

MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY

AIR QUALITY DIVISION

As Amended August 19, 1987

**ANNUAL REPORTING**

---

**R 336.201 Definitions. (1/30/80)**

Rule 1. As used in these rules:

(a) "Commercial location" means a publicly or privately owned place where persons are engaged in the exchange or sale of goods or services. Commercial location also means multiple housing units which have a single owner and which are designed for 3 or more families. Commercial location does not include elementary and secondary schools and facilities owned and operated by the state government. A separate building or group of buildings used for the exchange or sale of goods or services which has a single owner and manager constitutes a separate commercial location.

(b) "Department" means the department of natural resources.

(c) "Geographical site" means contiguous land ownership by 1 landowner. A public right-of-way, such as a road, railroad, and watercourse through part of the site, is not considered to break the continuity. If transmission and fuel delivery rights-of-way or a strip of land that serves no other principal purpose than as a transportation or materials handling link connects 2 or more otherwise separate geographical sites, such connected sites shall be considered separate geographical sites.

(d) "Manufacturing location" means a place where a person is engaged in the making of goods or wares, including the generation of electricity, in the processing of material, or primarily in the disposing or treating of solid or liquid waste. For the purpose of assessing a surveillance fee, manufacturing location includes all such places, whether publicly or privately owned and contained within 1 geographical site, except for places owned and operated by the state government. A power plant, as defined in table 42 of rule 401, constitutes a separate manufacturing location when used to supply steam or energy to more than 1 other manufacturing or commercial location. However, a power plant with a capacity of more than 500,000 pounds of steam per hour is considered a separate manufacturing location. For a large industrial complex or other unusual cases, the department may determine that the complex constitutes more than 1 manufacturing location, based on such factors as separate corporate operating division units or sections.

**R 336.202 Annual reports. (11/11/86)**

Rule 2. The department shall require an annual report from a commercial, industrial, or governmental source of emission of an air contaminant if, in the judgment of the department, information on the quantity and composition of an air contaminant emitted from the source is considered by the department as necessary for the proper management of the air resources. The information shall be specified by the department and shall be submitted on forms available from the department. The information shall include factors deemed necessary by the department to reasonably estimate quantities of air contaminant discharges and their significance. The report shall be submitted to the department not later than March 15 of each year following notification by the department that the report is required. The notification shall be in writing and shall be mailed to the owner or operator of the source of emission not less than 45 days before the deadline for submitting the report.

**R 336.203 Rescinded. (8/19/87)**

**R 336.204 Register of materials. (8/19/87)**
