**DTE ELECTRIC COMPANY – TRENTON CHANNEL POWER PLANT, TRENTON, WAYNE COUNTY (SRN B2811)**, on a proposed draft permit for installation and operation of five natural gas-fired package boilers which will replace four existing coal-fired boilers. Additionally, changes are being proposed to existing permit 125-11B to reflect the shutdown of the coal fired boilers. It has been preliminarily determined that the installation of five natural gas-fired package boilers will not violate any of the Michigan Department of Environmental Quality’s rules nor the National Ambient Air Quality Standards. The facility’s impact will not exceed the available increments for nitrogen oxides, particulate matter less than or equal to 10 microns in size, and particulate matter less than or equal to 2.5 microns in size. Additionally, the new boilers will require revisions to Renewable Operating Permit (ROP) No. 199600204. This public comment period meets the public participation requirements for a future administrative amendment to the ROP. The facility is located at 4695 Jefferson Avenue West, Trenton, Michigan. The responsible official for these sources is Andrew Fadanelli, One Energy Plaza, Detroit, Michigan. The New Source Review and ROP public notice documents can be viewed at [www.deq.state.mi.us/aps](http://www.deq.state.mi.us/aps). Written comments will be taken through April 12, 2016. A public hearing will be held on April 12, 2016, at the UAW Local 387 Hall, 24250 Telegraph Road, Flat Rock, Michigan. Prior to the hearing, an informational session will be held from 6:00 p.m. to 7:00 p.m., where the Air Quality Division staff will be available to answer questions; the public hearing will immediately follow. Written comments should be sent to Annette Switzer, Permit Section Supervisor, Michigan Department of Environmental Quality, Air Quality Division, P.O. Box 30260, Lansing, Michigan 48909. All statements received by April 12, 2016, will be considered by the decision-maker prior to final action. **DEADLINE FOR PUBLIC COMMENTS REGARDING ENBRIDGE OIL SPILL SEGMENT 3 - NO FURTHER ACTION REPORT, MARSHALL, MI CALHOUN COUNTY.** Written comments are being accepted on an Intent to Approve an Unrestricted Residential No Further Action (NFA) Report for the Enbridge Oil Spill – Talmadge Creek, Segment 3 (Mile Post 0.50 to Mile Post 1.00) a site of environmental contamination located on Talmadge Creek between Division Drive and 16 Mile Road south of Marshall, Michigan. Contamination at the site was caused by the release of crude oil from the Enbridge Line 6B pipeline rupture on July 26, 2010. Crude Oil, contaminated soil, and impacted surface water were removed from the site during remedial activities. Subsequent soil, groundwater, sediment, and surface water remedial investigations indicate exceedances of Natural Resources and Environmental Protection Act, Part 201 residential criteria do not remain. The proposed unrestricted NFA would not prohibit residential use of the property. The NFA Report is available for review at the Marshall District Library, 124 W. Green Street, Marshall, MI 49068, the Galesburg Memorial Library, 188 E. Michigan Avenue, Galesburg, MI 49053, and the Willard Library, 7 W. Van Buren Street, Battle Creek, MI 49017. A copy will also be available for review during normal business hours at the Michigan Department of Environmental Quality, Kalamazoo District Office,
