FEDERAL GRANTS NOW AVAILABLE FOR DIESEL ENGINE VEHICLES AND EQUIPMENT. The American Recovery and Reinvestment Act of 2009 (ARRA) provides federal stimulus funding for state, county and local governments, as well as school districts, port authorities, and non-profit agencies that have transportation or air quality as their focus, to do diesel engine emission reduction projects throughout the state. The stimulus funding for this program is authorized under the Diesel Emissions Reduction Act (DERA), administered by the U.S. Environmental Protection Agency (U.S. EPA). Grant funds can be used for a variety of diesel engine fleet emission reduction activities such as the installation of retrofit technologies, engine upgrades, certified engine replacement, or certified vehicle and equipment replacements. Grant funds may be used for both on-road (i.e. trucks and buses) and off-road vehicles and equipment (i.e. generators, marine or construction equipment). As an added bonus, up to 15% of the grant funds can be used to cover a grantee's administrative costs (i.e. staff salary and benefits) associated with the administration of a grant project. Approximately \$25 million is available through a federal competitive Request for Applications (RfA) process in the six-state Midwest region. **The U.S. EPA's RfA was issued on Friday, March 20, 2009, and grant applications are due to the U.S. EPA on Tuesday, April 28, 2009.** More information on the federal stimulus funding or DERA grant application process can be found by going to the U.S. EPA web site at: www.epa.gov/otag/eparecovery/prognational.htm. Additional questions about clean diesel projects can be directed Robert Rusch, Michigan Department of Environmental Quality, Air Quality Division at 517-373-7041 or Email at ruschr@michigan.gov.

MARCH 27, 2009

DEADLINE FOR PUBLIC COMMENT ON A PROPOSED REMEDIAL ACTION PLAN FOR THE PINE GROVE SUBDIVISION FACILITY, GRAND TRAVERSE COUNTY. Written comments are being accepted on a proposed remedial action plan for the Pine Grove Subdivision Facility, a site of environmental contamination located in Traverse City and East Bay Township. The origin of the contamination is 880 Parsons Road, which is now the location of the Traverse Bay Area Career Technical Center (TBACTC). The proposed plan calls for in-place treatment of groundwater contaminated with chlorinated solvents on the TBACTC property by way of enhanced microbial degradation. The goal of this in-place treatment is to prevent groundwater contaminated above generic residential cleanup criteria (promulgated under Part 201, Environmental Remediation, of Michigan's Natural Resources and Environmental Protection Act, 1994 PA 451, as amended) from leaving the TBACTC property and entering the Pine Grove Subdivision. During the time when the in-place remedy is being implemented, groundwater quality in the Pine Grove Subdivision area will be monitored to document the occurrence of natural attenuation of contaminants to a safe level below generic residential cleanup criteria. Land use restrictions are proposed on the TBACTC property to prevent activities that could result in unacceptable exposure to contamination and a resurgence of groundwater contamination. Contingency plans are included that will be implemented, if necessary, to assure the protectiveness of the response action. A copy of the plan proposal, including site investigation data, will be available for viewing starting on February 23, 2009, at the Michigan Department of Environmental Quality (MDEQ), Cadillac District Office, 120 West Chapin Street, Cadillac, Michigan. Theresa Laughlin, MDEQ, Remediation and Redevelopment Division, can be contacted at 231-876-4450 to arrange a viewing time. A copy of the plan is also available at the TBACTC at 880 Parsons Road, Traverse City, Michigan, during normal business hours. The TBACTC office in Traverse City can be contacted at 231-922-6273 to arrange a viewing time. Written comments should be received by March 27, 2009, and sent to: **John Vanderhoof**, Michigan Department of Environmental Quality, Remediation and Redevelopment Division, 120 West Chapin Street, Cadillac, MI 49601. *Please also see March 16, 2009 listing in this Calendar for an opportunity to attend a public meeting on this site.* Information Contact: **John Vanderhoof**, Remediation & Redevelopment Division, Email address: vanderhoofj@michigan.gov; 231-876-4459.

