## Michigan Geology Maps

Nothing is better for helping to explain geology other than a MAP. Check out the options that follow

## Glacial Geology Map (3,000 KB)

A map showing the surface of the State as seen by geologists.

<u>Bedrock Geology Map</u> (1,700 KB) The Bedrock Geology of Michigan - what you would see if all of the glacial sediments were removed.

## <u>Oil & Gas Map</u> (2,000 KB)

A map showing the distribution of Oil & Gas wells in the state.

<u>Explanation of Geologic Maps</u> (50 KB) What are these maps trying to show?

<u>Generalized Maps</u> (530 KB) A grouping of maps - hopefully to make it easier to select the one(s) you want.

<u>Geology of Michigan brief</u> (50 KB) The quick and easy explanation of the geologic history of our State. Good for general audiences

## <u>Geology of Michigan</u> (110 KB)

The geology of the state in more detail. Good for more advanced audiences.

Files in Adobe **PDF** format may need the free <u>Acrobat Reader</u>.

Go to the <u>OGS</u> web page

Go to the OGS <u>Publication List</u> or <u>Publication Order Form</u>
