For Cashiers Use Only

TAKEBACK PROGRAM CONSUMER CONTACTS

8a. What Web site address do you provide to consumers for information on your takeback program?
<http://www.haieramerica.com/ecollife>

8b. If provided, what telephone number do you provide to consumers for information on your takeback program? 800-732-9254

TAKEBACK PROGRAM INFORMATION

9. Please describe your takeback program.

Haier America is working to set-up a permanent collection and takeback program in Michigan to meet the convenience requirements of the Michigan E-Waste Program. Haier America will meet its voluntary obligation through either permanent collection sites, special collection events or both. Haier America will keep the Michigan DEQ updated as details are finalized.

10. What information do you provide to consumers on how and where to return covered electronic devices that are labeled with your name or brand label?

Haier America will update its company website and customer service staff with details of the Haier's Michigan takeback program (site locations and/or event days/times) where consumers can return Haier branded products for free.

11. How do you provide information to consumers on how and where to return covered electronic devices?

Haier America has partnered with 1800Recycling.com by linking from the Haier America website to provide general information in returning covered electronic devices. However, the 1800Recycling.com website is for general use and not specific to Haier America's products and takeback program. As mentioned in the response to Question 10, Haier America will update its company website and customer services staff with details of the Michigan takeback program (site locations and/or event days/time).

TAKEBACK PROGRAM REPORT (Include this information beginning with the first registration submitted after the implementation of the takeback program)

12. The total weight of the covered electronic devices received by the takeback program from consumers during the prior year:

20 Tons

13. The processes and methods used to recycle or reuse the covered electronic devices received from consumers:

Covered electronic devices were collected from permanent collection site and collection event in Michigan. All material is manually demanufactured into commodity form. Plastic is removed from e-waste, separate, and balled for OEM production. Metals are removed and manually separated and sent to a smelter for recovery or balled for OEM production. CRTs were handled using a glass-to-glass method (which involved breaking the glass) in compliance with all state and Federal regulations.

I, the undersigned registrant, swear and affirm, UNDER PENALTY OF LAW, that the statements contained herein are true and correct. I certify under penalty of law that the information contained on this form, to the best of my knowledge and belief, is true, accurate, and complete. I am aware that there are significant penalties for submitting false information.
