Hot-Dip Galvanizing Line

**Joint Venture with
Worthington Industries, Inc.
and Severstal NA**

"The culture and environmental management system that exist at Spartan Steel Coating make participation in the Clean Corporate Citizen program a natural fit. As facility or product enhancements are introduced, environmental impact is always taken into account as it is a natural consideration in Spartan's every day culture."

**3300 Wolverine Drive
Monroe, MI 48162**

Our business is applying zinc to steel coils through a process called hot dipped galvanizing. Our hot-dipped galvanizing line currently produces more than 400,000 tons of galvanize and galvanneal steel annually. Approximately 75% of our business supplies automotive customers, with the remainder being used in construction, appliance and manufacturing industries. Spartan employs 50 people who work together in a team-based environment. Our commitment to continual improvement forms the basis of our operations and is supported by our Spartan Operating System, which fully integrates the requirements of ISO/TS 16949, ISO 14001 and OHSAS 18001.

Spartan Steel Coating is committed to responsible corporate citizenship, which includes properly managing our impact on the environment.

In the past 5 years, Spartan has:

- Reduced total water use by 9%, saving 9.5M gallons
- Recycled 3,500 pounds of office paper
- Re-graded property to improve storm water flow to pond
