MICHILOGIC TIME LINE

Illustrated by Karen Goryl and Norm Hanschu

Midwest Mineralogical and Lapidary Society
of Dearborn, Michigan
As a cooperative
Environmental Education Initiative Project

Published by the

Department of Environmental Quality

Geological Survey Division – 1994

Made available on the web

@ www.deq.state.mi.us/gsd – 2000

This is the illustrations from the Micilogic TimeLine enlarged to fill an 8.5 by 11 piece of paper. The Micilogic TimeLine was written to acquaint the reader with geologic time and the history of life (fossil record) as they are known in Michigan. Reference to scale are based on the original drawing dimensions of about 7.5 by 5. For additional information about the illustrations please see the original publication. The larger format is hoped to help make it easier for students to see the and use the illustrations as they learn about fossils and geology.

We Hope you find this publication useful. Any comments that would improve this product, information about how it is used, and/or suggestions for future editions or products is appreciated.

Please direct comments and suggestions to:
