TAKEBACK PROGRAM CONSUMER CONTACTS

8a. What Web site address do you provide to consumers for information on your takeback program? NEC participates in the E-World MITS Recycling Program. The website is www.e-worldonline.com/dropofflocations/Index.

8b. If provided, what telephone number do you provide to consumers for information on your takeback program? They may call MITS at 877-342-6756 or the NEC Technical Support Center at 800-632-4662.

TAKEBACK PROGRAM INFORMATION

9. Please describe your takeback program.

The MITS Program will utilize several methods of collection and 1 recycler in order to maximize drop off convenience for Michigan residents.

Collection locations listed will accept up to 7 CED's of any brand per Consumer or small business per day free of charge. Collection locations will not accept any electronic device which does not qualify as a CED under Michigan Regulation. CED's included: Desktop or personal computer, computer monitor, portable computer, television, or printer sold to a consumer.

Consumers and small businesses who may not be physically able to bring CED's to collection sites have the option to utilize the mail back program detailed in the plan. Please see description to be inserted below, which are on the www.e-worldonline.com website.

E-World Online's Mail Back Program Description

1. An option via a "mail back program" # 1: Administered by MITS at no cost to the consumer. This mail back system will be available by accessing www.e-worldrecyclers.com. In order to utilize the mail back program each consumer may access the websites/links listed above or call E-World Online (MITS) office directly. Once they do so and the product has been validated, the consumer will be mailed or emailed (per request) a pre-paid shipping label and instructions on how to render the unwanted product to a convenient UPS location. The closest UPS location will be provided in the instructions. The mail back program is intended for products weighing less than 50 lbs.
2. An option via "mail back program" # 2: In cases in which the consumer or small business does not wish to utilize the convenient drop off locations provided in option #1, the customer may choose option #2. This mail back alternative is available by accessing www.e-worldonline.com or calling E-World Online (MITS) with the toll free number listed.

If the customer deems that the drop off option to a UPS Store is not convenient, they may contact E-World Online via phone or email in order to have their qualified device picked up at no charge. The pick-up process will operate in the following steps:

- A. Customer contacts E-World Online via email or phone to provide the specifications of the electronic including name, address, contact information, dimensions, approximate weight, category, and desired date of pick up.
- B. Once E-World has determined the electronic device qualified as a CED, it will send a box with a UPS or FedEx code tag to the address given.
- C. The customer will receive the box, pack it with the electronic, apply to code tag, notify E-World Online the package is ready for pick up, and leave it at their door.
- D. UPS or FedEx will be notified immediately by E-World Online in order to pick up the package immediately.

Customer instructions detailing the mail back program will be posted on the websites listed above as follows (You may access www.e-worldonline.com and click on the "Recycle an Item" tab on the homepage to access: MITS takes confusion out of recycling your old electronic items and provides you with a simple step-by-step approach that clearly explains all the available solutions. In many cases the solution is completely free of charge to you; it is paid for by the manufacturers. The step by step recycling wizard will explain any responsibility required by you in the recycling process. Here is how MITS is able to make the whole electronics recycling process as easy and convenient as possible:

1. By entering the location on the website you wish to search from, MITS will search for any nearby recyclers that will accept your electronic device. Based on your location the type of recyclable items may change. In addition to a list of recyclers, information about each location will also be provided: address, phone number, hours, products accepted, applicable fees, etc.
2. Next you will be asked several questions about the product you wish to recycle: the type of electronic device (computer, laptop, television, etc.) and the manufacturer, or brand, of the item.
3. If there is not a convenient electronics recycler near you, MITS can determine if your electronic item is eligible for a mail-back option through the product's manufacturer. This is when participating manufacturers provide a service for their customers to mail-back the product they wish to recycle to a trusted electronics recycler.
4. To determine mail-back eligibility, you will be asked to enter the item model number and size (width, height, depth, and weight). This allows MITS to determine if the product meets the manufacturer's mail-back program criteria, such as weight and size eligibility requirements

5. If MITS determines your product is eligible for the manufacturer's mail-back program, you will be asked to enter some information about you so we may assist you further in the process. By entering your name, address, phone number, and email address, MITS will be able to email you a shipping label for your item and provide step-by-step instructions on what to do next. You will also be informed as to whether the mail-back item will be completely paid for by the manufacturer, or if there is an applicable fee to have your electronic item recycled.

