

## HAZARDOUS WASTE USER CHARGE STAKEHOLDER WORKGROUP MEETING AGENDA

March 22, 2012

### Today's Discussion Items:

- I. Ideas for potential Program changes based on previous workgroup and stakeholder constituent discussions, identifying benefits and consequences
- II. Identify scope of Program (how many people should we project for funding purposes?)
- III. Funding:
  - A. Summary of Program funding in other states
  - B. Guiding principles based on 1998 Workgroup and experience with current system:
    1. Equitable; those that benefit the most or cause most hazard should pay more
    2. Broad based; spread out over a large group with lower chance for fluctuations in revenue caused by changes in the economic activity of group members
    3. Reliable and enforceable; clear ability to produce revenue and not intended to change behavior
    4. Easy to pay and collect; system should afford easy payment and efficient collection
    5. Stable; user charge system works best when it parallels the Program goals
    6. Works within current rules; hazardous waste rules were not written with user charge collection in mind.
- IV. Preliminary discussion regarding stakeholder workgroup report

### Handouts:

- 1) Potential Hazardous Waste Program Changes, Benefits and Consequences
- 2) Summary of Funding for other Hazardous Waste Programs

### Next Meeting:

- Identify/narrow down funding options
- Timeline
