the covered electronic devices received by the Takeback program from consumers during the prior year:

0.355 Tons by mailback	Tons thru collection locations	Tons through collection days	Tons through Retailers
------------------------	--------------------------------	------------------------------	------------------------

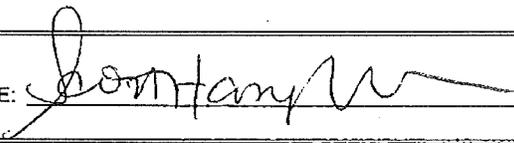

13. The processes and methods used to recycle or reuse the covered electronic devices received from consumers:
All units received by Eco International are tracked by the carrier tracking number and the origin address. Once unpackaged the product is scanned into our recycler's database to record Manufacturer, Model Number (if available) and Serial Number (if available). Product is then given a unique barcode to trak componenets during product dismantling. Materials are segregated into a clean commodity stream and then distributed to the appropriate mills, refineries etc for reuse.
Plastics are separated into colors and sent to plastic mills to be proecessed as feed stock for new plastics.
Boards are segregated and sent to refineries for recover precious metals.
Batteries are sent to licensed disposal or recycling vendors depending on battery composition.
We understand that Eco is shutting down at the end of the year and wil notiry of a comparable recycler.

Eco International has the following certifications:
ISO 14000
OHSAS 18001
R2 REsponsible Recycling
NAID member
