DeWitt Barrels has been managed by the same family since 1893. We have provided our customers with quality products and service that has enabled us to grow to a fleet of over 250 trailers and a service radius of 250 miles.

DeWitt Barrels Inc. started in Chicago IL in 1893. At that time we were providing containers for the meat packaging industry. The business grew and in the 1930's we opened an office in Grand Rapids to service the growing fruit and vegetable market in the Michigan area. As containers evolved from wooden barrels to steel drums, then fiber drums and then to plastic drums our company grew and changed with the markets. Today we operate a modern facility that processes all types of containers to a market that covers the entire Midwest region. We have accomplished all of this growth with a constant vigilance on protecting the environment. We constantly look for ways to save all of our natural resources. In the past year we have installed new energy efficient lights in the production area. We have reduced our hazardous waste to the point we are now a conditionally exempt small quantities generator.

We have a recycling company so we can help all our customers from putting paper, cardboard, and plastic in the landfills. We are looking to the future where we will add new production equipment that will reduce our water consumption. We have endowed a scholarship at Grand Valley University the "DeWitt Barrels Inc. Environmental Science and Natural Resources Scholarship" to help students learn to protect the environment.
