

Mid-Michigan Recycling

***Experts in wood-waste recovery,
recycling and reuse***

A Decade of Service

Mid-Michigan Recycling has been in business since 1994, specializing in receiving, transporting, processing and recycling wood waste to conserve our state's natural resources and improve our environment.

Mid-Michigan Recycling classifies wood waste for its highest value use. The wood waste is then reused or processed and recycled into the appropriate market.

We accept wood waste produced by manufacturing, forestry, construction and demolition sectors, municipalities and utilities. We offer convenient and economical methods to recycle/dispose of a diverse array of wood-waste products ranging from sawdust to entire trees, including:

pallets/skids

crates

wire reels

cabinets, furniture residue

scrap wood

sawdust

shavings

milling residue

processed wood

cutoffs

trees

branches

brush

stumps

bark

Mid-Michigan Recycling recycles wood waste in its original form through alternative environmentally friendly uses. Wood waste may also be chipped or ground into suitable sizes for a variety of specialty product markets, such as landscape material, playground material, animal bedding, etc. Residue wood-waste chips are recycled at the Genesee Power Station for the generation of "green power."

Dimension lumber and pallets are classified and marketed, as possible, into the marketplace. Residual wood is processed for its highest value use and most economical market.

An Environmentally Responsible Business

Diversion of discarded, unwanted and unused wood waste from landfills preserves landfill space for materials that require burial. And by recycling wood waste to its highest value use, it becomes less wasteful, helping preserve trees, one of our natural resources. This, in turn, protects wildlife habitat, reduces soil erosion and helps maintain air quality.

Mid-Michigan Recycling recycles more than 1.5 million cubic yards of wood waste annually and expects to accept more wood waste every year as businesses continue to focus on ways to improve and enhance the environment we share.

For Our Customers

Environmental management requires recycling waste materials. Businesses more than ever have made the decision to be better stewards of the environment by satisfying their

own recycling goals as well as industry goals set by the ISO and LEED programs.

Mid-Michigan Recycling believes in recycling and works with businesses to help them reach their goals.

Mid-Michigan Recycling operates multiple wood-waste receiving yards in southern Michigan and is an authorized Michigan Department of Environmental Quality wood-waste recycling company.

Customers can dispose of their wood waste at one of our receiving yards, or, for greater convenience, we offer customized pickup and transportation services. We offer a wide network of contract wood-hauling services and specially designed trailers and equipment.

We offer customers a convenient and economical source of disposal/recycling for their wood-waste materials.

Mid-Michigan Recycling helps you:

- Preserve landfill space
- Meet ISO and LEED goals
- Protect our natural resources
- Dispose/recycle wood waste conveniently and economically
