

Summary of 1-Hour Ozone Exceedances for 2007, 2008, 2009 for All Sites in Michigan

Max. Allowable is the maximum number of exceedances that can occur in 2009 without violation of the standard. Values above *Max. Allowable* are **bold**.

Sites in violation of the standard are shaded **red**, sites not in violation of the standard are shaded **green**.

This ozone table summarizes exceedances of the 1-Hour National Ambient Air Quality Standard (NAAQS) of 125 ppb for the past three ozone seasons. An area meets the standard when the three year-average of exceedance days per calendar year is equal to or less than one. Calculation details are explained in 40 CFR 50 Appendix H (7). NOTE: The Hour field in the table denotes the start hour (EST). Values in red indicate a monitoring site in violation of the standard.

2009 DATA HAS NOT BEEN VALIDATED - UPDATED ON 03/18/09
