MICHIGAN GREEN INFRASTRUCTURE CONFERENCE: PROTECTING WATER RESOURCES AND PROMOTING ECONOMIC DEVELOPMENT, THE LANSING CENTER, LANSING, MICHIGAN. Save the date - a major Green Infrastructure Conference is coming to Lansing on May 8-9, 2014. This conference is a natural outgrowth of the Governor's 2012 Special Message on Energy and the Environment. The Governor identified green infrastructure (GI) as a way to improve water quality in Michigan and create recreational space at the same time. The conference expands on this theme to highlight a broad range of benefits and opportunities provided by green infrastructure planning and preservation at local and regional scales. "How-to" presentations and case studies will be highlighted. Many experts will be available at this two-day conference to discuss what's being done to advance GI at the federal and state levels. The regional and local levels will focus on codes and ordinances, funding, cost/benefits, and partnerships. The site-specific level will feature presentations on preparation, design, placement, sizing, and maintenance of structural and vegetative controls. This conference is targeted towards local government decision makers and engineers, planners, consultants and landscape architects, developers and builders, drain commissioners, road agencies, business and industry, conservation organizations, foundations and environmental non-profits groups, and anyone with duties related to land use and stormwater management. Updated conference information is available on the Web at www.michigan.gov/deqworkshops, click on "DEQ Workshops". The DEQ Water Resources Division (WRD) will be hosting a training and exam for Comprehensive Soil Erosion and Sedimentation Control for individuals who have valid Construction Storm Water Operator Certificates and work for Part 91 Agencies where the individual may have soil erosion and sedimentation control plan review and design responsibilities. The training will cover the required components of a soil erosion and sedimentation control plan, the soil erosion and sedimentation control law, an overview of common best management practices for soil erosion and sedimentation control, and an exercise in plan review in design. Not all information in the exam is covered in the training, so participants are expected to have read and understand the information presented in the "[Certified Storm Water Operator and Soil Erosion and Sedimentation Control Inspector/Comprehensive Manual](#)." The exam consists of a forty question, multiple choice exam. A score of 70% is required to pass and receive a certificate of training. The Comprehensive Training and Exam schedules can be found on the web at www.michigan.gov/soilerosion and by clicking on the first link under the training header. **Cost: \$225.** To register, contact **Cheryl Petroski**, WRD at 586-753-3718, or petroskic@michigan.gov and be prepared to provide your Construction Storm Water Operator certification number.

JUNE 2014

ADVANCED WASTE CHARACTERIZATION WORKSHOPS, VARIOUS LOCATIONS, MICHIGAN. The DEQ is hosting two workshops to explain the process of characterizing business waste. This half-day workshop will focus on hazardous and liquid industrial waste and will provide information on the basic waste characterization concepts, including practical details to use when evaluating any waste. This workshop will be beneficial to environmental, health, and safety professionals at small quantity and large quantity generators of hazardous waste and anyone who manages waste for their business or institution. Topics will include: point of origination or when a waste first becomes subject to regulation; hazardous waste exclusions, where they are cited, and when you can use them; how to determine whether your waste meets the land disposal restrictions, needs to be treated before disposal, and how to determine the underlying hazardous constituents in your waste; how to determine when a listing applies and when generator treatment is an option; and how to collect random samples, what analysis is required, and when you can use less costly analysis method. Although solid waste will not be covered in the presentations, technical staff will be available on site. Updated workshop information is available on the Web at www.michigan.gov/deqworkshops, click on "DEQ Workshops."
