

Green Team Volunteer Days

Pilgrim Manor and Habitat for Humanity

For the fourth straight year Pilgrim Manor's Green Team gathered volunteers to participate in Habitat for Humanity site builds. Employees were involved in building houses that promoted green design and materials use and were able to educate and support future building projects that will decrease negative environmental impacts. There was a sense of pride and willingness among staff to learn more about what green building entails and Pilgrim Manor was able to establish relationships within the local community centered on environmental efforts.
