

**Catching the Wave –**  
Green Chemistry and Economic  
Development in the Great Lakes  
Region

*Save the Date!*

November 13-15, 2012

Chicago, IL

The use of Green Chemistry and Engineering in the market strategies of businesses throughout the Great Lakes region is growing as companies look for ways to meet consumer demand for products and processes that are more sustainable. Join participants from industry, research, government, not-for-profits, US EPA Region 5, and the Sustainable Chemistry Challenge Program at the first Great Lakes regional Green Chemistry Conference.

Day 1:

- Success stories from Great Lakes businesses
- Public-private partnerships
- The role of not-for-profits and government

Day 2: Working sessions on

- identifying technical assistance needs
- developing a framework for technical assistance resources in the Great Lakes region and beyond.

Day 3: Training Workshop on the GreenScreen™ for Safer Chemicals (Optional - Separate registration required)