9a. Are appropriate devices covered with your takeback program? Check appropriate box:

If you are a manufacturer of computers do you accept all brands? Yes No N/A
If you are a manufacturer of video display devices do you accept all brands? Yes No N/A

9b. Is your takeback program free to consumers? Yes No

9c. Is your takeback program reasonably convenient and available to and otherwise designed to meet the needs of consumers in this state? Yes No

9d. What is the number of devices a consumer may deliver to your program each day? Unlimited # _____

9e. What method is used for takeback program? (check all that apply) Mailback Permanent collection site
X Collection events Retailer

10. What information do you provide to consumers on how and where to return covered electronic devices that are labeled with your name or brand label?

Our user manuals direct customers to our website which contains information on recycling under the following link:
<http://www.necdisplay.com/environmental-responsibility/state-recycling-information/81>

11. How do you provide information to consumers on how and where to return covered electronic devices?
Our NEC Display website explains our Environmental Initiatives and shows by state where NEC products can be recycled.
The link is: <http://www.necdisplay.com/environmental-responsibility/state-recycling-information/81>

TAKEBACK PROGRAM REPORT (include this information beginning with the first registration submitted after the implementation of the takeback program)

12. The total weight of the covered electronic devices received by the takeback program from consumers during the prior year:

4.5 tons

13. The processes and methods used to recycle or reuse the covered electronic devices received from consumers: Collection systems are designed with user convenience and availability in mind. This plan provides for convenient service throughout the state. Each specific collection site or service meets the needs of the identified market, and also meets, at a minimum, environmentally sound management practices for collection sites.

Collection sites are staffed in a manner that can ensure that incoming materials are screened for CED's from covered entities and for site security. Collection containers will be provided to each collection site. Initially, these collection containers will be Gaylord's. As the program grows, the quantity and type of collection containers can be modified based on the needs of the local communities. Appropriate signage and instructions for participants in the program should be discussed. VINTAGE TECH will pick up collection containers once each month, utilizing its own trucks. The scheduling of pick-ups at each location will be determined with each individual location, as VINTAGE TECH maintains open communications with each of its clients.

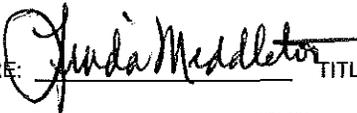

Processing of Materials

Collected Electronic Waste will be transported to and consolidated at a VINTAGE TECH location in Michigan (3 Gold Mine Road, Flanders) or Pennsylvania (1801 Union Boulevard, Allentown). VINTAGE TECH will utilize its own trucks to transport all equipment to a VINTAGE TECH site.

VINTAGE TECH maintains clean green recycling processes. We operate under Federal, State and local laws and maintain all applicable permits and closure and post closure bonds. We attempt to reuse all equipment when possible as a first course of action. All equipment for resale is tested and graded before it is sold. If the equipment is not reusable, it is de-manufactured into commodities for recycling. All R2 Focus Materials are handled with extreme care throughout the recycling chain. We do qualify and audit our downstream vendors who process R2 Focus Materials. Additional details may be found in the attached "VINTAGE TECH's Position on Operating Principles and Best Practices" and "Recycling Process Description."

I, the undersigned registrant, swear and affirm, UNDER PENALTY OF LAW, that the statements contained herein are true and correct. I certify under penalty of law that the information contained on this form, to the best of my knowledge and belief, is true, accurate, and complete. I am aware that there are significant penalties for submitting false information.
