

# General Motors Flint Global Rivers Environmental Education Network

General Motors Flint Metal Center, General Motors Flint Assembly, Carmen-Ainsworth High School, Davison Middle School, Lakeville Middle School, and North Branch Middle School

---

GM Flint Metal Center and GM Flint Assembly bring Project GREEN to several local high schools and middle schools. Every spring several employees accompany students to a local stream for water testing. After the results are analyzed they are given to the Flint River Watershed Coalition. Employees also volunteer at the annual GREEN Summit to help support the students as they present their findings. This program engages young people in protecting local water resources.
