

Friends of the Rouge Event

General Motors Detroit-Hamtramck, Friends of the Rouge, and the Detroit Academy of Arts and Sciences

General Motors Detroit-Hamtramck employees volunteered at the Friends of the Rouge monitoring event, where middle school students learned about the Rouge River watershed and then took a field trip to the unique sampling site. The students were responsible for taking steps to investigate the health of the Rouge River by monitoring chemical parameters, conducting surveys of the physical conditions, and sampling for benthic macro-invertebrates. Together they raised awareness of pollution in the river and encouraged students to take action.