AIR PERMIT APPLICATION WORKSHOP FOR FIRST-TIME APPLICANTS, CONSTITUTION HALL, LANSING, MICHIGAN. For most first-time applicants, completing the Permit to Install application is a daunting task. However, submitting a complete and timely application can be more manageable if you know what's expected. The Michigan Department of Environmental Quality is offering this workshop designed to give information on how to submit a complete permit application. Since this workshop is geared to first-time applicants, a significant portion of the session is devoted to your specific application. Air Quality Division permit engineers will be available to discuss your permit application with you one-on-one. To take full advantage of this time with the permit engineer, it is recommended you bring detailed information about your project with you to the session. This training is designed for first-time air permit applicants who need help completing their permit application; however, those who have applied before and need a refresher are welcome to attend as well. Online registration is available on the Web at www.michigan.gov/deqworkshops, click on "Upcoming DEQ Workshops". Registration Fee: \$25, which includes parking in the Ellis Parking Lot on the east side of Constitution Hall and training manual. Information Contact: **James Ostrowski**, Environmental Science and Services Division, 517-241-8057, or Email at ostrowskij2@michigan.gov. TAKE THE BITE OUT OF DENTAL AMALGAM WASTE, LANSING CENTER, LANSING, MICHIGAN. Wastewater treatment facilities everywhere are working diligently to comply with stringent federal effluent limits for mercury. This workshop will identify and refine ideas for reducing discharges of dental amalgam, a major source of mercury for these sewerage systems. Speakers will present pertinent information concerning amalgam use in dentistry, technologies and best management practices that reduce amalgam discharges. Course participants will obtain detailed knowledge regarding dental amalgam best management practices and regulatory approaches; examples of educational materials, ordinances, and reporting forms; and suggestions for outreach

and measuring progress. In addition, several model community case studies will be presented featuring innovative and successful approaches. Participants will also learn the key aspects of effective operation and maintenance of amalgam separators. DEQ is on the planning committee for this event. The registration fee of \$50 includes continental breakfast and lunch. To register, call the Michigan Dental Association at 1-800-589-2632 ext. 402 or visit the MDA's Website at www.smilemichigan.com – click on Dental Professionals, then Continuing Education then Annual Session. **Pre-registration deadline is March 23, 2009.** After 3/23/09 all registration is on-site.

APRIL - MAY 2009

2009 SARA TITLE III TIER TWO, TOXIC CHEMICAL RELEASE INVENTORY, AND ANNUAL WASTEWATER REPORTING WORKSHOPS, VARIOUS LOCATIONS, MICHIGAN. This workshop will focus on the reporting requirements for Title III of the Superfund Amendments and Reauthorization Act (SARA Title III), also known as the Emergency Planning and Community Right-to-Know Act of 1986; and the Wastewater Reporting rules under Part 31 of the Natural Resources and Environmental Protection Act of 1994. SARA Title III covers facilities that handle hazardous or toxic chemicals and includes hazardous chemical inventory reports, emergency hazardous chemical releases, emergency planning, and toxic chemical release reporting. The Wastewater Reporting rules require facilities that discharge wastewater to the waters of the state or to a sewer system to submit an Annual Wastewater Report. The workshop will also highlight the toxic chemical release inventory (TRI) report that is due July 1. Attendees will receive basic information on all of the reporting requirements and the associated online reporting programs. TOXIC CHEMICAL RELEASE INVENTORY (TRI) REPORTING WORKSHOP – BEGINNERS AND ADVANCED COURSES, KENSINGTON COURT, ANN ARBOR, MICHIGAN. TRI reporting is required under Section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA), also known as SARA Title III. Facilities in certain industry sectors that meet the criteria must submit reports for listed toxic chemicals and report releases and waste transfers of the chemicals as well as waste management activities. The U.S. Environmental Protection Agency Region 5 and Michigan SARA Title III Program are partnering to offer this workshop in two sessions. Those who have little or no knowledge of reporting requirements of EPCRA Section 313 should attend the beginner's session in the morning, as well as the afternoon session. The morning beginner's session will cover the regulation in detail, including reporting changes for 2007, as well as Section 6607 of the Pollution Prevention Act (PPA) of 1990. The advanced session will take place in the afternoon and is intended for those who are familiar with the reporting requirements of EPCRA Section 313. Registration for the full day beginner's course is \$75 and includes lunch. Registration for the half-day advanced course is \$50 and does not include lunch. A full brochure and online registration are available on the Web at www.michigan.gov/deqworkshops, click on "Upcoming DEQ Workshops." Registration Information: **Environmental Assistance Center**, 800-662-9278, or Email at deq-ead-env-assist@michigan.gov.
