

Michigan Automotive Compressor, Inc.

"The environment is our top priority. Our company is committed to being a responsible citizen. Our policy is to continually improve our systems, prevent pollution, and of course, comply with all laws and regulations.

Tatsuhito Ishikawa, President
Michigan Automotive Compressor, Inc.

Michigan Automotive Compressor, Inc. began its operation in 1989 and currently employs 973 associates. Michigan Automotive Compressor's plant is 1,019,440 Sq Ft. and sits on 104 acres located in Parma, Michigan. MACI is an ISO 14001 certified facility and became a MDEQ Clean Corporate Citizen in 2014.

MACI is committed to environmental sustainability having its property the home to a diverse population of wildlife and wetlands. MACI was the recent recipient of the Jackson Waste Watcher designation because of our vast recycling program with 18 different recycling streams. MACI also encourages it's associates to be responsible citizens at home by offering community electronics recycling and a mixed use recycling for household waste. MACI was able to recycle over 18 pallets of household electronics in 2014 and over 390 cubic yards of household recyclables.

Environmental Highlights FY 2014

- New expansion and parking lot area is fitted with all LED Lighting.
- Replaced water pumps, cooling towers, and fans with those fitted with variable frequency drives.
- Added multiple energy efficient tower pumps.
- Added an oil/water separator to the new scrap dock stormwater drainage system.
- Reduced VOC emissions per piece by 12% from 2013 to 2014.
